

Whose public spaces?

Neighbourhood renewal, conviviality and place making in the Milan urban fringe

Chiara Tornaghi, post-doctoral research fellow
Dept. of Sociology and Social Research - University of Milano-Bicocca – Italy
chiara.tornaghi@unimib.it

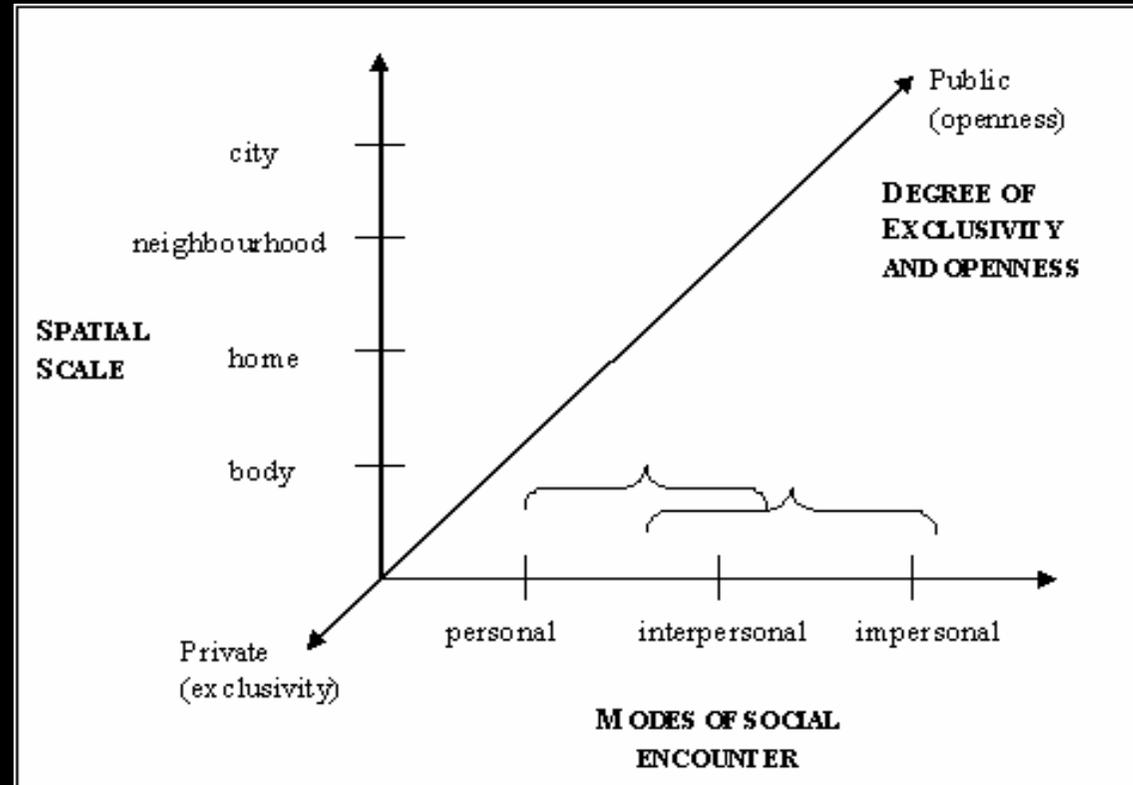

Object:

- Process of place making within a neighbourhood regeneration programme: Urban Italia

Aims:

- How structure and agency dynamics affect success or failure in regeneration programmes?
- Is it possible to deal with path-dependency when implementing EU/national policy model to local contexts?

key definition:

- Indoor-outdoor,
- “negative definition”
- non-reproduction activities, spare time, socialisation
- non-physical: constructivist perspective, social processes and behaviours, conflicts, negotiations, appropriation

Case Study:

- 80.000 inhabitants
50s-70s growths
- Tower blocks: co-op builders
- single family self-built houses
- Factories within residential areas; mix,
- Envir. Quality and standards
- No isolation
- Dormitory, post-fordist economy
re-ranking

Innovation:

The urban programme

Three main areas

A convivial city for youth

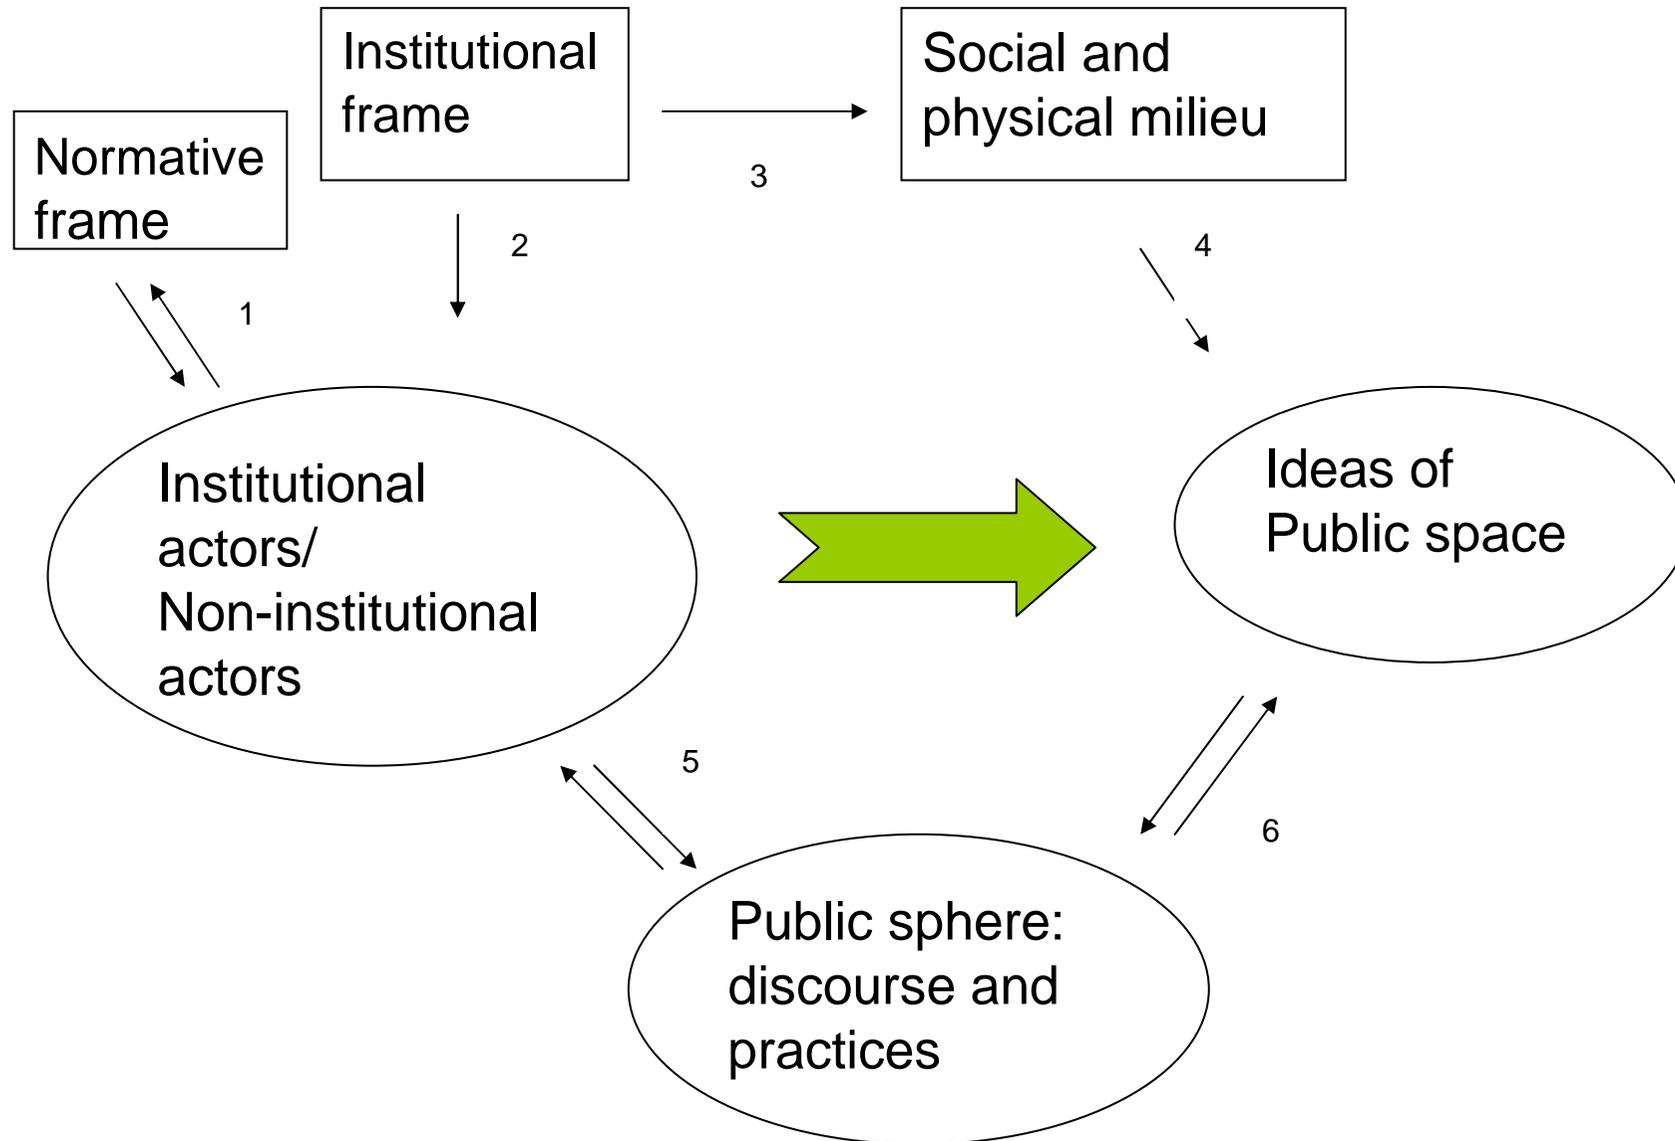

Timing:

- 2000 EU Urban
- 2003 Italian extension: redefinition of the project (first consultations)
- Sept. 2003: financing and launch of the project (event)
- Oct. 2003: protests and start of NIMBY mobilisation
- Oct. 2003-may2004:
 - public assemblies/ laboratories, project meeting
 - Planning/design
 - Decision
- June 2004: election and end of 1st phase (defining financed actions)
- End 2006: conclusion financed measures
- End 2010: programme conclusion

Methodology:

Contextual and processual variables

- Timing
- Financing
- actors/partners

- Political culture
- Political opportunities
- government structure
- City council technical and practical knowledge

Normative frame

Institutional frame

Social and physical milieu

- Physical resources
- Environmental History
- Age distribution
- Capabilities/resources

Institutional actors/
Non-institutional actors

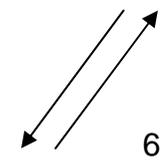

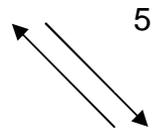

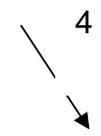

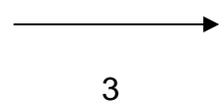

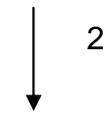

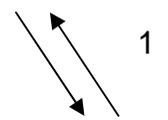

Ideas of Public space

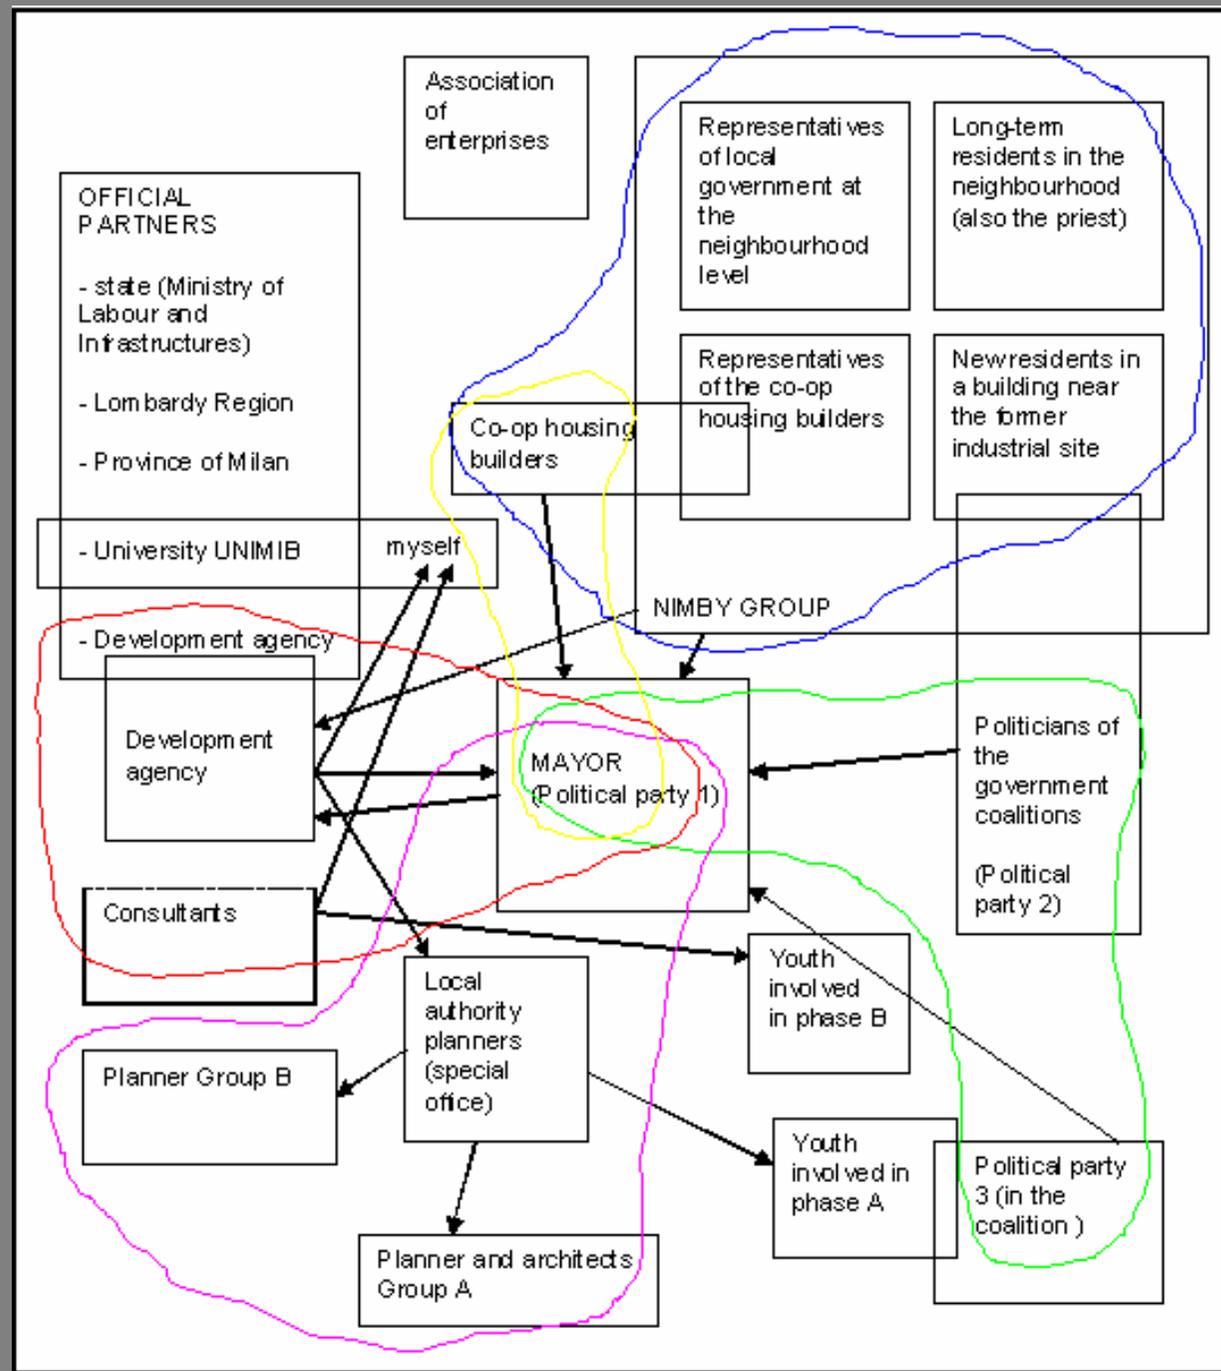

D

Public sphere:
discourse and practices

- Map of actors
- Networks
- lobbying

- Ideas
- Justification discourses
- How many? (Fraser)
- Who had access
- Any excluded?

Outcomes:

1) Conviviality and the conceptualisation of public space:

ST: elder, youth issue, social groups empowerment

A: lobbying, networking, accessing public spheres (**setting public arena, empowering**), expressing ideas of public space, recognising needs

2) Neighbourhood vs. city wide: the scale issue and the definition of public space as public good

ST: history and physical environment, pay-back

A: framing participation (**regulating**) and targeting collective spaces (**representing political issues**)

3) Intersectoral collaboration:

ST: technical/practical knowledge, **skills**;

political opportunities and the connections between political and technical sphere (Mayor)

A: multiple identities/belongings and lobbying

Conclusions: what can we learn from “bad” practices...

Towards a methodology for policy transfer:

1) Integrating policy design:

ST: Evaluate structural elements and constraints
(not only requisites to justify policy building)

2) Supporting policy delivery:

A: clarify connections and responsibilities of
political, technical and social realms

A: setting boundaries to participation and clarifying
the “scale” and the problem.

Summarising “Structural variables”...

Normative frame

- participatory opportunity (EU Urban programme)
- **time constraints** (dead-line to enact the project)
- **financial constraints** (need for additional funds/partnership)

Institutional frame

- Enlightened/experimental administration/team (resource)
- Political culture and **actor embeddedness** (constraint)
- political conjuncture (constraint)

Social and physical milieu

- physical resources
- socio-demographical composition

Summarising “Agency variables” ...

- Conflicts/agreement between **coordinators** (in the definition of ‘public goods’)
 - skills for intersectoral work and participation
 - Relationship between political and technical realm
 - Empowerment/**mobilising resources in different social group**
-
- Access to public arenas
 - **Position of key players and lobbying activities**
-
- Ideas of public spaces
 - Justification discourses
 - Definition of scale
