2.1 Intended learning outcomes, assessment, grades, and bands

§16.22 The standard achieved by a candidate in all summative assessments required by a course shall be judged by the relevant Board of Examiners in terms of the candidate's attainment of the stated intended learning outcomes for that course.

§16.23 Judgement shall be expressed in terms of the primary grades and secondary bands set out in Schedule A, or in terms of the grades set out in Schedule B. Documentation relating to courses and programmes shall indicate where Schedule A and Schedule B verbal descriptors shall apply.

§16.24 Judgement shall be made through direct reference to the primary verbal descriptors for intended learning outcomes and the primary verbal descriptors for professional, practical or clinical competence set out in Schedules A and B. Reference shall also be made to such subsidiary information as Schools may prepare to amplify the primary verbal descriptors in terms specific to a particular field of study. Where the outcome of the chosen mode of assessment is a proper percentage score it shall, before being reported to students, be converted into a primary grade and secondary band by reference to a conversion scheme determined by the Board of Examiners as appropriate for the assessment in question and subordinate to the relevant grade descriptors.

Chapter 1 stressed the importance of a course's intended learning outcomes (ILOs) and assessment scheme. The assessment scheme defines the assessment methods (such as examinations, essays, and practicals), which are used to measure each student's attainment of the ILOs. The assessment scheme also specifies the weighting of each assessment.

Unless changes are approved through the course approval process, the same assessment methods will be used every year a course is delivered. However, the actual tasks set for students may vary from year to year. In particular, examination questions should vary from year to year; assessments such as essays and practicals should also be varied where feasible. The course coordinator should ensure that each year's tasks taken together cover the course's ILOs fairly:

- If the course has a sufficiently small number of ILOs, each year's tasks should cover all ILOs.
- If the course has a larger number of ILOs, each year's tasks should cover a representative sample.

Assessment of a student's work in a particular task is a judgement of the extent to which the student has attained the ILOs covered by that task. This judgement is expressed in terms of a **primary grade** – A, B, C, D, E, F, G or H.

The meanings of the grades are defined by verbal **grade descriptors**, which are set out in Schedules A and B of the Code of Assessment. For instance, in Schedule A work that demonstrates "exemplary range and depth of attainment of ILOs …" should be awarded grade A, whilst work that demonstrates "conclusive attainment of virtually all ILOs …" should be awarded grade B. At the other end of the scale, work that demonstrates "no convincing evidence of attainment of ILOs …" should be awarded grade H.

Note that the ILOs for a higher-level course will be more demanding than the ILOs for a lower-level course. Thus the award of grade A (for instance) in a higher-level course signifies higher attainment than the award of grade A in a lower-level course.

In Schedule A the eight grades alone support only coarse judgements, so each grade (except H) is subdivided into **secondary bands**. The available bands are A1, A2, A3, A4, A5, B1, B2, B3, C1, C2, C3, D1, D2, D3, E1, E2, E3, F1, F2, F3, G1, G2, and H. In each grade above G the examiner should select the middle band by default, but may adjust the mark to an upper or lower band according to how securely the student's performance is thought to belong within the selected grade as opposed to the one above or below. For example, grade B ("conclusive attainment of virtually all ILOs ...") is subdivided into three bands: B1 denotes slightly more conclusive attainment than B2, and B3 slightly less conclusive attainment.

Grade A is subdivided into five bands – this on the advice of internal and external examiners who found that in practice three bands provided insufficient encouragement, either to use the middle band as default for work deserving an A grade, or to give appropriate recognition to work justifying something higher than the default band. The mechanisms for aggregating grades require scope for

discrimination at both ends of the scale, and the five bands in grade A complement the provision made for distinguishing levels of performance below the pass-fail line.

There is, in any event, a tradition in some marking schemes for a relatively wide range of possible scores to be mapped to the highest grade or class. The five bands acknowledge the difficulty of defining upper limits to the performance that an exceptionally able student might deliver. It should, however, be remembered that grade A is intended to recognise excellence. It should not be reserved for cases of absolute perfection, rather the question is whether the answer can be appropriately covered by the description in Schedule A to the Code of Assessment:

Exemplary range and depth of attainment of intended learning outcomes, secured by discriminating command of a comprehensive range of relevant materials and analyses, and by deployment of considered judgement relating to key issues, concepts and procedures.

Although band A1 is likely to be awarded infrequently, it should be achievable and awarded without hesitation if justified.

Schedule A summarises the grades, bands, and grade descriptors. These grade descriptors are inevitably generic, i.e., expressed in abstract terms applicable to any subject and to any course at any level. Each School is encouraged to develop more specific grade descriptors for its own courses, taking care to ensure that its specific grade descriptors are consistent with the generic ones. For example, a suitable grade A descriptor for an engineering design-and-build project might be "excellent design and construction, expertly deploying suitable technologies, together with a literate scientific report and a convincing demonstration".

The Student Guide *Understanding our Marking System* includes a listing of the characteristics that tend to distinguish work at different grades used under Schedule A.

Assessment of practical **competencies** is a prominent feature of some programmes (particularly Dentistry, Education, Medicine, Nursing, and Veterinary Medicine). Assessment here is a judgement of the extent to which each student has demonstrated the required competencies, using a simplified system of grades. This judgement is expressed in terms of a **grade**, which is A0, B0, C0, D0, E0, F0, G0 or H. The meanings of the grades are defined by verbal **grade descriptors**, which are set out in Schedule B. For instance, "exemplary and polished demonstration of the required skill(s) ..." should be awarded grade A0, while "efficient and confident display of the required skill(s) ..." should be awarded grade B0. Further down the scale, "presently inadequate independent performance of the required skill(s) ..." should be awarded grade F0.

On professional programmes, students are typically required to obtain at least grade D0 in each competency assessment.

2.2 Submission of Summative Assessment

2.2.1 Assessment (other than examinations): Penalties for late submission

§16.25 Deadlines for the submission of work which is to be formally assessed will be published in course documentation, and work which is submitted later than the deadline will be subject to penalty as set out below.

Where the work in question is a piece of independent work for which, in order to qualify for an honours degree, a minimum grade is prescribed, any late penalty will be discounted for the purpose of determining whether that prescription has been met.

§16.26 Except as modified by §16.27, the primary grade and secondary band awarded for work which is submitted after the published deadline will be calculated as follows:

a) In respect of work submitted not more than five working days after the deadline:

- i) the work will be assessed in the usual way, and the primary grade and secondary band so determined will then be reduced by two secondary bands for each working day (or part of a working day) the work was submitted late;
- ii) where work is submitted after feedback on that work (which may include grades) has already been provided to the student class, grade H will be awarded. Feedback may be provided to the

student class within five working days after the submission deadline in relation to no more than 25% by weight of a course's summative assessment.

b) Grade H will be awarded where work is submitted more than five working days after the deadline.

These provisions apply to all taught students and ensure that students following different courses are treated equally.

Error in online assessment submission: Where an online assessment submission is found to be incorrect, e.g. a blank document or a file that cannot be opened, it will be considered as not submitted. Staff are under no obligation to check submissions before marking but should take steps to alert students to any difficulties as soon as they are identified. Any corrected submission received after the assessment deadline will be subject to a late penalty in line with §16.26.

§16.26(a) refers to 'working days' so that in the calculation of penalties for late submission, Saturdays and Sundays are disregarded. For the purposes of the calculation, however, a 'part day' is rounded up to a whole day. Where work is submitted not more than five 'working days' after the relevant submission deadline, the penalty is calculated as two secondary bands for every day by which the submission is late. As the University's 'working days' are Monday to Friday, submission deadlines should not be set on a Saturday or Sunday.

Example 2.A

Dominic's essay is due in by 10 am on Monday but he does not submit it until 11 am the following day.

The essay is therefore one day plus one part day late, incurring a penalty of four secondary bands.

The essay is marked and, had it been on time, a grade of C1 would have been awarded.

The penalty reduces the grade to D2.

If Dominic had submitted the essay at 9.30 am on Tuesday, it would have been one part-day (i.e., less than 24 hours) late and would therefore have incurred a penalty of only two secondary bands, resulting in a grade of C3.

Example 2.B

Danielle has to submit a lab book for assessment by 4 pm on Friday but fails to deliver it until 10 am on the following Monday.

The assignment is, therefore, one part working day late (Saturday and Sunday are disregarded, as non-working days) incurring a penalty of two secondary bands.

The work is graded as B3 but the penalty reduces this to C2.

If work is submitted more than five days late it is graded as H.

Schools may prefer to avoid setting a submission deadline on a Friday so that students do not have the option of handing in work on the following Monday (three calendar days late) and being subject only to a one day penalty.

Sub-components of assessment are subject to penalties for late submission in the same manner as full assessment components – essentially a two secondary band deduction per day with a cut-off at five days after which the submission will receive a grade H. In cases where sub-components are marked in percentages, an equivalent reduction of 10% per day should be applied, with a cut-off at five days following which the grade awarded will be zero.

Example 2.C

Weekly exercises, which in total are worth 20% of the course assessment, are set in Moodle. The deadline each week for completion of the exercise is 5 pm on Monday and feedback is released at 12 pm on Wednesday. This quick return of feedback helps students to prepare for the following week's exercise. In week 3 Stewart does not submit his completed exercise until after 12 pm on

Wednesday. Whereas the normal position is that a reduced grade would be awarded for work submitted up to five days after the deadline, Stewart's grade for the week 3 exercise will be H.

Section 2.2 (a)(ii) of the Code allows up to 25% of a course's assessment to set a date for the return of feedback to students within five working days of the submission deadline.

Students are required to attain at least Grade D3 in the dissertation or similar independent work if they are to be awarded an Honours degree. If the dissertation is submitted late, and a penalty is imposed, that penalty will be ignored when determining whether the student has submitted a dissertation meeting the standard required for the award of an Honours degree. Thus, if the penalty has the effect of reducing the grade awarded for the dissertation below Grade D3, this will not in itself prevent the student from receiving an Honours degree. However, the penalty will apply to the student's grade point average, and as a result, possibly affect the class of degree awarded. *Example 2.D*

Duke submits his Honours dissertation two days late.

It is graded as C3 but the penalty of four secondary bands reduces this to E1.

Although this is below the minimum requirement for the award of an Honours degree, the requirement is deemed to have been met by virtue of the dissertation being awarded C3 before the penalty was applied.

In calculating Duke's grade point average, however, (see examples below) the dissertation will contribute 8 grade points rather than 12.

Note that this waiver only applies to Honours dissertations. On postgraduate taught programmes, in order to qualify for award of the degree students must achieve at least a grade D3 in a 60 credit dissertation or project. Any penalty applied for late submission will NOT be disregarded in relation to this requirement. The grade after application of any such penalty must be D3 or above.

Schedule B On some programmes submissions may be assessed under Schedule B (e.g. professional portfolios). In such cases, the way in which late penalties will be applied must be set out to students in advance in programme documentation.

When does an overdue submission becomes a **non-submission**? This is an important issue as non-submission of assessments affects the fulfilment of the requirements for course credit. The default position is that assessments will be counted as non-submissions if they have not been handed in by the time assessment feedback is presented to the rest of the cohort. However, course teams may make alternative arrangements and set non-submission deadlines differently. In such cases the alternative position should be stated in the course documentation to ensure that students are fully aware of the consequences of delaying submission. In the case of online assessment submissions, this may be managed through publication of the date after which the submission portal will have closed, meaning that no further submissions will be accepted after that date. §16.26 a) ii) also notes that in those cases where feedback is returned to the class quickly (not more than five working days after the submission deadline), if a student submits after feedback has been returned but still within five working days of the deadline, the work should be graded H rather than being treated as a non-submission.

2.2.2 Assessment (other than examinations): Deferral of deadlines

§16.27 A candidate who is unable to submit the assessment by the published deadline, or who anticipates being unable to so submit, may apply for a deferral of the deadline, or exemption from the penalties set out in §16.26 (a). Any such application will be considered in accordance with the following:

a) Where the actual or anticipated delay in submission is five working days¹ or less:

¹ For the purposes of this Code, Monday to Friday are counted as working days except when the University is closed for a public or other Holiday. Saturdays and Sundays are not counted as working days.

- i) The application will be submitted to,² and considered by, the person (normally the course convener) identified in course documentation as responsible for the assessment.³
- ii) The outcome of the application will be determined at the discretion of the person responsible for the assessment who will require to be satisfied that the candidate submitting the application has been prevented by circumstances beyond their control from submitting the relevant work on time.
- iii) Deferral of the submission deadline, or exemption from a late penalty, will be commensurate with the duration of the circumstances causing the late submission.⁴
- iv) Where the application is not submitted until after the deadline for submission of the work itself, relief from a late penalty will normally be granted only where the circumstances preventing the candidate from submitting work on time have also prevented application for a deferral of the deadline for submission.
- b) Where the actual or anticipated delay in submission is more than five working days the candidate shall apply for deferral of the submission deadline or exemption from penalties by making a claim in accordance with the procedures set out in §16.45 - §16.53 Incomplete Assessment resulting from Good Cause:
 - i) The application must be made by submission of a claim to MyCampus and must show that the delay in submission is the consequence of good cause as defined in §16.45(a) and must be supported by evidence as defined in §16.45(b).⁵
 - ii) The Head of School⁶ shall determine the outcome of such an application in consultation with the relevant Assessment Officer. The outcome shall be notified to the candidate as soon as reasonably practicable.
 - iii) In considering such applications:
 - the evidence provided by the candidate claiming good cause shall be scrutinised;
 - fairness to the individual candidate claiming good cause must be balanced with fairness to other candidates and the integrity of the assessment as a whole;
 - it shall be determined whether the requested deferral of submission deadline is justified by good cause.
 - iv) Where it is determined that the evidence presented supports the candidate's claim that they will be unable to submit the assessment in accordance with the published date, deferral of the submission deadline will be granted⁷ commensurate with the nature of the relevant circumstances.
 - v) Where it is determined that the evidence presented does not support the candidate's claim that they will be unable to submit the assessment in accordance with the published deadline, the

² Candidates will be advised of the process in operation locally for making such an application. [Footnote in the Code.]

³ In cases where candidates present sensitive personal information which they are reluctant to discuss with more than one or two members of staff, a member of staff should be given responsibility by the Head of School for ensuring that relevant information is passed to appropriate colleagues in order for extensions to be considered. [Footnote in the Code.]

⁴ Where in accordance with §16.26(a)(ii) feedback on assessed work is returned within five working days after the submission deadline, the limit to deferral of a candidate's submission deadline or exemption from late penalty will be the time at which feedback on the work is provided to the class. [Footnote in the Code.]

⁵ In the event that this facility is not available, the candidate should contact the Head of School directly. In cases where candidates present sensitive personal information which they are reluctant to discuss with more than one or two members of staff, a member of staff should be given responsibility by the Head of School for ensuring that relevant information is passed to appropriate colleagues in order for extensions to be considered. [Footnote in the Code.]

In addition to submitting a claim to MyCampus the candidate is also advised to alert a member of staff such as their Adviser of Studies/Advising Team or Assessment Officer to the claim in order that it may be considered promptly. [Footnote in the Code.]

⁶ The nominee of the Head of School with responsibility for considering such claims shall be indicated in the programme documentation. Such a nominee will typically be an Honours Convener, Head of Year, Programme Convener, or the holder of another similar senior role. [Footnote in the Code.]

⁷ A candidate wishing to apply for deferral of a submission deadline should submit a claim as soon as they become aware of the relevant circumstances. Where a claim is submitted shortly before the submission deadline it may not be possible for the candidate to be advised of the outcome of the claim before that deadline. [Footnote in the Code.]

candidate will be informed⁷ that the published deadline will apply and if the candidate fails to submit by the deadline late penalties will be imposed in accordance with §16.26.

A late submission penalty of up to 10 secondary bands may be waived – or a student may be permitted to submit work up to five working days after the published deadline – if the course convener (or other authorised person) is satisfied that the student has been prevented by circumstances beyond their control from submitting the work on time. When work is submitted after the due date without the student having previously requested an extension, the penalty will normally be waived only where the course convener is satisfied that the circumstances which prevented submission on time have also prevented the student applying for a later submission date.

The regulations require that deferral of a submission deadline should be commensurate with the duration of the relevant circumstances. Requests must therefore be considered on a case by case basis, and a five day deferral should not be regarded as a 'default' position.

Requests to submit work more than five working days after the published deadline must be handled in accordance with the Good Cause procedure set out at §16.46 – §16.48 (see Chapter 5 of this Guide). Students should request such an extension by submitting a Good Cause claim as soon as they become aware that an extension will be required, and should bring the claim to the attention of a member of staff such as Adviser of Studies or Assessment Officer to ensure that it is dealt with promptly. These claims should be determined by the Head of School or nominee and the Assessment Officer.

Extensions for undergraduate dissertations

Extensions claimed through Good Cause might only be slightly longer than five working days but they could also cover the situation where a significantly longer extension is necessary. One such situation is where a critical period in the student's preparation of their undergraduate dissertation is impacted by adverse personal circumstances or illness. While such disruption might in time only result in the need for an extension of a couple of weeks, it is also possible that the disruption is so significant that staff consider the most appropriate response to be an extension that allows the student to put on hold their work on the dissertation and return to it after completing the April/May assessment diet. While such a lengthy extension may be necessary, there are a number of factors that make it less than ideal: the fact that the student's graduation will be delayed from July to November/December; the possibility that availability of appropriate supervisory staff after the assessment diet is limited; the fact that a student might lose momentum with the dissertation, needing to return to it after the rest of their cohort have completed their studies. In light of these factors, there may be a period when adverse circumstances have come to light and staff wish to reserve judgment on the extension that will work in the student's best interests. Supportive discussions with the student at this time will be important. However, it is appropriate that a long extension should be confirmed as soon as the need for it has been agreed.

Students must complete their undergraduate dissertation prior to the end of their Senior Honours academic session. Where a long extension is granted for the undergraduate dissertation, the final submission deadline must be no later than the formal end of the academic session. If an extension beyond the end of the session is required, approval must be sought from the Clerk of Senate. Staff should be aware that approval would normally only be granted if it was deemed a reasonable adjustment made in light of a student's disability.

Note: In relation to the undergraduate honours dissertation, it is particularly important that students raise any difficulties in good time, allowing an extension to be granted where appropriate. The requirement for at least a D3 to be achieved in the dissertation cannot be set aside through a Good Cause claim. Similarly, a Good Cause claim for 'affected performance' cannot be made in relation to the dissertation. (In other words, a student who has submitted the dissertation cannot submit a Good Cause claim seeking an opportunity to resubmit at a later date.)

There is an overlap between the power to grant an extension for up to five working days and the Good Cause regulations. The basis for an application to defer the submission date for up to five days might be something which would be recognised as Good Cause, for example an illness preventing submission on the due date. However there will also be cases that might be considered

to merit a shorter extension but would not constitute Good Cause. (A specialist IT lab having been out of action for some days leading up to a submission deadline might be accepted to merit, say, a two-day extension but would not be accepted as Good Cause.) In such cases there must be a sound basis for granting an extension, and appropriate evidence will be required. Cases not involving Good Cause will, as the example cited indicates, involve some event or sequence of events which is outwith the control of the individual student.

2.2.3 Online Examinations and Late Submission

- 16.28 (a) Information regarding the format and submission timings of online examinations will be provided to candidates in advance of the relevant examination diet.
- b) It is the candidate's responsibility to ensure that the correct version of their online examination is submitted.
- c) In the event that a candidate does not submit by the end of the scheduled examination time⁸ the following will apply:
 - i) where a late submission window is available for the examination and the candidate submits within that window a late penalty will be applied: the submission will be graded H;
 - ii) where a late submission window is available and the candidate does not submit by the end of that window, the examination will be treated as a non-submission;
 - iii) where no late submission window is available the examination will be treated as a nonsubmission.

d)A candidate who is unable to submit an online examination by the end of the scheduled examination time due to good cause, as defined in §16.45(a) Incomplete Assessment resulting from Good Cause, may make an application under the procedures set out in §16.45 - §16.53:

- i) for a waiver of the late penalty described in §16.28 (c) (i); or
- ii) where in accordance with §16.28 (c) (ii) or (iii) the examination is treated as a non-submission, for the outcome described in §16.50 to be applied.

Different categories of exam have different scheduled exam times. These will be stated when the exam timetable is published. Any exam submitted after the end of the scheduled exam time will be 'LATE' and will be graded 'H' (zero grade points). Examples of the different categories of exams and their scheduled timings are given in the Appendix.

§16.28 (b) states that it is the student's responsibility to submit the correct version of their answers:

- A blank or unreadable submission will be graded 'H'.
- The same will apply where the student fails to follow the instructions on uploading their answers (e.g. providing a link to a SharePoint site rather than uploading a file).
- A submission that the student subsequently claims was a draft or incorrect version will still be the version that is marked.
- For exams where it is possible to make more than one submission, the final submission will be taken as the student's attempt and will be marked. If the final submission is late, the exam submission will be counted as late (earlier submissions cannot be counted even if they were submitted before the end of the scheduled exam time). In an exam which includes different parts which are submitted separately, the final submission of each part is the one that will be marked. Exam instructions will indicate whether it is possible to make more than one submission.

Late submissions

Students are responsible for monitoring and managing the time scheduled for an exam. For most online exams it will be possible to submit late, but there is some variation in how this works. For each exam, the exam front page will explain the situation for that exam. A submission received after the end of the scheduled exam time will be regarded as late. For most online timed exams, the

⁸ Illustrations of the different formats of online examinations and their submission windows are given in the Guide to the Code of Assessment. [Footnote in the Code.]

scheduled exam time will include a specified period of time to complete the exam and then a further 30 minutes for the upload of answer file(s).⁹

For example, for a 'two hour' exam students will have two hours for completion of the exam and an additional 30 minutes for the upload of answers, i.e. the 'scheduled exam time' is a total of two and a half hours. For students who have been assessed by the Disability Service as requiring extra time, the scheduled exam time will be increased by the appropriate amount (see examples in the Appendix).

For most online exams, technically it will be possible for students to make a late submission in Moodle up to two hours after the end of the scheduled exam time. After two hours, submission will not be possible and the exam will be treated as a non-submission.

A late submission will be graded 'H'. This means it will carry zero grade points but will be treated as a 'submission' for the purposes of the award of credit. A submission received immediately after the end of the scheduled exam time will be treated in the same way as one submitted up to two hours late.

Exceptions

- 1. Timed exam within 24 hours, where the student is required to upload their completed answers. At the end of each student's scheduled exam time Moodle will 'auto-submit' the uploaded file(s). Students will have no further access to the exam and will no longer be able to submit their completed answers to Moodle. In order to facilitate a 'late period', students who have not submitted their completed answers by the end of the scheduled exam time will be able to submit by e-mailing their file(s) to the School in accordance with instructions on the front sheet of the exam. Submissions made direct to the School in the two hours following the end of the scheduled exam duration will be treated as 'late' and graded 'H'. Any submissions made after this time will be treated as a non-submission.
- 2. Any online exams where answers are input directly into Moodle by the student (as opposed to online exams where students are required to upload their own document(s) once their answers are complete). The sorts of exams where this will apply include:
 - multiple choice papers, where students answer in Moodle by selecting an answer using a radio button; and
 - o short answer papers, where students enter a short answer into text boxes in Moodle.

On these exams, no period for late submission will be available. Moodle will save all answers as they are input by the student, and at the end of the scheduled exam time Moodle will 'auto-submit' all saved answers. (Alternatively, students have the option to confirm submission within the scheduled exam time as soon as their answers are complete.) After the end of the scheduled exam time, students will have no further access to the exam. In the event that the student has completed no answers within the scheduled exam time, the exam will be treated as a non-submission.

Request to have 'late' grade 'H' waived

Where an exam is submitted late and the student has been prevented from submitting on time, they may submit a Good Cause claim in MyCampus within five working days of the exam. (Any submission to Moodle received after the end of the scheduled exam time will be flagged to the student as having been submitted late. Students should check their email folders including 'Junk email'.) For the claim to be accepted, the student must show that they were prevented by illness or other adverse circumstances beyond their control from submitting the exam on time. If the Good Cause claim is accepted the submission will not be graded 'H' but will be marked as normal.

⁹ 30 minutes is the standard upload time for exams with five or fewer answer files. Where, exceptionally, an exam has more than five answer files staff should determine the time required for students to successfully upload the number and type of files, and this time will be clearly indicated on the exam front page.

Good Cause for non-submissions

A non-submission is where the student does not attempt the exam or does not attempt to submit until after the end of the 'late' period (where a late period is available). This is important because the award of credit depends on enough assessment being submitted for the course or the programme as a whole. In the event that a student has been unable to submit the exam, due to illness or other adverse circumstances beyond their control, they may submit a Good Cause claim in MyCampus within five working days of the exam. If the Good Cause claim is accepted, the most common outcome is that the assessment will need to be completed at a later date. This will usually be at the resit diet, which takes place during the summer vacation. In some cases (e.g. in the final year of some honours or integrated masters programmes), some assessment missed with Good Cause may be disregarded.

Technical difficulties experienced while taking an online exam

A student who experiences technical difficulties with accessing, completing, checking or submitting an exam are advised to immediately contact the IT Helpdesk, using the contact details provided on the exam front page. (In the event of submitting a Good Cause claim for late or non-submission due to technical issues, students could support their claim with reference to an IT Helpdesk Incident number, if they have logged the issue with the IT Helpdesk.)

2.3 Aggregation of assessment across a course

§16.29 Where the assessment scheme of a specific course or programme requires aggregation across two or more components to obtain an overall outcome, the grade points set out in Schedule A and Schedule B shall be employed.

§16.30 Aggregation to establish a result for a course shall require the computation of the mean of the relevant grade points achieved in the component assessments. In computing the mean, 0 [zero] grade points shall be applied to non-submissions. All assessment components which are summative must be included and where appropriate the computation shall employ weights as specified in the course documentation.

§16.31 In order to determine the overall grade to be reported for a course the following shall apply:

- a) For a course where Schedule A is employed in relation to 50% or more by weight of the course's assessment, the mean of the relevant grade points calculated in accordance with §16.30 shall be rounded to an integer value.¹⁰ The result for the course shall be reported as the primary grade and secondary band equivalent to that integer shown in Schedule A.
- b) For a course where Schedule B is employed in relation to more than 50% by weight of the course's assessment, the mean of the relevant grade points calculated in accordance with §16.30 shall not be rounded and the result for the course shall be reported as the grade shown in Schedule B that has the range in which the mean of grade points lies.

§16.32 The grade points associated with the reported course grade shall be carried forward to subsequent aggregation required to determine the programme award (See §16.34 - §16.39.)

Most courses include two or more assessments. Results for the components of assessment must be **aggregated** to determine a student's result for the course as a whole. For each assessment component, the grade awarded maps onto a grade point number (an integer) (Table 2.1) and these grade points are used to aggregate the results. The course's assessment scheme specifies the weightings of the components of assessment.

¹⁰ A grade point mean should be rounded in accordance with the following example: 15.5 and all higher values less than 16.5 should become 16. [Footnote in the Code.]

Schedule A	Grade points	Schedule B	Grade points	Schedule A	Grade points	Schedule B	Grade points
A1	22	A0	22	D1	11	D0	11
A2	21			D2	10		
A3	20			D3	9		
A4	19			E1	8	E0	8
A5	18			E2	7		
B1	17	B0	17	E3	6		
B2	16			F1	5	F0	5
B3	15			F2	4		
C1	14	C0	14	F3	3		
C2	13			G1	2	G0	2
C3	12			G2	1		
				Н	0	Н	0

Table 2.1 Grades and equivalent grade points (taken from Schedules A and B)

As shown in the examples below, the method of calculating the final result for the course depends on whether grades under Schedule A or Schedule B or a combination of both are used.

2.3.1 Courses assessed only under Schedule A

Example 2.E

A course has two in-course assessments each weighted 12.5% and an end-of-course examination weighted 75%. Ayesha's results in these assessments are D1 and C3, and B1, respectively. Her course result will be calculated as follows:

course result= $(0.125 \times D1) + (0.125 \times C3) + (0.75 \times B1)$ = $(0.125 \times 11) + (0125 \times 12) + (0.75 \times 17)$ (from Schedule A) = 1.375 + 1.5 + 12.75= 15.625 ≈ 16 (rounded to an integer) = B2 (from Schedule A)

Bert's results in the same assessments are D3 and C2, and D2, respectively. His course result will be calculated as follows:

course result= $(0.125 \times D3) + (0.125 \times C2) + (0.75 \times D2)$ = $(0.125 \times 9) + (0.125 \times 13) + (0.75 \times 10)$ (from Schedule A)= 1.125 + 1.625 + 7.5= 10.25 ≈ 10 (rounded to an integer)= D2(from Schedule A)

Percentage marking is permissible in some courses (particularly in the Sciences and Engineering) but only where it is feasible to set assessment tasks that can be marked objectively and consistently for all students. In this case, a **conversion scheme** must be employed to translate percentage marks to bands. The conversion scheme should be constructed by each Board of Examiners with reference to the design of these assessment tasks and their relation to ILOs. The scheme need not necessarily be linear (with ranges of equal length mapped to each band), but should be driven by the verbal descriptors associated with the grades in Schedule A. There is therefore no single

conversion scheme determined by the Code of Assessment, but each Board of Examiners must approve a scheme appropriate to the courses being assessed.

Example 2.F

For a course in which there is a single in-course assessment weighted 30% and an end-of-course examination weighted 70%, both marked in percentages. The illustrative conversion scheme shown in Table 2.2 is used for both assessments.

Carron's results in this course are 65% and 42%, respectively.

As required by §16.24 of the Code, the result for each assessment must be converted to an alphanumeric grade before aggregating to establish the overall course result. Referring to Table 2.2, the in-course assessment result of 65% will be recorded as a B2 and the examination result of 42% as a D3.

However, these are only provisional results. The Code of Assessment requires that the conversion scheme is "determined by the Board of Examiners as appropriate for the assessment in question and subordinate to the relevant grade descriptors". After reviewing the assessment and the students' marks profiles for the exam the Board of Examiners could decide, for example, that exam marks in the range 49–58% (rather than 50–59%) actually demonstrate "clear attainment of most of the ILOs", as required for grade C. Consequently, the Board of Examiners would promote any students who had achieved 49% in the exam from D1 to C3 for that exam.

Assuming that the Board ratifies Carron's marks of B2 and D3, her course result will be calculated as follows:

course result= $(0.3 \times B2) + (0.7 \times D3)$

= (0.3 x 16) + (0.7 x 9) = 4.8 + 6.3 = 11.1 ≈ 11 = D1

(rounded to an integer) (from Schedule A)

(from Table 2.2)

D1 is Carron's overall result for the course.

Percentage	0–9%	10–14%	15–19%	20–23%	24–26%	27–29%
Band	Н	G2	G1	F3	F2	F1
Percentage	30–33%	34–36%	37–39%	40–43%	44–46%	47–49%
Band	E3	E2	E1	D3	D2	D1
Percentage	50–53%	54–56%	57–59%	60–63%	64–66%	67–69%
Band	C3	C2	C1	B3	B2	B1
Percentage	70–73%	74–78%	79–84%	85–91%	92–100%	
Band	A5	A4	A3	A2	A1	

Table 2.2 An illustrative conversion scheme for percentage marking.

2.3.2 Courses assessed only under Schedule B

§16.31 b) For a course where Schedule B is employed in relation to more than 50% by weight of the course's assessment, the mean of the relevant grade points calculated in accordance with §16.30 shall not be rounded and the result for the course shall be reported as the grade shown in Schedule B that has the range in which the mean of grade points lies.

Example 2.G

Fatima takes a course with two assessed components, a portfolio submission (weighted at 65%) and a practical presentation (weighted 35%), both assessed under Schedule B.

She achieves a grade of B0 for the portfolio and a grade of D0 for the presentation. Her course result will be calculated as follows:

Course result =
$$(0.65 \times B0) + (0.35 \times D0)$$

= $(0.65 \times 17) + (0.35 \times 11)$
= $11.05 + 3.85$
= 14.9
= $C0$ (from Schedule B)

No rounding is applied to the aggregated value. It falls within the range 12–<15 which equates to grade C0 on Schedule B, so Fatima's overall course result is C0.

2.3.3 Courses using component grades from Schedule A and Schedule B

§16.31 In order to determine the overall grade to be reported for a course the following shall apply:

- a) For a course where Schedule A is employed in relation to 50% or more by weight of the course's assessment, the mean of the relevant grade points calculated in accordance with §16.30 shall be rounded to an integer value.¹¹ The result for the course shall be reported as the primary grade and secondary band equivalent to that integer shown in Schedule A.
- b) For a course where Schedule B is employed in relation to more than 50% by weight of the course's assessment, the mean of the relevant grade points calculated in accordance with §16.30 shall not be rounded and the result for the course shall be reported as the grade shown in Schedule B that has the range in which the mean of grade points lies.

Example 2.H

Gary takes a course with three assessed components, an exam (weighted 40%), an essay (40%) and a presentation (20%). The exam and essay are assessed using Schedule A and the presentation using Schedule B. Gary achieves D2 in the exam, B2 in the essay and C0 in the presentation. His course result is calculated as follows:

Course result = $(0.4 \times D2) + (0.4 \times B2) + (0.2 \times C0)$ = $(0.4 \times 10) + (0.4 \times 16) + (0.2 \times 14)$ = 4 + 6.8 + 2.8= 13.2 ≈ 13 (rounded to an integer) = C2 (from Schedule A)

As 50% or more of the course assessment is conducted under Schedule A, the grade point value of 13.2 is rounded to the nearest integer, which is 13, giving an overall course result of C2.

Example 2.1

Johanna takes a course with two components, an in-course test (weighted 35%) and a group project (weighted 65%). The test is assessed under Schedule A and she achieves E2, and the project is assessed under Schedule B and she achieves C0.

Course result = $(0.35 \times E2) + (0.65 \times C0)$ = $(0.35 \times 7) + (0.65 \times 14)$ = 2.45 + 9.1= 11.55

As more than 50% of the course assessment is conducted under Schedule B, the final course grade is awarded under Schedule B, and 11.55 falls within the range 9–<12 which equates to grade D0 on Schedule B, so Johanna's overall course result is D0.

¹¹ A grade point mean should be rounded in accordance with the following example: 15.5 and all higher values less than 16.5 should become 16. [Footnote in the Code.]

2.4 Aggregation across a programme

§16.33 Where there is provision for assessment to be split between examination diets, a Board of Examiners shall determine and report the results for the individual courses of the programme after each intermediate diet and the overall award after the final diet.

Provisional results should be released to students as soon as they are available but must be ratified by a Board of Examiners after each diet. In most cases, this means that there should be formal meetings of the Board of Examiners after semester 1 as well as after semester 2.

§16.34 A candidate's grade point average over a set of courses is the weighted sum of the grade points achieved by the candidate in these courses. The grade point average shall be calculated by taking the product of each course's weight and the candidate's grade points, and dividing the sum of these products by the sum of the courses' weights. The weights shall correspond to the courses' credit ratings unless specified otherwise in the relevant programme documentation. The grade point average shall be expressed to one decimal place.

The following sections describe how to calculate the relevant grade point average required for different types of awards: ordinary/designated degree; honours/integrated masters degree; and postgraduate taught masters degree. (It is important to ensure that the correct credits and weightings are applied in these calculations. Some GPA values are displayed in MyCampus but as these are calculated automatically in the system, they may not take account of the relevant credits or weightings, and caution should therefore be exercised in the way that any such values are used.)

An **ordinary** or **designated** degree programme consists of courses totalling at least 360 credits, including at least 60 credits at level 3. To be eligible for the award of an ordinary or designated degree, a student must meet both generic (University-wide) requirements and additional degree-specific requirements.

The first generic requirement¹² is a grade-point average (GPA) of at least 9.0. For each course completed by the student, their grade is converted to the number as shown in Schedules A and B of the Code of Assessment, and that number is multiplied by the course's credit value to determine the number of grade points the student has earned in that course. The student's GPA is determined by adding up their total grade points and dividing by their total number of credits.

Another generic requirement is that at least 280 of the credits must be at grade A–D, and these must include at least 60 credits at level 3.

Example 2.J

Darren has completed:

seven level 1 / 2 courses, each worth 40 credits (with results A3, B2, A5, C1, B1, B3, E2),

one level 3 course worth 20 credits (with result E3)

a level 3 project worth 60 credits (with result D3) (All courses assessed under Schedule A)

His GPA is calculated as

(40×A3 + 40×B2 + 40×A5 + 40×C1 + 40×B1 + 40×B3 + 40×E2 + 20×E3 + 60×D3) / 360

Substitute grade point values from Schedule A

= (40×20 + 40×16 + 40×18 + 40×14 + 40×17 + 40×15 + 40×7 + 20×6 + 60×9) / 360

- = 4940 / 360
- = 13.72222

The result is rounded to one decimal place (§16.34 CoA), thus Darren's GPA is:

= 13.7

¹² This is expressed in the generic undergraduate degree regulations.

Darren has comfortably exceeded the minimum GPA of 9.0. He has 300 credits at grade A–D, and these include 60 credits at level 3. Therefore he qualifies for an ordinary degree (provided that he has also satisfied any degree-specific requirements).

2.5 Aggregation across an Honours or integrated masters programme

- §16.36 a) There shall be four classes of honours: first, upper second, lower second and third. A candidate who is not placed in one of the four classes shall have failed the honours programme. (This shall not prevent the award of an unclassified honours degree within the terms of regulation §16.52(d)(i)).
- §16.37 a) The weighting of courses for the calculation of an honours classification for an undergraduate honours degree should normally follow the credit weighting of those courses in the third and fourth years of the honours programme. Any departure from these weightings must be set out in the programme specification.
 - b) The weighting of assessments for the calculation of an honours classification for an integrated Masters degree should normally give weight to the third, fourth, and fifth years of the programme, with the assessment in the fifth year counting for at least 50% of the calculation. These weightings must be set out in the programme specification, and should normally fall within the range of 10:20:70 to 20:30:50.
 - c) Where the grade point average (as determined in §16.34 and §16.37 (a) and (b) falls within one of the following ranges, the Board of Examiners shall award the classification stated:

17.5 to 22.0	First class honours
14.5 to 17.0	Upper second class honours
11.5 to 14.0	Lower second class honours
8.5 to 11.0	Third class honours
0.0 to 8.0	Fail

d) Where the grade point average falls between two of the ranges defined in §16.37(c), the classification to be awarded by the Board of Examiners will be determined by the weighted profile of the course grades contributing to the honours classification. The course grade profile must be weighted to reflect the relative credit weightings of the courses and the relative weightings given to the different years of the programme (as referred to in §16.37 (a) and (b)).¹³ The classifications awarded in the following grade point average ranges will be:

17.1 to 17.4	First class honours: where at least 50% of the weighted course grade profile comprises A grades
	Upper second class honours: where less than 50% of the weighted course grade profile comprises A grades
14.1 to 14.4	Upper second class honours: where at least 50% of the weighted course grade profile comprises B grades or above
	Lower second class honours: where less than 50% of the weighted course grade profile comprises grades of B or above
11.1 to 11.4	Lower second class honours: where at least 50% of the weighted course grade profile comprises grades of C or above
	Third class honours: where less than 50% of the weighted course grade profile comprises grades of C or above
8.1 to 8.4	Third class honours: where at least 50% of the weighted course grade profile comprises grades of D or above
	Fail: where less than 50% of the weighted course grade profile comprises grades of D or above.

¹³ Illustrations of weighted course grade profiles are given in the Guide to the Code of Assessment. [Footnote in the Code.]

An **Honours** programme is four years long, but only courses taken in the 3^{rd} year (Junior Honours) and 4^{th} year (Senior Honours) count towards the final award. The programme's assessment scheme must specify the weighting of each Junior and Senior Honours course. Each student's course results are aggregated, using these weightings, and the resulting score – the grade point average or GPA – is used to determine the final award. The final GPA is calculated to one decimal place.

Usually the course weightings within each year correspond to their credit values and the Junior Honours and Senior Honours years are equally weighted. On some programmes, where a case has been made, the Senior Honours year as a whole may be weighted more than the Junior Honours year as a whole.

Note: As a result of a change introduced in 2021-22, the award of Honours classifications can no longer be determined by the exercise of Exam Board discretion.

In a **Single Honours** programme, courses are usually in a single subject. Aggregation is straightforward.

Example 2.K

A Single Honours programme in which the Junior and Senior Honours years are weighted 40:60. Within each year, the courses are weighted according to their credit values.

Eliza has completed four 30-credit Junior Honours courses (with results B2, B3, C0 [course assessed under Schedule B], C2), followed by two 30-credit Senior Honours courses (with results C2, E3) and a 60-credit Senior Honours dissertation (with result D1). Her Honours GPA is calculated as follows:

Junior Honours	$= ({}^{30}/_{120} \times B2) + ({}^{30}/_{120} \times B3) + ({}^{30}/_{120} \times C0) + ({}^{30}/_{120} \times C0)$	⊢ (³⁰ / ₁₂₀ ×C2)
	$=({}^{30}/_{120}\times16)+({}^{30}/_{120}\times15)+({}^{30}/_{120}\times14)+$	$(^{30}/_{120} \times 13)$ (from Schedules of
		Assessment)
	= 14.5	(unrounded)
Senior Honours	$= ({}^{30}/_{120} \times C2) + ({}^{30}/_{120} \times E3) + ({}^{60}/_{120} \times D1)$	
	$= ({}^{30}/_{120} \times 13) + ({}^{30}/_{120} \times 6) + ({}^{60}/_{120} \times 11)$	
	= 10.25	(unrounded)
Honours GPA	= (0.4×14.5) + (0.6×10.25)	
	= 11.95	
	≈ 12.0	(rounded to 1 decimal place)

Eliza's Honours GPA lies within the range 11.5 - 14.0, so the Board of Examiners will award her a lower second class Honours degree.

In the same Single Honours programme, Felipe has a Junior Honours GPA of 16.9 and a Senior Honours GPA of 18.15. His overall Honours GPA is calculated as follows:

Honours GPA = (0.4×16.9) + (0.6×18.15) = 17.65 ≈ 17.7

(rounded to 1 decimal place)

Felipe's Honours GPA lies within the range 17.5 – 22.0, so the Board of Examiners will award him a first class Honours degree.

In a **Joint Honours** programme, each year is divided between two subjects. Aggregation is carried out as above for each subject separately. The two subject GPAs are then aggregated and usually weighted 50:50.

Example 2.L

A Joint Honours programme in subjects X and Y. In subject X the Junior and Senior Honours years are weighted 40:60. In subject Y the Junior and Senior Honours years are weighted 50:50. The two subjects are weighted 50:50.

Gert has Junior and Senior Honours GPAs of 16.0 and 16.75 in subject X, and GPAs of 14.1 and 13.275 in subject Y. His Joint Honours GPA is calculated as follows:

X Honours	= (0.4 × 16.0) + (0.6 × 16.75) = 16.45	(unrounded)
Y Honours	= (0.5 × 14.1) + (0.5 × 13.275) = 13.6875	(unrounded)
Joint Honours GPA	= (0.5 × 16.45) + (0.5 × 13.6875) = 15.06875 ≈ 15.1	(rounded to 1 decimal place)

Gert's Joint Honours GPA lies within the range 14.5 – 17.0, so the Board of Examiners will award him an upper second class Honours degree. Note that his individual subject GPAs correspond to upper and lower second class, respectively, but only the joint GPA matters.

An **integrated masters** programme is five years long, where the 3rd, 4th, and 5th years count towards the final award.

Example 2.M

An integrated masters programme in which the 3rd, 4th, and 5th years are weighted 20:30:50. Within each year, the courses are weighted according to their credit values.

Hilda has a 3rd year GPA of 18.25, a 4th year GPA of 15.7, and a 5th year GPA of 16.15. Her overall masters GPA is calculated as follows:

Integrated masters GPA = $(0.2 \times 18.25) + (0.3 \times 15.7) + (0.5 \times 16.15)$ = 3.65 + 4.71 + 8.075= 16.435 ≈ 16.4 (rounded to 1 decimal place)

Hilda's final GPA lies within the range 14.5 - 17.0, so the Board of Examiners will award her an upper second class integrated masters degree.

Grade profile

As stated in (16.37), where the final GPA lies in the following ranges, the classification will be determined by the student's weighted course grade profile: 17.1 - 17.4; 14.1 - 14.4; 11.1 - 11.4; 8.1 - 8.4.

Example 2.N

An Honours programme with JH : SH weighting of 40 : 60

In this case Yifan has a programme GPA of 14.3 so will be awarded a 2.1 if he has a weighted course grade profile with at least 50% of course grades at B or above.

Course grades achieved:

JH	Course grades of B or higher	Course grades below B	SH	Course grades at B or higher	Course grades below B
Course 1 (20 credits)	B3		Course 6 (15 credits)		C1
Course 2		D1	Course 7		C3

(20 credits)			(15 credits)			
Course 3	B3		Course 8	A5		
(20 credits)			(15 credits)			
Course 4		D2	Course 9		C1	
(30 credits)			(15 credits)			
Course 5		C2	Course 10	B2		
(30 credits)			(40 credits)			
			Course 11	B1		
			(20 credits)			
Total credits	40	80		75	45	
JH		120	SH		120	
					Honours	240
					programme	

Proportion of weighted grade profile comprised of grades B or above:

= [<u>No. of JH credits >= B</u> x JH weighting] + [<u>No. of SH credits >= B</u> x SH weighting]

120

$$= [\frac{40}{120} \times 0.4] + [\frac{75}{120} \times 0.6]$$

The weighted grade profile has 51% of course grades at B or above so Yifan qualifies for an upper second class honours degree. This is despite the fact that the actual grade profile has 115 out of the 240 credits at grade B or above, i.e. less than 50%.

2.6 Aggregation across a taught postgraduate programme

§16.39 The regulations of each award shall state:

- a) the minimum grade point average required for the award;
- b) the minimum grade required in any component or components of the programme, and such limitations on the permitted extent of compensation of performance below such minimum;
- c) the minimum grade point average and any other criteria, required for identified categories of the award such as with Merit or Distinction.

Most **taught postgraduate** programmes consist of taught courses and a dissertation or project, totalling 180 credits. Typically the taught courses are worth 120 credits and the dissertation or project 60 credits. Each student's results in the taught courses are aggregated to determine whether they are eligible to progress to the dissertation or project, or are eligible to be awarded the Postgraduate Diploma (PgDip). Most taught postgraduate programmes are covered by generic (University-wide) regulations and the rest have their own programme-specific regulations.

The requirements for award of the Masters degree are expressed in the generic PGT regulations (rather than in the Code of Assessment) and are as follows:

§9.1 A candidate will be eligible for the award of the degree on obtaining a grade point average⁵ of at least 12.0 in the taught courses described in §4, with at least 75% of these credits at grade D3 or above, and all credits at grade F3 or above, and obtaining a grade D3 or above in the substantial independent work.

Example 2.0

A taught postgraduate programme consisting of taught courses totalling 120 credits followed by a dissertation worth 60 credits. The courses are weighted according to their credit values.

Jana has completed four 20-credit courses (with results B2, A3, D2, C3) and a 40-credit course (with result D1) (all course results taken from Schedule A). Her grade point average for the taught courses is calculated as follows:

taught GPA =
$$\binom{20}{120} \times B2$$
 + $\binom{20}{120} \times A3$ + $\binom{20}{120} \times D2$ + $\binom{20}{120} \times C3$ + $\binom{40}{120} \times D1$)
= $\binom{20}{120} \times 16$ + $\binom{20}{120} \times 20$ + $\binom{20}{120} \times 10$ + $\binom{20}{120} \times 12$ + $\binom{40}{120} \times 11$ (from Schedule A)
= 13.33333
 ≈ 13.3 (rounded to one decimal place)

Jana is eligible to progress, or to be awarded the PgDip if she prefers. If she chooses to progress, and subsequently achieves at least grade D3 in the dissertation, she will be awarded the masters dearee.

In the same programme, Kurt has completed four 20-credit courses (with results D2, B3, E3, E1) and a 40-credit course (with result D3). His taught courses grade point average is calculated as follows:

 $= ({}^{20}/_{120} \times D2) + ({}^{20}/_{120} \times B3) + ({}^{20}/_{120} \times E3) + ({}^{20}/_{120} \times E1) + ({}^{40}/_{120} \times D3)$ taught GPA $= \binom{20}{120} \times 10 + \binom{20}{120} \times 15 + \binom{20}{120} \times 6 + \binom{20}{120} \times 8 + \binom{40}{120} \times 9$ (from Schedule A) = 9.49999≈ 9.5

(rounded to one decimal place)

Ignoring for the present the possibility that he improves his performance at resit (see Chapter 3 of this Guide) Kurt is not eligible to progress. However, he is eligible to be awarded the PgDip, since his GPA for the taught courses exceeds 9.0 and he has 80 credits at grade A-D.

On taught postgraduate programmes the degree may be awarded with Merit or with Distinction.

In the generic PGT regulations the requirements for these classifications are expressed as follows:

§9.3 A candidate will be eligible for the award of Merit on achieving at the first attempt:

- a) a grade point average of at least 14.5 in the 180 or more credits completed on the programme; and
- b) a grade point average of at least 14.0 in the taught courses; and
- c) a grade of C1 or above in the substantial independent work.
- §9.5 A candidate will be eligible for the award of Distinction on achieving at the first attempt:
 - a) a grade point average of at least 17.5 in the 180 or more credits completed on the programme; and
 - b) a grade point average of at least 17.0 in the taught courses; and
 - c) a grade of B1 or above in the substantial independent work.

Where the overall programme GPA (combining taught courses GPA and the dissertation/project grade) falls into the ranges 14.1 - 14.4 and 17.1 - 17.4 the classification is determined by overall course grade profile:

- §9.2 §9.4 and §9.6 refer to the 'weighted course grade profile'. This means the profile of course grades obtained across the 180 or more credits completed on the programme at the first attempt and weighted to reflect the relative credit weightings of the courses.¹⁴
- §9.4 Where a candidate has satisfied the requirements set out at §9.3 (b) and (c), and their grade point average for the 180 or more credits completed on the programme at the first attempt falls within the range 14.1 to 14.4 the Board of Examiners shall make the award with Merit where at least 50% of the weighted course grade profile comprises grades of B or above.
- §9.6 Where a candidate has satisfied the requirements set out at §9.5 (b) and (c), and their grade point average for the 180 or more credits completed on the programme at the first attempt falls within the range 17.1 to 17.4 the Board of Examiners shall make the award with Distinction where at least 50% of the weighted course grade profile comprises A grades.

For programmes governed by other degree regulations, the specific requirements for award of Merit and Distinction will be set out in those regulations.

¹⁴ Illustrations of weighted grade profiles are given in the Guide to the Code of Assessment. [Footnote in the Code.]

Example 2.P

In this example Catriona has an overall programme GPA of 17.4, a taught courses GPA of 17.6 and a project course grade of B1. She will be eligible for the award of Distinction if she has a weighted course grade profile where at least 50% of course grades are at grade A.

In considering the weighted grade profile, all course results are used, including the dissertation/project, and the credit weighting of the various courses is taken into account.

	Course grades at A	Course grades
Course 1 (20 credits)	A4	
Course 2 (20 credits)		C1
Course 3 (20 credits)	A3	
Course 4 (30 credits)		B1
Course 5 (15 credits)	A5	
Course 6 (15 credits)	A5	
Course 7 - Project (60 credits)		B1
Total credits	70	110

The grade profile has 70 out of 180 credits at course grades of A, i.e. less than 50%, so Catriona qualifies for award of the degree with Merit, not Distinction.

2.7 Aggregation across a professional programme (BDS, BVMS, MBChB)

- §16.38 a) There shall be three categories of award: honours, commendation and pass. A candidate who is not placed in one of the three categories shall have failed the programme.
 - b) The regulations of each award shall state the requirements for the award and for the individual categories of award.

These **professional** programmes are five years long, typically highly integrated, and invariably require students to demonstrate a number of practical competencies in order to show fitness to practise.

The regulations for a particular professional programme may require aggregation of a student's results over the whole programme, or over the last few years of the programme, in order to classify the degree award, and details will be set out in the programme documentation. Students should be reminded, however, that the award of the degree does not depend only on any such aggregation but also on satisfying all the relevant component requirements at each stage. This will include achieving satisfactory performance for clinical competencies as well as in written examinations.

2.8 Abolition of Exam Board Discretion when determining final Honours degree classifications, and the awards of Merit and Distinction on postgraduate taught programmes

Prior to session 2021-22, Boards of Examiners were permitted to exercise discretion in determining the final awards in borderline cases for Honours degrees and taught Masters degrees. All such awards must now be determined solely by the rules described in sections 2.5 and 2.6 above. There is no scope for Exam Boards to apply any additional or alternative criteria.

	SCHEDULE A					
Primary Grade	Gloss	Secondary Band*	Grade Point	Primary Verbal Descriptors for Attainment of Intended Learning Outcomes		
А	Excellent	A1	22	Exemplary range and depth of attainment of intended learning outcomes, secured by discriminating command of		
		A2	21	a comprehensive range of relevant materials and analyses, and by deployment of considered judgement relating		
		A3	20	to key issues, concepts and procedures		
		A4	19			
		A5	18			
В	Very Good	B1	17	Conclusive attainment of virtually all intended learning outcomes, clearly grounded on a close familiarity with a wide		
		B2	16	range of supporting evidence, constructively utilised to reveal appreciable depth of understanding		
		B3	15			
С	Good	C1	14	Clear attainment of most of the intended learning outcomes, some more securely grasped than others, resting on		
		C2	13	a circumscribed range of evidence and displaying a variable depth of understanding		
		C3	12			
D	Satisfactory [†]	D1	11	Acceptable attainment of intended learning outcomes, displaying a qualified familiarity with a minimally sufficient		
		D2	10	range of relevant materials, and a grasp of the analytical issues and concepts which is generally reasonable, albeit		
		D3	9	insecure		
E	Weak	E1	8	Attainment deficient in respect of specific intended learning outcomes, with mixed evidence as to the depth of		
		E2	7	knowledge and weak deployment of arguments or deficient manipulations		
		E3	6			
F	Poor	F1	5	Attainment of intended learning outcomes appreciably deficient in critical respects, lacking secure basis in relevant		
		F2	4	factual and analytical dimensions		
		F3	3			
G	Very Poor	G1	2	Attainment of intended learning outcomes markedly deficient in respect of nearly all intended learning outcomes.		
		G2	1	with irrelevant use of materials and incomplete and flawed explanation		
H			0	No convincing evidence of attainment of intended learning outcomes, such treatment of the subject as is in evidence being directionless and fragmentary		
CR	R CREDIT REFUSED			Failure to comply, in the absence of good cause, with the published requirements of the course or programme; and/or a serious breach of regulations		

* The Secondary Band indicates the degree to which the work possesses the quality of the corresponding descriptor.

[†] This gloss is used because it is the lowest grade normally associated with the attainment of an undergraduate award. Undergraduate students should be aware that progress to most honours programmes require a grade above D in certain courses. Postgraduate students should be aware that on most programmes an average above D in taught courses is required for progress to the dissertation at Masters level. Students should consult the appropriate degree regulations and course documentation for the grades they require to progress to specific awards.

Where, exceptionally, an Exam Board is unable to confirm the result, e.g. as some information is missing at the time of the Board meeting, '7' should be returned as a temporary grade.

				SCHEDULE B
Grade	Gloss	Range of Mean Grade Points	Grade Points for Aggregation	Verbal Descriptors for Attainment of Intended Learning Outcomes Relating to Professional, Practical or Clinical Competence
A0	Excellent	18 – 22	22	Exemplary and polished demonstration of the required skill(s), displaying underpinning knowledge, sound judgement and appropriate professional values, as evidenced by focussed sensitivity to the context, the needs of any subject, and the wider implications of the candidate's actions
B0	Very Good	15 – <18	17	Efficient and confident demonstration of the required skill(s), displaying underpinning knowledge, sound judgement and appropriate professional values, as evidenced by an evident appreciation of the possible implications of the candidate's actions, demonstrating initiative and flexibility of approach
C0	Good	12 – < 15	14	Clear demonstration of attainment of the required skill(s), displaying underpinning knowledge, good judgement and appropriate professional values, as evidenced by familiarity with how to proceed in a range of contexts
D0	Satisfactory	9 – < 12	11	Adequate independent performance of required skill, displaying underpinning knowledge, adequate judgement and appropriate professional values, suitable to routine contexts
E0	Weak	6 – < 9	8	Adequate independent performance of some but not all required skills. Some knowledge, judgement and professional values that indicate an awareness of personal limitations
F0	Poor	3 - < 6	5	Presently inadequate independent performance of the required skill. Knowledge, judgement and professional values are at least sufficient to indicate an awareness of personal limitations
G0	Very Poor	1 – <3	2	Wholly inadequate performance of the required skill, lacking in secure base of relevant knowledge and poor use of such knowledge, showing fundamental misunderstanding and misinterpretation. Evidence of poor judgement and professional values
Н		0 – <1	0	Not presently capable of independent performance of the required skill, lacking self-awareness of limitations, and prone to errors of judgement and faulty practice
		<u>.</u>		
CR		CREDIT REFUSE	Ð	Failure to comply, in the absence of good cause, with the published requirements of the course or programme; and/or a serious breach of regulations

Where, exceptionally, an Exam Board is unable to confirm the result, e.g. as some information is missing at the time of the Board meeting, '7' should be returned as a temporary grade.

Grades used in addition to those set out in Schedules A and B

Overall course results will appear on a student's MyCampus record. These should be grades from Schedule A or Schedule B unless the Clerk of Senate has approved use of an alternative assessment scale, e.g. Satisfactory / Not Satisfactory.

OTHER CODES	DESCRIPTION
MV	Incomplete Assessment (e.g. medical, compassionate or other approved Good Cause). In most cases the assessment will be required to be completed at a later date, usually during the summer vacation. At the end of Senior Honours or the final year of an integrated Masters programme, a limited amount of assessment may be set aside (i.e. the assessment will not need to be completed at a later date). (See Chapter 5 of this Guide.)
7	Deferred Result. At the time of the meeting of the Board of Examiners some information was not available. The 7 will be replaced by the course result once the information is available.
AU	Audit Only. The course was taken on a non-credit bearing basis, meaning that no summative assessment was completed.
CA	Credit Awarded. While the student took the course and credit was awarded, some aspect of the assessment for that course was disrupted so no overall course grade was available on the usual grading basis.
CR	Credit Refused. Minimum requirements for the award of credit have not been satisfied and no further opportunities exist to meet those requirements on this occasion of taking the course. A further opportunity to take the course may be available in certain limited circumstances.
	The minimum requirements for the award of credit relate to the amount of assessment completed on the course but may include other requirements such a minimum level of attendance. (See Chapter 4 of this Guide.)
CW	Credit Withheld.
	In most cases, CW indicates that while the requirements for the award of credit have not yet been satisfied, a further opportunity exists to meet those requirements. CW will show as the permanent result for the first diet. Following the further assessment opportunity, the second diet result will either be a credit-bearing grade or CR (if the requirements for credit have still not been met).
	For a course contributing to an honours classification (i.e. where in most cases, no further assessment opportunity is available) the following applies: CW will be returned by an interim Board of Examiners where any assessment has been missed on that course without Good Cause. The final honours Board of Examiners will consider whether the requirements for credit have been met across the honours programme as a whole, and, if they have, the CW will be replaced with the appropriate grade for that course. If the requirements have not been met across the programme as well as on the course then

The following are other grades to be used in the circumstances described.

credit for the course will be refused and the CW will be replaced
with CR.

2.9 Assessment of study abroad

§16.79 a) A candidate may undertake a period of study at another institution as part of their degree programme provided that this has been approved according to the process established for that programme.

- b) Grades achieved at, and reported by, that other institution must be converted into grades as set out in Schedule A or Schedule B (as appropriate) and taken account of in determining the candidate's final degree.
- c) Before commencing the period of study at another institution candidates must be informed of the process by which their grades from that other institution will be converted as set out in (b) and should normally be provided with a conversion table showing the equivalences between grades awarded at the other institution and the grades set out in Schedule A or Schedule B. The process must normally incorporate the possibility of the candidate making representations to the coordinator or committee which is charged with converting grades.
- d) The processes adopted within each programme and the conversion tables must be notified to the appropriate College Dean(s) of Learning & Teaching.
- e) In carrying out the conversion of grades the conversion table may be departed from in light of additional relevant information available to the coordinator or committee which performs the conversion.
- f) The converted grades must be approved by the appropriate Board of Examiners.
- g) Assessed work completed and assessed at another institution must not be reassessed at the University of Glasgow.
- h) Appeals may be made in accordance with the terms of the prevailing Appeals Code.

This regulation sets out a number of principles regarding study abroad and conversion of grades achieved during periods of study abroad.

Some of the requirements are mandatory, but in respect of others Subjects and Schools are left with considerable discretion. The mandatory requirements are:

- Study abroad requires approval from the Subject(s) which the student is taking to ensure that the courses being taken are appropriate and at the appropriate level and that the student's workload is appropriate. It is good practice for a written agreement to be signed by the student and the appropriate member of staff setting out the subjects to be taken.
- Grades achieved while studying abroad must be converted into Glasgow grades and then used in the same way as grades achieved at Glasgow in arriving at a student's final Honours classification.
- Students must be informed of the process by which their grades will be converted before leaving for study abroad.
- Students must also be made aware, prior to leaving for study abroad, how their grades will be reported in MyCampus and used in determining their degree classification. On some programmes, results achieved across all of the courses are recorded in MyCampus as one aggregated grade (carrying 120 credits for a session abroad or 60 credits for a semester). On others, individual course results will be published. Whichever way results are

published, this is the way that they must be used in determining the student's final GPA and degree classification. For example, if one aggregated grade is published for the 120 credits taken on a full year abroad, that value will be fed into the final grade point average. For the purposes of course grade profile, this will count as 120 credits at that grade. The Board of Examiners should not look back at individual course results reported by the host institution to inform an honours classification decision concerning grade profile.

- Work assessed during a period of study abroad must not be reassessed by Glasgow staff after the student returns.
- Final approval of the converted grades is the responsibility of the Board of Examiners.

Subjects have discretion in how the process of conversion is carried out and who is involved in the process of conversion. The regulation permits conversion to be undertaken by a single individual or by a committee. Subjects will need to consider what process will work best for them and, in doing this, will need to consider:

- The need for transparency and fairness to students.
- The requirement to allow a student to make representations about the conversion, for example regarding atypical marking on a particular course.
- The number of students with grades to be converted.
- The desirability/practicability of involving an external examiner in the conversion process.
- The need for consistency of treatment across subjects.

There is no specific approval process for the conversion process, but it should be notified to the appropriate Dean of Learning & Teaching. Deans will be expected to scrutinise these processes and resolve any concerns with the Subject.

Subsection (c) states that students should be provided with an indicative conversion table before they set off to study abroad, so that they can get a sense of how grades achieved abroad will be converted on their return. It is recognised, however, that this will not always be possible, for example in the case of an entirely new exchange. Provision of such guidance should, however, normally be possible where there is previous experience with the partner institution. Any conversion tables may, however, be departed from in light of fresh information, either as regards a particular course or more generally, and this should be made clear to students. Conversion tables should also be reviewed periodically. Proposals for changes to the tables should be submitted to the Translation of Grades from Study Abroad Sub-Committee for approval and publication in the University's Consolidated Conversion Tables.

Semester 2 Study Abroad: In some cases study abroad may be for one semester only. Where students are away from Glasgow for semester 2, assessment from semester 1 courses may remain outstanding (e.g. where an exam is scheduled for the April/May diet) and it will be impracticable for the student to return to Glasgow for this. For non-Honours courses, the assessment may be taken at the August resit diet. For Honours courses, where no assessment is set for the August diet, students may complete the assessment at the next opportunity (e.g. at the April/May diet in the following year) unless an alternative form of assessment, which can be completed at the end of semester 1, has been arranged.

2.10 Assessment of visiting students

§16.80 A visiting candidate is a candidate undertaking a period of study at the University of Glasgow as part of their degree programme at another institution.

A visiting candidate may be permitted to take any course at the University of Glasgow, including those which normally contribute to an honours programme.

The scheme of assessment for a course shall normally be the same for a visiting candidate as for a University of Glasgow candidate, though this scheme may be varied in the event that the visiting candidate is required to return to their home institution before all course assessment has been completed. In considering variation of the scheme of assessment and the components of a varied scheme of assessment for a visiting candidate:

- a) Requirements of the visiting candidate's home institution shall be taken into account.
- b) A visiting candidate may be required to complete an alternative component or components of assessment before leaving Glasgow or may be required to complete outstanding components of assessment at their home institution.
- c) Where a course's scheme of assessment includes a component taken under examination conditions, the varied scheme shall normally include a component of assessment under examination conditions.

A visiting candidate who attends the University of Glasgow for less than the full duration of a course shall be awarded credit in proportion to the amount of teaching time attended.

Course results for a visiting candidate must be confirmed by a University of Glasgow Board of Examiners. Where a visiting candidate finishes their studies at Glasgow before the scheduled meeting of the Board of Examiners, provisional results must be provided to the visiting candidate as soon as practicable. Where the candidate's home institution requires a confirmed result prior to the scheduled meeting of the University of Glasgow Board of Examiners, an interim Board must be convened.

This regulation is intended to provide a cross-University framework for the assessment of students who spend part of their time studying in Glasgow, for example as part of an exchange or Junior Year Abroad. In some cases the student will be here for the whole of the course and will be assessed in the normal way, for example a student taking a semester 1 course will normally still be here for the exam period in December. In some cases, however, the student will not be in Glasgow when final assessment for the course takes place. This may be because they were only taking part of a course (for example, the first semester of a whole year course) or where the student has to return to their institution before the exam diet in April/May. In the latter case it may, of course, be possible to arrange for the exam to be undertaken at the home institution, and it would only be where that is difficult or impossible that this regulation would apply.

The general principles set out in the regulation are that:

- Visiting students may undertake any course offered at the University, though Schools/Subjects may impose restrictions on access.
- Normally the visiting student is assessed in the same way as other students, using the normal scheme of assessment for the course. Note that this means reassessments may not always be available to visiting students (e.g. where they are taking Honours courses).
- Where assessment by the normal scheme is not possible then the course convenor has discretion to set a suitable *alternative* form of assessment. (It would not be appropriate to award a course grade solely on the basis of the standard assessment components completed by a student. E.g. for a semester 1 visiting student who takes a course that has a 50% weighted exam at the

April/May diet, a grade should not be awarded solely on the basis of the remaining 50% weighted components completed during the semester. It will be a question of academic judgment as to what alternative assessment would be suitable to ensure demonstration by the visiting student of the Intended Learning Outcomes that would have been covered at the April/May exam.) The only restriction on the alternative assessment is that if the normal scheme includes an exam then the amended assessment scheme must include an assessment taken under exam conditions. This need not be an exam, but could, for example, be an essay written under exam conditions where the topic has been given to the student in advance.

Alternative assessment arrangements must be made clear to visiting students, but do not need to appear in the Course Catalogue/Course Specification.

In some cases home institutions will need to be provided with a grade before the relevant Board of Examiners for the subject meets. In such cases, an interim Board of Examiners must be convened, though this could take the form of a virtual Board of Examiners, and the appropriate External Examiner must be involved.

Appendix: Examples

Example 1: Open exam within 24 hours: Students should aim to spend no more time than indicated on the exam paper. All students must upload and submit answers within the 24-hour period.

Exam date 26/04 Exam start time 09:30. Expected exam duration 02:00.

All students must submit by 09.30 on 27/04. The exam may be submitted late in Moodle.

Exam submitted from 09.30 26/04 and up to 09.30 on 27/04	Exam submitted between 09.30 and 11.30 on 27/04	11.30 27/04 onwards
Within scheduled time	Late	Not possible to submit
Graded as normal	Graded 'H' – zero grade points, but counts towards the award of credit	Treated as a non-submission: may result in Credit Withheld/Credit Refused (CW/CR)

<u>Example 2A</u>: Timed exam within 24 hours, completed file(s) to be uploaded to Moodle. The exam can be started at any time during the 24 hour period. Students should aim to spend no more time than indicated on the exam paper. An additional 30 minutes is available for upload of completed answer file(s). Students must complete and upload answers within the 24 hour period.

Exam date 28/04. Exam start time 09:30. Expected exam duration 02:00.

Student elects to start exam at 10.15 on 28/04. As it is a two hour exam, a two and a half hour window is available: two hours for completing the exam and 30 minutes for file(s) upload. The scheduled exam time therefore ends at 12.45.

If the student has been assessed by the Disability Service as requiring extra time, their scheduled exam time will be extended by the appropriate amount of time.

Exam submitted from 10.15 and up to 12.45 on 28/04	After 12.45, no further upload to Moodle possible. Completed answers submitted direct to School between 12.45 and 14.45 on 28/04	Completed answers submitted to School from 14.45 onwards on 28/04
Within scheduled time	Late	Outwith late period
Graded as normal on the basis of what is submitted by student during the scheduled time or what is 'auto- submitted' by Moodle at the end of the scheduled time.	Graded 'H' – zero grade points, but counts towards the award of credit	Treated as a non-submission: may result in Credit Withheld/Credit Refused (CW/CR)

For a student who has been assessed by the Disability Service as requiring 25% extra time, i.e. an additional 15 mins per hour, the scheduled end time for the exam is 13.15 (two hours + an additional 30 minutes + 30 minutes upload time). If the exam is submitted by 13.15 it is submitted on time and will be graded normally. If it is submitted to the School/RI between 13.15 and 15.15 it is treated as submitted late and will be graded H (zero grade points). If the exam is submitted after 15.15 it will be treated as a non-submission. Instructions on how to submit the exam will be included on the exam front sheet.

Example 2B: Timed exam within 24 hours - The exam can be started at any time during the 24 hour period. Students should aim to spend no more time than indicated on the exam paper. Students must complete and upload answers within the 24-hour period.

Exam date 28/04. Exam start time 09:30. Expected exam duration 02:00.

Student doesn't start the exam until 07.45 on 29/04. As it is a two hour exam, a two and a half hour window would normally be available for completion of the exam and file(s) upload. The scheduled exam time for that student would therefore end at 10.15. However, the 24 hour window for completing the exam closes at 09.30 on 29/04 so the student must upload by then to be within the scheduled exam time.

For a student who has been assessed by the Disability Service as requiring 25% extra time for completion of the exam, while they are entitled to a three hour scheduled exam time **within** the 24 hour window, the window will still close at 09.30 on 29/04 so they must upload by then.

Exam submitted from 07.45 and up to 09.30 on 29/04	After 09.30, no further upload to Moodle possible. Completed answers submitted direct to School between 09.30 and 11.30 on 29/04	Completed answers submitted to School from 11.30 onwards on 29/04
Within scheduled time	Late	Outwith late period
Graded as normal on the basis of what is submitted by student during the scheduled time or what is 'auto- submitted' by Moodle at the end of the scheduled time.	Graded 'H' – zero grade points, but counts towards the award of credit	Treated as a non-submission: may result in Credit Withheld/Credit Refused (CW/CR)

Example 2C: Timed exam within 24 hours, all answers completed directly in Moodle (e.g. Multiple Choice or short answer paper). The exam can be started at any time during the 24 hour period. The amount of time expected to complete the paper is the same as the amount of time available.

Exam date 11/05. Exam start time 09:30. Exam duration 02:00.

Student elects to start exam at 11.20 on 11/05. As it is a two hour exam, with no file(s) upload required, only the two hour window is available for completion of the exam. The scheduled exam time for that student therefore ends at 13.20.

If the student has been assessed by the Disability Service as requiring extra time, their scheduled exam time will be extended by the appropriate amount of time.

Exam submitted from 11.20 and up to 13.20 on 11/05	13.20 onwards on 11/05
Within scheduled time	Not possible to submit – no further access to exam
Graded as normal on the basis of what is submitted by student during the scheduled time or what is 'auto-submitted' by Moodle at the end of the scheduled time.	If no answers have been completed by the end of the scheduled exam time the exam will be treated as a non-submission: may result in Credit Withheld/Credit Refused (CW/CR)

For a student who has been assessed by the Disability Service as requiring, for example 50% extra time to complete the exam, the scheduled exam time will end at 14.20 (two hours + one additional hour). If the exam is submitted by 14.20 it is submitted on time and will be graded normally. No further submission beyond this time is possible and if no answers have been completed by then the exam will be treated as a non-submission.

Example 3: Timed exam – fixed start time: The exam will have a fixed start time and duration. Students must upload and submit answers within the scheduled time.

Exam date 04/05. Exam start time 09:15. Expected exam duration 01:30.

As the exam has an expected duration of one and a half hours, a two hour window is available for completion of the exam and file(s) upload. This starts at the exam start time. The scheduled exam time therefore ends at 11.15. The exam may be submitted late in Moodle.

If the student has been assessed by the Disability Service as requiring extra time, their scheduled exam time will be extended by the appropriate amount of time.

Exam submitted from	Exam submitted between 11.15 and 13.15	13.15 on 04/05 onwards
09.15 and up to 11.15 on 04/05	on 04/05	
Within scheduled time	Late	Not possible to submit
Graded as normal	Graded 'H' – zero grade points, but	Treated as a non-submission: may
	counts towards the award of credit	result in Credit Withheld/Credit Refused
		(CW/CR)

For a student who has been assessed by the Disability Service as requiring, for example 25% extra time to complete the exam, the scheduled exam time will end at 11.37 and 30 seconds (one and a half hours + 22 ½ additional minutes + 30 minutes upload time). If the exam is submitted by 11.37 and 30 seconds it is submitted on time and will be graded normally. If it is submitted between 11.37 and 30 seconds and 13.37 and 30 seconds it is treated as submitted late and graded H (zero grade points). After 13.37 and 30 seconds it is not possible to submit and will be treated as a non-submission. Instructions on how to submit the exam will be included on the exam front sheet.

<u>Example 4</u>: Seen exam – 24 hours to submit: The questions will be released prior to the date of the exam, as advised by the School/RI. Students then have the entirety of the 24 hour period on the scheduled date of the exam to upload and submit their answers.

Exam date 12/05. Exam start time 14:00. Expected exam duration 02:00.

There is a 24 hour period available for submission of the exam by all students, starting at the exam start time.

Exam submitted from 14.00 on 12/05 and up to 14.00 on 13/05	Exam submitted between 14.00 and 16.00 on 13/05	From 16.00 on 13/05 onwards
Within scheduled time	Late	Not possible to submit
Graded as normal	Graded 'H' – zero grade points, but counts towards the award of credit	Treated as a non-submission: may result in Credit Withheld/Credit Refused (CW/CR)
