Timetable and Roomfinder Mobile app

Did you know you can check your timetable and get directions to rooms on campus through the mobile app? This is the best source of up-to-date information about your course enrolments and timetable.

You can access this via any mobile device or by downloading to your personal calendar.

Here's how it works:

- Details of your class enrolments (made in MyCampus) are updated every 20 minutes and displayed in your timetable on the mobile app.
- Any change made to a timetabled event (e.g. a change of room) is reflected in the mobile app/calendar almost immediately.
- To make sure you are aware of any late changes to the timetable, each hour between 9am and 5pm, the system collects any changes made in the last hour for any events originally timetabled for the current day. You can see this via the Change Alert link on the mobile app Home Screen. Alternatively, you can subscribe to the late change email or SMS services, which means the change alert is sent to you via that service.
- At 6 pm each day, the system collects all changes made since 8am for any events originally timetabled for the next day. The Change Alert screen from 6pm will show a list of changes made to your timetable for events in the next day. Again, you will receive a change alert via email or SMS if you have subscribed to this.
- Changes which relate to events further ahead are reflected in the app immediately, but no change alert is generated. You are responsible for checking your timetables on a regular basis and should use the mobile app as the best source of up-to-date timetables.

Details of accessible routes around campus and accessibility of various buildings and rooms are also available via the mobile app.
