Welcome to our Spring edition of the Medical Fund newsletter.

With the warmer weather, your thoughts may well be turning to outdoor activities and so you will be interested to read about our Munro Challenge which takes place in late May. The aim of the event is to have groups of walkers on as many of Scotland’s 282 Munros as possible. This year funds raised from the event will go towards the Paul O’Gorman Leukaemia Research Centre and I hope many of you will join us.

We highlight the new South Glasgow University Hospital, which will become one of Europe’s largest hospitals, and the key University projects which will be located there. We were also pleased to welcome Ms Shona Robison, Cabinet Secretary for Health, Wellbeing & Sport, to the University last month where she announced £4.2m of funding to establish a new Infection Prevention Institute.

The previous edition of the newsletter featured the Dental School which is fundraising for a new prosthodontics laboratory and you will read in this edition about the novel ways it is raising money this summer for the project. You will read also how one of our Institute Directors, Professor Jill Pell, is taking on an incredible challenge to raise funds for the Institute of Health & Wellbeing.

Finally, thank you to Professor Anna Dominiczak, for her article about reconnecting with old friends. We know how important it is for our reunion groups to return to campus and I hope she will encourage those of you who are thinking about organising an event to contact us.

Professor Sir Michael Bond  
Chair, The Medical Fund

£4.2m for research to help tackle hospital infections

The Scottish Government’s Cabinet Secretary for Health, Wellbeing & Sport, Ms Shona Robison, visited the University on 24th March to announce £4.25 million of funding to establish the Scottish Healthcare Associated Infection Prevention Institute (SHAIPI). The funding has been channelled to the Scottish Infection Research Network (SIRN) via the Chief Scientist Office and will enable the five-year project to commence in April 2015.

Ms Robison met with Professor Neal Juster, Senior Vice-Principal and Deputy Vice-Chancellor and Professor Anna Dominiczak, Vice Principal and Head of the College of Medical, Veterinary & Life Sciences, before being taken on a tour of the SHAIPI laboratories.

SHAIPI, led by Professor Alistair Leanord at the University of Glasgow, will create a virtual hub involving six Scottish Higher Education Institutes, 19 co-investigators, several NHS Boards and industry partners who will work together to tackle the threat to public health from emergent Healthcare Associated Infections (HAIs) and antimicrobial resistance.

‘A truly national effort’

Ms Robison said ‘This significant investment towards research in this area will allow us to take the next step in our fight to bring down infection levels even further. This is one of the single biggest research grants awarded in recent years that aims to investigate ways to further reduce healthcare-associated infections. ‘This is truly a national effort, bringing together expertise from a number of Scottish universities and Scotland’s NHS with a clear focus towards making our hospitals safer for all those patients who use it.’

Supporting undergraduates

For the past 5 years, the Medical Fund has been helping students further their education by attending conferences with a £5,000 grant from the Medical Education theme. This has provided much needed support for undergraduate students to travel to conferences and to present research.

Over the years, over 100 students have attended conferences in radiology, hypertension and stroke, nutrition, palliative care and diabetes and presented at the Royal Society of Medicine, the World Health Summit and the British Transplantation Society Congress. This valuable experience helps to expand students’ horizons and enhance their employability.

A bumper summer for the Dental School

To mark 100 years of the presence of the Royal Hospital for Sick Children at the Yorkhill site, the Hospital and its staff have been engaged in a series of events during 2014 and 2015. These centenary celebrations will culminate with the Paediatric Research Day that will be held on 9 October 2015. In 2015, this annual event will be extraordinary for a number of reasons. Not only will it celebrate the centenary, but it will also be the first Paediatric Research Day that will be held at the new Teaching & Learning Centre at South Glasgow University Hospitals site in the vicinity of the new Royal Hospital For Sick Children.

The theme of the Glasgow Paediatric Research Day will be ‘A Personalised Approach Towards The Clinical Care Of Children In the 21st Century’. The day will consist of a series of research communications by young local investigators and will be followed in the afternoon by lectures that will be delivered by local and international experts and ending with an evening reception for all.

As you will have read in the last edition of the newsletter, the University of Glasgow’s Dental School have launched an appeal to build a new Dental Technology Teaching Suite.

The current ‘Prosthodontics Teaching Laboratory’ was designed for a previous era and a fundamentally different, integrated ‘Dental Technology Teaching Suite’ is required in order to deliver a student-centred experience that ensures a detailed understanding of modern dental technologies.

The Dental Appeal aims to raise £300,000 over the next three years to allow this major project to proceed. To help raise these funds, the Dental School has a host of events and activities planned over the summer.

Fundraising events

A Gala Concert entitled ‘The Glasgow Dental Big Band & Friends’ will be held in the Glasgow University Union on the evening of Friday, 5 June 2015. A number of alumni will be performing with the students’ Dental Big Band to provide an evening of outstanding musical talent, fun and entertainment.

There is also a golfing event scheduled for June. The date and venue are still in negotiation but it is shaping up to be a fantastic event with some great prizes. If you are interested in either of these events please contact Laura Morton on the details opposite.

Monte Carlo or Bust

The main attraction this summer, however, will be the Monte Carlo or Bust Banger Rally. Driving a 1977 Leyland Princess from San Quentin through the Alps to Monte Carlo in three days are University of Glasgow Dental School staff members Jeremy Bagg, Neil Campbell and Ronnie Ford, also known as the Mad Molars. From 16 to 19 July they will be driving along with 100 other bangers as part of a rally which will take them through Dijon, Geneva and Turin with some competitions and challenges to complete en-route.

Decoration of the vehicle has already started with sponsors purchasing self-adhesive molar teeth which they sign and which are attached to the body panels and corporate sponsors can opt to have an advert on the vehicle for a minimum donation of £250. We wish them all the best in this fundraising adventure! To have your name on the vehicle please contact Laura Morton at the details below.

As 2015 progresses the NHS Greater Glasgow and Clyde (GGC) will coordinate the gradual relocation of the Southern General, Western Infirmary and Victoria Infirmary to South Glasgow University Hospital. It will become one of Europe’s largest hospital complexes and will be located at Govan adjacent to the site of the Southern General Hospital.

The new facility will incorporate maternity, children’s and adult acute hospitals, and specialist services including renal medicine, transplantation and vascular surgery, theatre and diagnostic services. The £842 million publicly funded project also has the largest critical care complex and one of the biggest emergency departments in Scotland.

The new 14 floor adult hospital will have 1,109 beds, with each general ward consisting of 28 single bedrooms. The Royal Hospital For Sick Children will have a separate identity and entrance and is adjoined to the adult hospital. With 256 beds over five storeys it will replace the existing Royal Hospital for Sick Children at Yorkhill.

Additional NHS GGC facilities on this site include the newly built Maternity Unit and the Laboratories Building. In addition the Queen Elizabeth National Spinal Injuries Unit, The West of Scotland Mobile Rehabilitation Unit and the Langland’s Rehabilitation Unit for older people will remain on the site.

Linking treatment and research

An important aspect of the new hospitals is the physical links in the form of bridges and link corridors for patients and staff to the Maternity, Neurosciences Institute Building and the New Laboratory Building. These links have been designed to bringing together clinician scientists, NHS clinicians, and industry partners in one place. These staff will be using cutting-edge technologies to translate research into treatments for patients and driving the development of new innovations in medicine.

Join the Munro Challenge!

During the holiday weekend of 23-25 May, teams will be tackling Munros across Scotland to raise funds for leukaemia research in Glasgow.

The Munro Challenge is raising funds for the Paul O’Gorman Leukaemia Research Centre. Since the Centre opened in 2008, the research team has doubled and the Centre has attracted scientists from all over the world.

The work of the Centre is internationally renowned and the research that happens there helps to make a positive difference to the lives of patients living with leukaemia. Regular fundraising donations are vital to ensure that the scientists working there can continue their ground-breaking research.

A Munro is a mountain in Scotland that is over 3,000 feet. Participation should be in teams of between two and eight people, with at least one person in each team being an experienced walker. All participants will be offered the chance to attend a walking safety workshop and will be asked to sign a disclaimer and provided with safety guidelines.

Registration is free and there is a prize for the best photo on top of a Munro!

Clyde FC visit Think Pink Scotland

On Monday 23 February, Clyde Football Club Directors Bobby Gracey and John Taylor and Ian McCallum of Only Sports toured the Think Pink Scotland laboratory in the Wolfson Wohl Cancer Research Centre in Glasgow.

Think Pink Scotland are Clyde FC’s charity partner for season 2014/15. This relationship has seen the Clyde FC first team wear a pink ‘Think Pink Scotland’ strip with 20% of all sales of the pink strip donated to Think Pink Scotland, who fundraise for breast cancer research at the University of Glasgow.

Developing effective treatments

The Clyde FC Team met Dr Iain Macpherson, Clinical Senior Lecturer in Medical Oncology, to find out more about his research work and to hear about how donations from Clyde FC are having an impact on breast cancer research. Dr Macpherson said: ‘By donating to Think Pink Scotland, Clyde FC supporters are helping to accelerate the process of understanding breast cancer, which will help us to develop more effective treatments for patients in the future’.

Following the visit, Director Bobby Gracey said: ‘It is great to see first-hand the outstanding work delivered by Dr Macpherson and his team at The Wolfson Wohl Cancer Research Centre. Our visit really brings to life how important this research work is and Clyde Football Club is delighted to be able to play our part via our relationship with Think Pink Scotland. We now look forward to hosting a Think Pink Scotland Charity day at a home game this season to raise further funds and awareness about such an important cause affecting so many families in Scotland and our surrounding local communities.’

Further information
- The pink strip retails at £35 for adults and £30 for kids and is available to be bought directly from the club at [www.clydefc.co.uk](http://www.clydefc.co.uk) with £7/£6 of every sale being donated to the charity.

Reconnecting with old friends

By Professor Anna Dominiczak
Vice-Principal and Head of College of Medical, Veterinary & Life Sciences

Relationships made whilst at University can be some of the strongest and most memorable of your life. However, it is easy to lose touch with old friends. The College of Medical, Veterinary & Life Sciences is always delighted to hear from medical and dental year groups who want to hold a reunion and we can assist organisers at every stage.

The first step in organising your own reunion is to contact the Development Office. They are able to gather together lists with names and contact information of your fellow classmates and can discuss any initial ideas you have for your reunion event. They can also add your reunion notice to their webpages and Avenue magazine to help spread the word.

A range of venues on campus

Once you have decided on a date for your reunion, the office can then discuss the various venues we have on campus for your group. We have many rooms which can be tailored to individual reunion group needs from a formal sit-down meal in the Gilbert Scott Building to a more informal event with cash bar in the Post-grad Research club or Wolfson Medical School Building.

A member of staff from the College will be delighted to be there on the day of your event to welcome you, speak about future plans for medicine at Glasgow or take you on a tour of the campus, including the Wolfson Medical School Building, the BHF Glasgow Cardiovascular Research Centre, Anatomy rooms or the Dental School. Later this year, reunion groups will also have the exciting opportunity to visit the South Glasgow University Hospital and the new £60million clinical academic facilities on that site.

We look forward to welcoming you back to campus!

Professor
Jill Pell
takes on an extraordinary challenge

This summer will see Professor Jill Pell, Director of the Institute of Health & Wellbeing go to great lengths to raise funds for the Institute.

Jill will be cycling from Lands End to John O’Groats over nine days from 5-13 September – a distance of 960 miles! The total climb is 15,000 metres which is twice the height of Everest. She plans to cycle 108 miles per day and says, ‘I have never cycled more than 50 miles in one day (so it will be a challenge) but it is for a good cause and what better way to raise some funds for health research than by doing a healthy activity such as cycling!’

As if that was not enough, Jill is also planning to hike along a Spanish pilgrimage trail for five days in September/October along with Carol Tannahill, Director of the Glasgow Centre for Population Health and Linda de Caestecker, Director of Public Health, Greater Glasgow & Clyde Health Board. Fittingly, this fundraising walk is being done jointly by the Directors of the three Institutions in Glasgow that are focused on improving health and reducing health inequalities.

Reducing health inequalities

The mission of the Institute of Health & Wellbeing is to prevent disease, improve health and reduce health inequalities; locally, nationally and internationally. Many of the determinants of health lie beyond the control of the health services; such as poverty, unemployment, poor education and poor housing.

The IHWB researches and develops a wide range of interventions that can improve health: including changes to individual lifestyle and behaviours, health service prevention and screening programmes, legislative and fiscal changes, community and school based projects, and emerging technologies. They work with a wide range of external stakeholders including the NHS, Local Authorities, Scottish Government, and voluntary sector to ensure that their research has a real impact on health.
Thanks to all our donors

Thanks to all those who made gifts to the Medical Fund from 1 September 2014 to 1 April 2015.

**Please notify the University if you:**

- [ ] want to cancel this declaration / change your name or home address / no longer pay sufficient tax on your income and/or capital gains.

**Gift Aid**

Gift Aid is a UK government tax scheme. As an exempt charity, the University of Glasgow/University of Glasgow Trust (The University) can reclaim basic rate tax on qualifying donations from UK tax payers. This applies to donations you have made in the last four years and from the date of this declaration, until you notify us otherwise. To enable the University to reclaim Gift Aid, please sign and date the Gift Aid declaration below.

**Declaration:** I would like the University to treat all qualifying donations as Gift Aid donations. I confirm I have paid or will pay an amount of Income Tax and/or Capital Gains Tax for each tax year (6 April to 5 April) that is at least equal to the amount of tax that all charities or Community Amateur Sports Clubs (CASCs) that I donate to will reclaim on my gifts for that tax year. I understand that other taxes such as VAT and Council Tax do not qualify. I understand the University will reclaim 25p of tax on every £1 that I have given in the last four years and from the date of this declaration until I notify you otherwise.
