WORLD CHANGING CAMPUS
WORK WITH US
TO CREATE A WORLD CHANGING CAMPUS, FIT FOR TODAY AND THE FUTURE
The University of Glasgow has been inspiring people to change the world for over 550 years and is recognised as an iconic place of learning and research throughout the world.

Over the next ten years we will transform our campus as part of a £775m development plan – the single largest estates project in our history since the move from the city centre in the 1870s.

We plan to invest in developing new buildings and bringing our historic and iconic buildings up to a standard which supports the needs of current and future students and researchers.

The development of an open and accessible campus will enhance our performance as a world-class, world-changing university and have a positive impact on the city.
OUR MASTERPLAN

The Gilmorehill campus is the University’s largest and most well-known campus, and features the iconic Gilbert Scott building. It provides most of the University’s central services, as well as accommodation for 23,000 students and 6,000 staff.

Our plan is to develop the campus into a space that is innovative and courageous in design, supporting learning through inspirational and diverse teaching environments, and reflecting the University’s history and ambition.

Our estates strategy will create a campus which promotes collaboration in research through exchange of ideas, supports a community that is inclusive and welcoming, and reinforces the University’s civic role by being outward looking and international.

Our delivery strategy will be developed with checks and balances, ensuring adaptable, future-proofed buildings that are effective and efficient. We will create a campus with facilities fit to recruit, inspire and support the next generation of world changers.

We are working with Aecom, 7N, Spaces at Work and Arupts to ensure that our masterplan sets the stage for a world changing campus.

OUR VISION

Our vision for the redevelopment is captured in the Campus Development Framework (CDF). Developed through detailed consultation, the CDF will ensure that the transformation of the campus is focused on:

- Creating a more unified campus with improved infrastructure
- Protecting the heritage of the campus
- Encouraging a more sustainable approach to energy provision and usage
- Reflecting the surrounding environment in urban form
- Improving accessibility with clear routes to and through the campus

This will include constructing a new iconic entrance to the University from Dumbarton Road, enhancing University Avenue, and developing new public open space linked by more clearly defined pedestrian routes for a greater sense of openness.

We are keen to explore collaborations with a range of partners to support this vision. If you would like to find out more, visit www.glasgow.ac.uk/campusframework
WE WILL CREATE A CAMPUS WITH FACILITIES FIT TO RECRUIT, INSPIRE AND SUPPORT THE NEXT GENERATION OF WORLD CHANGERS
OUR KEY PROJECTS

Over the next ten years we will create world-class facilities and social spaces to enhance the student experience. The transformation of the campus will include designing and constructing new dedicated buildings of significant scale, including:

LEARNING & TEACHING HUB
Large specialised lecturing facilities and up to 1,250 diverse learning stations, supported by commercial services and social spaces, with the capacity to host international conferences.

SOCIAL SCIENCES FOR THE COLLEGES OF SOCIAL SCIENCE, ARTS, SCIENCE AND ENGINEERING
Innovative buildings that will reinforce the exceptional research and teaching work of our colleges and bring together staff and students, supporting our ambition of growing the University’s international reputation.

RESEARCH HUB
Specialist research facilities which will bring world leading industry and academic researchers together, encouraging knowledge exchange and inspiring students to become engaged with world-changing research.

CONNECTIONS & COLLABORATIONS
We have impactful local strategic partnerships with NHS Greater Glasgow & Clyde and Glasgow City Council. Working together we will continue to advance research into areas such as chronic disease and promote the city’s museums and cultural programmes at Kelvin Hall.

PROTECTING OUR HERITAGE
The campus development will create an exciting and respectful blend of history and modernity in recognition of our past, present and future success.
THE DEVELOPMENT WILL EXPAND OUR CAMPUS FOOTPRINT BY 25%
