

Scottish Optoelectronics Association

- Scottish Optoelectronics Association
 - Founded in 1994, 3rd oldest National Optoelectronics association in the world
 - Secretariat of UKCPO
 - Founding member of the International Optoelectronics Association
- Objectives of the SOA
 - Promote interests of Optoelectronics Industry and members
 - Provide strategic guidance to government on industry priorities and allocation of funds
 - Support growth of Optoelectronics industry in Scotland
 - Maintain vibrancy of SOA
- Projects and Partnerships
 - Photonics KTN, see: <http://photonics.globalwatchonline.com>
 - ACCORD, a European project to make advanced prototype optoelectronic devices available to universities, see: www.ist-accord.org
 - EPISTEP, a European project to assist SMEs to participate in European programmes, see: www.epistep.org
 - Managed the Scottish Government TTOM Awards programme, which enabled technology transfer projects, particularly with a cross-sectoral and interdisciplinary focus, see: www.ttom.org.uk
 - ADRIA, European Advanced Displays network, see: www.adria-network.org

SOA Services to Members

- Market and trend analysis
- Information regarding available technology reports
- Roadmapping
- Industry analysis
- Competitor analysis
- Technology signposting
- Cross-disciplinary advice
- Partner company identification
- Source of research and/or consultancy
- Funding and grant signposting
- For further information on the SOA, see: www.optoelectronics.org.uk
