War Studies: Sources

How to use this list of sources

This is a list of some of the collections that may provide a useful starting point when researching this subject. It gives the collection reference and a brief description of the kinds of records held in the collections. More detailed lists are available in the searchroom and from the Duty Archivist – see contact details at the end of this source list.

University Records

The following is a selection of the items available in the GUA collection. Remember that, in addition to these specific items, all of the records of the University during times of conflict indicate ways in which the functioning of the institution both was and wasn’t affected. Minutes of University meetings, and University Calendars (which also include information about the Officer Training Corps, University Air Squadron and University Naval Division), will be particularly relevant.
