Pet Memorial Wall

Pets are considered as friends, companions and treasured parts of the family. Their death can be a difficult experience and grief is common when a much-loved pet passes away.

Spending time remembering the happy memories and the fun times you shared with your pet can be beneficial in coming to terms with their death, and may be useful in helping children accept the loss.

The Small Animal Hospital has created an online pet memorial wall to allow our clients to share stories and memories of their beloved pets during the bereavement period. When you create your memorial you can upload a favourite photograph, describe why your pet was so special to you and how they will be remembered.

The pet memorial wall can be accessed by following the link:
