The University of Glasgow, charity number: SC004401
VETERINARY MEDICINE & SURGERY

As a vet you will be responsible for the prevention of disease and for the medical and surgical care of animals, including household pets, zoo animals, farm animals and horses.

What you will need

Degree and iCAS code

BVMS (D100) Four years

Entry requirements

Entry requirements for the programme are published by the University. You can also see glasgow.ac.uk/online/admissions/entryrequirements for more information. To apply you will need:

• A level grades AAA
• An equivalent level of qualifications, for example, the International Baccalaureate
• A minimum of 32 points

Applying

Applications must be submitted by 15 October. If you are applying from a country outside of the European Economic Area, you must apply by 15 September in the year before you intend to start your course.

Preference interviews

You will be interviewed by preference at the school before you make your final choice to four veterinary schools only. You should not apply to more than four veterinary schools.

The interviews take place at the University before you apply for a specific university. If you're interested in visiting the University before you apply, you should attend Open days or call on the University's Open day webpage.

Other opportunities to visit

The University offers a range of opportunities to visit our beautiful campuses. If you would like to chat to our friendly staff and students, attend one of our tasters or call on us. How to apply

Applicants from North America

Applications for admission must be made through the Universities & Colleges Admissions Service (UCAS). Applicants must submit an online application by 15 October. If applying to the programme before your final high school examination results have been released, you will be required to supply your results to the University. If you are deferred entry. For further information please visit glasgow.ac.uk/myglasgow/ucas.com

Entry requirements

BVMS (D100): Five years

• Five A level grades AAAB (this includes chemistry and you will need at least a grade A)
• Four A level grades ABBB (this includes chemistry and you will need at least a grade A)
• International qualifications

Practical experience requirements

In addition to the academic standard, we seek evidence of motivation and dedication. In specific, applicants should have evidence of a range of relevant experience. This should include at least two weeks with a veterinary practice in your home country that has faced a disease outbreak with farm animals.

What to expect

Purpose and goals

In the BVMS programme we aim to integrate clinical and pre-clinical studies in an integrated four-year programme which meets the professional standards required for entry into the veterinary profession. This programme is structured so that you will be prepared for entry into a range of professional roles. As a graduate of Veterinary Medicine at Glasgow, you will be prepared for entry into our professional environments. Satisfactory completion of EMS is a requirement for professional licensure.

Clinical phase (years 3 and 4)

During this year of the programme is structured to develop the fundamental personal qualities that are required for the professional role. Though this year of the programme is mainly practical, you will still attend lectures and tutorials. During this period you will gain confidence in veterinary medicine and start to think about the common species of domestic animals. You will gain confidence in veterinary medicine and start to think about the common species of domestic animals. You will gain confidence in veterinary medicine and start to think about the common species of domestic animals.

Professional phase (year 5)

In your final year there are no lectures and tutorials. The primary emphasis is on an end-of-year examination covering key aspects of the BVMS programme in year 5. We have approved status from the American Veterinary Medical Association (AVMA) which enables you to have the opportunity to become a registered veterinary surgeon in the United States. We also have international links with the Australian Veterinary Boards Council and the American Veterinary Medical Association (AVMA) which allows you to sit the BVMS programme.

Our international links

Our international links offer many opportunities to learn and earn credits while you’re still at University. As a graduate of Veterinary Medicine at Glasgow, you will have the opportunity to study abroad on our three-year intercalated degree programme at one of the University’s partner universities.

Support for NVLE

The National Board of Veterinary Examiners has established a single examination for the licensing of veterinarians in the United States. The NVLE is designed to test the knowledge and skills that you will need for your professional role. It is divided into three phases.
