

## **Ken Sutherland**

### **Co-opted Member**

Ken currently holds the position of Company President of Canon Medical Research Europe (formerly Toshiba Medical) in Edinburgh with responsibility for a large team of computer scientists, data analysts and clinical experts. This group is responsible for research and development of novel clinical applications for 3D medical imaging as part of the Canon Corporation.

The team in Edinburgh collaborates with a number of practicing clinicians and academic researchers in the UK and across Europe and is focused on bringing new innovation into the Canon Medical product line. In this post Ken is part of Canon Medical's Global R&D leadership and serves as an industry advisory to the Scottish Government on the Life Sciences Industry Leadership Group. Ken also holds the position of Chair of the Scottish Lifesciences Association, a trade body for the industry in Scotland.

Ken returned to Edinburgh in August 2007 to join Toshiba as R&D General Manager having previously held the post of Operations Director for a European multinational running its imaging R&D facility in Cambridge, England. Ken studied Electronics and Computer Science at Edinburgh University and has a PhD in Data Sciences and four years postdoctoral research experience in medical image analysis and machine learning.
