

USyd-Glasgow Partnership Collaboration Awards Guidelines for Applicants – September 2018

Purpose

The University of Sydney (USyd) and the University of Glasgow (Glasgow) have identified each other as strategic partners to foster deep collaborations in research and education. The USyd-Glasgow Partnership Collaboration Awards (PCA) have been established to facilitate and support joint initiatives that will strengthen the two universities' strategic priorities as well as develop multi-disciplinary cutting-edge research to create academic and societal impact.

In this round of the PCA, applicants are encouraged to submit funding proposals for innovative and sustainable programs built around collaborative research linking USyd and Glasgow. Proposals for learning and teaching initiatives may also be considered if included as part of a larger collaborative research proposal.

Applicants must also demonstrate that their projects are sustainable in the long-term, preferably by including a plan for engagement that includes leveraging external funding and publication outputs.

Preference will be given to teams which include PhD or masters by research students, postdocs, Early and Mid-Career Researchers (EMCR) and researchers on Sabbatical Leave rather than simply one-to-one research projects. Projects which are multidisciplinary in nature are encouraged.

In this round, up to five proposals will be funded (each with two Chief Investigators; one from USyd and one from Glasgow). Each successful proposal may receive up to the equivalent of AUD 20,000 (£11,200) from each institution for a total of AUD 40,000 (£22,400).

6.2. Criteria do not have weightings; proposals are assessed holistically. Each proposal will be assessed according to the selection criteria described below.

Score	Category	Justification
4	Excellent	Proposal successfully addresses all relevant aspects of the criterion. Any shortcomings are minor

3	Very Good	Proposal addresses the criterion very well, but a small number of shortcomings are present
2	Good	Proposal addresses the criterion well, but a number of shortcomings are present
1	Poor	Criterion is inadequately addressed or there are serious inherent weaknesses

Selection Criteria	Description
Quality & Relevance	<ul style="list-style-type: none"> Clearly describe the objectives and methodology to be employed with the project. The alignment with strategic priorities and the objectives of the funding scheme will be considered in combination with the soundness of the concept and credibility of the proposed methodology. Explain how the participants in the research team will bring together the necessary expertise to carry out the project. The 2-page CVs of the Chief Investigators will be taken into consideration.
Execution	<ul style="list-style-type: none"> Elaborate on the workplan and milestones outlined in the timeframe (there are separate sections in the application form for an outline of activities in the Timeline and Budget). Proposed timeframes and budget estimates should be realistic and appropriate. The long-term plan for engagement to attract research funding and produce publications will be taken into consideration. This section should also address the appropriateness of the allocation of tasks, ensuring that all participants [including PhD students, postdocs, Early and Mid-Career Researchers (EMCR)¹, and any researchers on Sabbatical Leave] have a valid role and there are adequate resources in the project to enable them to fulfil that role.
Impact	<ul style="list-style-type: none"> Outline what the participants will gain from the project and how it will contribute to the discipline and field of research. Explain how the project will establish or strengthen a durable cooperation between the universities and participants. Explain how the project will impact beyond the academic sphere (i.e. benefit society and address global challenges). Explain how the project activities and results will be communicated to different target audiences.
