University of Glasgow | Institute of Neuroscience & Psychology
School of Psychology

Annual Research Day
Thursday 1 November 2018, 62 Hillhead Street
Programme

09:30-10:00	**Tea/Coffee**	**Level 5 Seminar Room**
10:00-10:05	**Philippe Schyns**	**Welcome & Opening Remarks**
Session 1		**Moderator Niamh Stack**

10:05-10:15	Holly Scott	#Sleepyteens and social media: the adolescent perspective informing policy and practice
10:15-10:25	Angus Paton	Decoding counterfactual future thinking from visual cortex with fMRI
10:25-10:35	Léo Dutriaux	Developing interventions to change simulations that motivate eating
10:35-10:45	Robert Morgan	Examining Stimulus-Evoked BOLD and CBF Responses in the Spontaneously Hypertensive Stroke Prone Rat
10:45-10:55	Larissa Szymanek	Graduate Teaching Assistants (GTAs) and their Developing Graduate Attributes
10:55-11:05	Jiayu Zhan	Dynamic Construction of Reduced Representations in the Brain for Perceptual Decision Behavior
11:05-11:15	Ruud Hortensius	Probing the flexibility of human social cognition during interactions with artificial agents

11:15-11:30	**Tea/Coffee**	**Level 5 Seminar Room**
Session 2		**Moderator Alessio Fracasso**

11:30-11:40	Olivia Davis	The role of RorB-expressing lamina II interneurons in gating nociceptive C-fibre input
11:40-11:50	Zyra Evangelista	Creating safe and inclusive spaces for LGBT+ in HEIs
11:50-12:00	Domenica Veniero	Top-down signals from the FEF modulate visual cortex excitability by phase-realignment of oscillatory beta activity
12:00-12:10	Mathieu Chollet	Cicero - a virtual audience for training public speaking
12:10-12:20	Ashleigh Willis	Brain-derived neurotrophic factor enhances cortical interneuron maturation: implications for schizophrenia
12:20-12:30	Betul Tatar	Measuring salivation to food cues with dental cotton rolls can reduce eating simulations
12:30-12:40	Andrew Bell	Investigating Connectivity in the Spinal Dorsal Horn

12:45-13:45	**Lunch**	**Level 6 Meeting Room**

Programme (cont.)

Session 3		**Moderator Rachael Jack**
13:45-13:55	Maria Gardani	Sleep Matterzzz
13:55-14:05	Roberto Cecere	Targeting aberrant neural oscillations in schizophrenia using individualised, MEG-guided tACS
14:05-14:15	Chaona Chen	Data-driven modelling of dynamic social face signals
14:15-14:25	Rebecca Openshaw	Neurochemical analysis of a mouse model of the schizophrenia-associated 16p11.2 duplication
14:25-14:35	Helena Paterson	Measuring Self-Stigma in People living with HIV
14:35-14:45	Leon Franzen	Neural correlates of perceptual decision making in adult dyslexia
14:45-14:55	Wilhelmiina Toiva	Methods of measuring reduced emotional resonance in bilinguals' second language

14:55-15:10	**Tea/Coffee**	**Level 5 Seminar Room**
Session 4		**Moderator Andrew Todd**
15:10-15:20	Kieran Boyle	Neuropeptide-Y-expressing inhibitory interneurons in spinal pain and itch circuits
15:20-15:30	Kevin Wilson-Smith	Returning from war: An interpretative phenomenological analysis of a soldiers transition between military and civilian role identities
15:30-15:40	Andrew Morgan	Investigating visual predictions using high-resolution fMRI
15:40-15:50	Lee Seul Shim	The impact of autistic traits on emotion recognition of gestures
15:50-16:00	Allen Dickie	Substance P and gastrin-releasing peptide are expressed by morphologically and functionally distinct populations of excitatory interneuron in the superficial dorsal horn of the spinal cord
16:00-16:10	Anthony Lee	Individual-specific mortality is associated with how individuals evaluate future discounting decisions

16:10-16:15	**Philippe Schyns**	**Closing Remarks**
16:15-17:30	**Cheese & Wine**	**Level 6 Meeting Room**

~~~~~~~~~~~~~~~
