

University
of Glasgow

School of
Veterinary Medicine

Strategic Goals

Education

- Deliver a strong science-based and inquiry-led curriculum that is intellectually challenging and encourages self-directed, questioning and curiosity-driven learning
- Ensure students acquire a broad base of knowledge and skills to provide an excellent foundation for a full spectrum of veterinary and science careers
- Promote self development and the acquisition of professional attributes of the highest standing as well as leadership, self awareness and reflection
- Encourage students to constantly challenge prevailing doctrine and knowledge to advance the practice of veterinary medicine
- Ensure there is diversity of experience and opportunity within and beyond the programme and support students from all national, ethnic and social backgrounds through all stages of the programme

Research

- Conduct excellent internationally recognised research in comparative medicine to improve evidence-based policy and practice
- Promote and facilitate collaboration and linkage between clinical and basic science research
- Further the development of multicentre networks and trans disciplinary approaches to advance veterinary clinical research and enhance postgraduate training

Clinical Care

- Place the interests of the patient above all others
- Deliver the highest possible standards of patient care by maintaining a clinical centre of excellence and applying the most advanced clinical knowledge and practice
- Provide a supportive undergraduate and postgraduate training environment, involving students in the highest standards of clinical teaching

The School wishes to encourage an aspirational and supportive culture where staff and students from around the world want to come to learn, to be inspired, to advance and share knowledge, and be excited by questions and ideas.
