

**Dr Kirsty Squires PhD, MSc, MA, BSc (Hons), MCSFS, ACIfA, FHEA**

**Senior Lecturer in Forensic Anthropology** (Staffordshire University, UK)

**Research Associate** (Observatory for the Mummified Heritage of Sicily, Santa Lucia del Mela, Italy)

**Student Development and Outreach Officer** (Society for the Study of Childhood in the Past)

Kirsty Squires is a senior lecturer in forensic anthropology at Staffordshire University. She comes from a bioarchaeology background and worked in field archaeology before moving into academia. Her research focuses upon the analysis and interpretation of burned human remains, the development of techniques used to analyse burned bone, the archaeology of childhood, and the ethical challenges faced by bioarchaeologists and forensic anthropologists. She is currently working on several research projects including:

1. The impact of occupation and environment on health and development in 19<sup>th</sup> century Staffordshire through an examination of major and trace elements (BABA0 funded research). Collaborator: Dr Simon Chenery (British Geological Survey, UK)
  2. The health, development and social identity of children afforded mummification in the Catacombe dei Cappuccini, Sicily (Collaborator: Dr Dario Piombino-Mascali, Vilnius University, Lithuania)
  3. Ethical issues in biological anthropology in Argentina (Collaborator: Dr Rocío García-Mancuso, CONICET, University of La Planta, Argentina)
1. **Squires, K. E.** and Garcia Mancuso, R. (under review). Desafíos éticos asociados al estudio y tratamiento de restos humanos en las ciencias antropológicas en el siglo XXI. *Revista Argentina de Antropología Biológica*.
  2. **Squires, K.,** Booth, T. and Roberts, C. 2019. Sampling Human Remains and Destructive Analysis: A UK Perspective. In: K. E. Squires, D. Errickson and N. Márquez-Grant (eds.) *Ethical Approaches to Human Remains: A Global Challenge in Bioarchaeology and Forensic Anthropology*. Cham: Springer.
  3. **Squires, K.,** Errickson, D., and Márquez-Grant, N. (eds.) 2019. *Ethical Approaches to Human Remains: A Global Challenge in Bioarchaeology and Forensic Anthropology*. Cham: Springer.
