

UK Vertical Lift Network Annual Technical Workshop

Taking a Snapshot of the Academic Research in Vertical Lift

Workshop Date: Wednesday 14 April 2021

Abstract Submission: Friday 5 March 2021

Location: ONLINE ONLY

Due to the current COVID-19 pandemic, we are running a reduced schedule for the VLN technical Workshop (www.ukvln.net), with the aim of delivering a full event late in the year, subject to the health situation improving.

This workshop is a chance for students and researchers to present their work on a wide range of related subject areas, and for researchers and industry to meet and discuss rotorcraft technology. The workshop programme is based around contributions from the following VLN Themes: aerodynamics, environment, flight mechanics, helicopter dynamics, acoustics, power plants, operations, handling and flight simulation.

Abstracts: Extended abstracts must be contributed by post-graduate students and researchers within the Vertical Lift Network. The abstracts should demonstrate sufficient details about the research presented.

Presentations: Each presentation slot is 25 minutes (20 minutes followed by 5 minutes of Questions & Answers). The presentations will be recorded and will be part of the VLN delivery plan.

Deadline: A contribution *well before the abstract deadline* is appreciated. *This year there is a very limited number of places and a very busy schedule.*

Submission: By email to either

Antonio Filippone (a.filippone@manchester.ac.uk) or

George Barakos (George.barakos@glasgow.ac.uk)

Welcome to our 2021 UKVLN students workshop!
