Institution Application
Bronze and Silver Award
ATHENA SWAN BRONZE INSTITUTION AWARDS
Recognise a solid foundation for eliminating gender bias and developing an inclusive culture that values all staff.

This includes:
• an assessment of gender equality in the institution, including quantitative (staff data) and qualitative (policies, practices, systems and arrangements) evidence and identifying both challenges and opportunities
• a four-year plan that builds on this assessment, information on activities that are already in place and what has been learned from these
• the development of an organisational structure, including a self-assessment team, to carry proposed actions forward

ATHENA SWAN SILVER INSTITUTION AWARDS
Recognise a significant record of activity and achievement by the institution in promoting gender equality and in addressing challenges in different disciplines. Applications should focus on what has improved since the Bronze institution award application, how the institution has built on the achievements of award-winning departments, and what the institution is doing to help individual departments apply for Athena SWAN awards.

Note on Data:
1. Staff data is taken from July census date each year and relates to the academic year (e.g. July 2015: 2014/15). Data are reported in headcount and benchmarked against HESA data provided in Advance HE’s Equality in higher education: staff statistical report 2019, unless otherwise stated.

2. Turnover: Leavers data is used for anyone leaving each academic year 1 Aug-31 July (as per HESA), compared against last census date in which they would have been included. As such, turnover is currently lower for 2018/19; once 2019/20 leavers reported (July 2020), this will be compared against July 2019 and July 2020 census data to provide more accurate comparison of turnover of these staff in pipeline.

3. Promotion eligibility is calculated from the %F/%M at the grade level below the one being applied for at promotion in the previous year. As such, there are no pool data for 2014/15 as 2013/14 are not included in this review period here.

Word Count: 12,000 words
Excludes Table/Figure legends and references to them and application sections in the text. Bronze and Silver Action Plan descriptions [BAP] and (SAP) are not counted.
Images have been entered so as to blur most text, save the emboldened text at the top of most images. They are included as if to be read in print. Given the likelihood reviewers will read submissions online without access to institutional printers in lockdown, zooming beyond 100% in Adobe, may make this text more legible.

COVID-19: Statements on the impact of COVID-19 on actions, events and other factors are embedded throughout to a total of 365/500 words.

LETTER OF ENDORSEMENT FROM THE HEAD OF INSTITUTION
Recommended word count: Bronze: 500 words | Silver: 500 words

An accompanying letter of endorsement from the vice-chancellor or principal should be included. If the vice-chancellor is soon to be succeeded, or has recently taken up the post, applicants should include an additional short statement from the incoming vice-chancellor.

Note: Please insert the endorsement letter immediately after this cover page.
Dear Dr Gilligan,

I have great pleasure in enclosing UofG of Glasgow’s Institutional Athena SWAN Silver Award application. We have made concerted and considerable progress since securing our Athena SWAN Bronze Award in 2013 and upgrading to Post-May Charter in April 2016.

UofG is committed to ensuring each member of our world-changing community, irrespective of gender or background, is given the opportunity to realise their full potential and explore the complete range of their talents. This mission formed a key component of our 2015-20 strategy, *Inspiring People Changing the World* and I am delighted that in addition to our progress at institutional level, 23 Schools and Research Institutes now hold Athena SWAN awards, ensuring the AS agenda is firmly embedded University-wide.

Since our last award, we introduced a range of policies to further strengthen gender equality and improve diversity. For example, we have launched an ambitious Gender Pay Gap Strategy and Action Plan which has led to a decline in the median pay gap, reduction in the gender pay gap and established a number of key demographic milestones. In addition, we have developed new initiatives to support UofG community, including staff in Professional Services and Support roles, by increasing maternity/adoption pay and launching a carers policy.

Our Silver Action Plan builds on these achievements by tackling the gender pay gap amongst the Professoriate and by introducing measures to further increase the female candidate pool, such as improved marketing. Good progress has also been made in strengthening race equality at UofG; and our Silver priorities include adopting an increasingly intersectional approach through joint working between our Gender Equality Steering Group and Race Equality Group.

I am pleased to report UofG is on course to achieve our target of increasing the proportion of women in senior professional and professorial roles to 33%. We have invested significantly in female leadership with over 130 Academic and PSS colleagues participating in Advance HE’s Aurora Leadership Programme and enhanced support for promotion which has seen the number of female candidates presenting for academic promotion more than double. We have made excellent progress in increasing women’s representation on our Senate and Court sub-committees, UofG’s governing bodies. UofG appointed the first female Clerk of Senate in 2019 – who is also our Gender Equality Champion – and we are thrilled to celebrate the first woman Chancellor in the history of UofG, when Dame Katherine Grainger assumes the role later this year. With three out of four Heads of College female and a record number of female professors we understand both the benefits of female leadership and that further action is required, particularly in the STEMM subjects.
Accordingly, UofG is committed to increasing the pace of change and taking the steps necessary to address remaining challenges and further develop our inclusive culture. As part of this, we will seek to rapidly assess the impact COVID-19 threatens to have on equality, diversity and inclusion and act to ensure that none of the progress we have made in recent years is rowed back.

I can confirm that the information presented throughout is an honest, accurate and true representation of UofG of Glasgow and that I am proud to endorse it in the strongest possible terms.

Yours sincerely,
DESCRIPTION OF THE INSTITUTION

Recommended word count: Bronze: 500 words | Silver: 500 words (ACTUAL 457)

Please provide a brief description of the institution, including any relevant contextual information. This should include:

i) information on where the institution is in the Athena SWAN process

We have supported Schools and Research Institutes (‘departments’) to embed AS Charter. Currently, 23 departments hold 22 awards: 1 Gold, 6 Silver and 15 Bronze. Embedding the expanded Charter has significantly supported engagement with gender equality and AS across AHSSBL and STEMM (Fig.2.1).

Equality Governance

Gender Equality Steering Group (GESG) is responsible for progressing gender equality across UofG and preparing UofG Athena SWAN submission. GESG reports to UofG’s Equality and Diversity Strategy Committee (EDSC).

EDSC, chaired by the Principal, meets 3 times/year and reports, through Human Resources (HR) Committee, to University Court (University’s governing body), and through Education, Policy and Strategy Committee (EdPSC) and Student Experience Committee (SEC) to Senate.

EDSC includes an Equality Champion for each protected group under the Equality Act 2010. Each Champion is a member of UofG’s SMG and many convene a group to consider issues in their equality area. We created two new Equality Champions since Bronze2016 covering Mental Health, Refugees and Asylum Seekers.

(ii) information on its teaching and its research focus

UofG benefits from a highly internationalised community and welcomed students from 147 countries around the world in the most recent academic year.

UofG is research-intensive, with annual research income of more than £179m. Research and Teaching is delivered by Schools and Research Institutes (Schools/RIs) across 4 Colleges: College of Arts (Arts), College of Social Sciences (SocSci), College of Science and Engineering (S&E), and the College of Medical, Veterinary and Life Sciences (MVLS). UofG conducts world-leading research in STEMM and AHSSBL and strives towards multidisciplinarity, encouraging collaboration across Colleges.

UofG set out an ambitious KPI in its Inspiring People, Changing the World University Strategy 2015-2020 to increase the proportion of women in senior professional and professorial roles to 33% by 2020. We are on track to achieve this target and in 2019/20 32% of our senior staff were women.
(iii) the number of staff. Present data for academic and professional and support staff separately.

Women are underrepresented in Academic (Clinical/Non-Clinical) roles and comprise majority amongst PSS (explored further ss.4.1-2).

UofG’s 4 Colleges have 19 constituent Schools (10 STEMM; 9 AHSSBL) and 8 Research Institutes/Centres (8 STEMM). UofG hosts a large student population with 19818 Undergraduate (UG; 59%) 7185 Postgraduate Taught (PGT; 63%) and 2557 Postgraduate Research (PGR; 50%) students in 2018/19.

UofG compares favourably to Russell Group (RG) re: female representation at UG- and PGR-levels in STEMM; with comparatively lower representation at PGT-level. In AHSSBL, UofG is consistently higher than RG at all levels, although in both STEMM/AHSSBL we observe slight drop at PGR; the start of so-called ‘leaky pipeline’.

Imbalances are addressed through School/RIAS activity, with University- and College-level support (s.5.6[xii]).
(v) list and sizes of science, technology, engineering, maths and medicine (STEMM) and arts, humanities, social science, business and law (AHSSBL) departments.

Present data for academic and support staff separately

See below:
Figure 2.1 List of STEMM/AHSSBL 'Departments' w/Academic and PSS presented separately as at 2018/19 (N.B. Sch. Of Psychology/Inst. of Neuroscience & Psychology hold joint Bronze Award; * Denotes Dept. Awaiting outcome of Bronze Case for Appeal)
THE SELF-ASSESSMENT PROCESS
Recommended word count: Bronze: 1000 words | Silver: 1000 words (ACTUAL 937 words)

Describe the self-assessment process. This should include:

(i) a description of the self-assessment team

GESG acts as Self-Assessment Team (SAT) for Institutional AS submissions. It is comprised members of staff dedicated to AS principles from all Colleges, University Services, career-levels, work-life balance experiences and includes student representation.

Professor Jill Morrison, Vice-Principal, Clerk of Senate and SMG member assumed role of Gender Equality Champion and GESG Chair in July 2019, following retirement of Professor Anne Anderson, Vice-Principal, Head of College of Social Sciences (Gender Champion, 2013-2019).

GESG membership evolved over the last 4 years, maintaining institution-wide representation and growing to include PSS. Many members joined to represent their area, particularly to reflect the growth of Schools/RI applying for departmental awards, thus ensuring GESG engages with grassroots issues.

GESG expanded its responsibilities in response to Gender-Based Violence (GBV) and the Scottish Funding Council (SFC) Institutional Gender Action Plan (iGAP). UofG’s commitment to gender balance on Court of 40:40:20 is almost reflected in GESG, currently:61% female:39% male1 (SAP 1.3).

GESG’s updated remit now includes:

1) To support and advise UofG in meeting its obligations under the Equality Act 2010. This group will be responsible for the following Protected Characteristic (PC): Sex and Pregnancy and Maternity.
2) Promote cultural change whereby equality for students, staff and visitors is embedded in all University’s functions and activities in relation to these PCs.
3) Support UofG to achieve Key Performance Indicator (KPI) relating to growing the percentage of female staff in Grade 10 and Professorial positions.
4) Support and facilitate the implementation of University’s current AS Action Plan in all aspects (review data, facilitate focus groups, workshop action plan ideas) and act as SAT for Silver submission.
5) Have sight of future AS ‘departmental’ applications and action plans prior to submission.
6) To receive regular reports from the Gender Based Violence Group (GBV), and support implementation of relevant GBV action plan.
7) To receive reports on progress relating to UofG’s Scottish Funding Council Institutional Gender Action Plan (SFC iGAP).
8) To receive regular reports from Students’ Representative Council (SRC) on student activities and concerns in relation to sex and pregnancy and maternity.
9) To support an annual International Women’s Day events/programme.
10) Oversee other gender equality initiatives in line with University’s Public Sector Equality Duty and UofG’s Equality and Diversity Policy.

Membership, detailed in Table 3.1, GESG includes academic and PSS representation from all 4 Colleges and University Services (PSS), Research Strategy and Innovation, Equality and Diversity Unit, Student Representative Council, and Human Resources. All academic representatives are members or leads/chairs of AHSSBL/STEMM SATs and/or College-level equality groups. AS membership/leadership is recognised in workload allocations, PDR and promotion criteria.

PSS bring personal experience as well as expertise in their specific profession, e.g. Heads of Human Resources, Researcher Development Manager.

---

1 This can change annually due to student positions that are ex officio and have alternated between male and female roleholders over the last two years; this split excludes clerk of GESG.

(ii) an account of the self-assessment process

GESG has met 12 times between October 2016-April 2020 to review progress in realising gender equality initiatives and actions, assessing relevant data required in the submission, as well as planning future activities in line with key priorities. Since March 2020, all meetings have been online due to COVID-19, with additional online meetings (n=5) between writing team.

Alongside GESG’s annual data analysis and quarterly review of BAP, consultation across the institution, in conjunction with external networking, have informed development of this Silver submission and Action Plan (SAP):

Data from University Staff Survey 2018 disaggregated by gender and job family (68% response rate – 4384 from 6430, [57%F; 42%M; 1%Other]) and analysed to inform the assessment.

BAME staff experience focus group with academic and PSS in May 2019 (pp.61-3).

A specific Carers Survey (Aug.2019) (260 responses, 54%F; 19%M; 27%PNTS) – this explored support requirements, and experience of being a carer at UofG (discussed s.5.5).

Each School/RI holding an award undertakes a culture survey on a cyclical basis and themes arising from those surveys and submissions have informed our self-assessment.

Feedback gained through internal events held for individuals participating in Advance HE Aurora programme (informing enhancements to in-house support- ss.5.3; 5.4).

Targeted intelligence gathering during UofG IWD 2020 event, the re-enactment of the Lion and Unicorn staircase photograph (identifying actions for UofG re: networking and advancing gender equality in leadership (s.5.3)).

Discussions and best practice shared at AS Scotland Network (which UofG Chairs).

We also learned from Silver AS HEIs’ approach to assessment and response to key Charter Principles. We are grateful to colleagues for sharing submissions, incl. Universities of Edinburgh and Leicester.

(iii) plans for the future of the self-assessment team

GESG will meet at least 3 times/ year to implement the Action Plan and develop further actions to progress gender equality. SFC iGAP WG and GBV Group will continue to report to GESG; a member from GBV Group (Head of EDI and Gender Champion already members) has agreed to join GESG to strengthen joined-up approach

Membership will be reviewed every 3 years to make sure that it remains representative, to maximise contributions from new members and to ensure that members are not overburdened as their Departmental SAT roles evolve. We will improve the gender balance towards ≥40% male representation (SAP 1.3).

GESG will oversee and evaluate SAP progress and report this to EDSC at each meeting (SAP 1.1).
The Principal, Gender Equality Champion and GESG will continue to host an annual celebration event, acknowledging achievements of all staff/students involved in Athena SWAN (SAP 1.2, continues BAP 1.3). The Group shall continue to support Departmental SAT activity via critical readership of submissions and best practice sharing embedded as business-as-usual under ToR (listed above, p.10).

| SAP 1.1 | GESG will report AS progress to EDSC at each meeting, this will be a verbal report unless a detailed proposal/update is required. Lead: Gender Champion; Timeframe: three times a year; Success Measure: Progress in the AS plan is reviewed regularly and EDSC as the strategic group has oversight of progress. |
| SAP 1.2 | An annual AS celebration event will be held for all staff involved in AS across the institution. Lead: EDU Timeframe: annually |
| SAP 1.3 | Improve male representation on GESG to at least 40% |
4. A PICTURE OF THE INSTITUTION

Recommended word count: Bronze: | Silver: 3000 words (ACTUAL: 3284 words)

4.1 Academic and research staff data (1758 words)

(i) Academic and research staff by grade and gender

Look at the career pipeline across the whole institution and between STEMM and AHSSBL subjects. Comment on and explain any differences between women and men, and any differences between STEMM and AHSSBL subjects. Identify any issues in the pipeline at particular grades/levels.

Figure 4.1 UoG Academic Staff (%) 2014/15 – 2018/19, w/National B/Mark

---

2 N.B. Some staff on ‘Academic’ pipeline are based in University Services (e.g. Vice-Principals) and so overall UoG may be higher than AHSSBL+STEMM.

3 Based on XpertHR Contract Level (Academic staff) (*No equivalent for UoG Reader, which reflects Professorial Zone 1 Research Criteria and other elements of G9 Criteria), presented in Advance HE Staff in HE Stats Report 2019, p.208.
SENIOR CAREER TRANSITIONS:
Gender disparity notably increases between G9-Reader-Professor.
Since Bronze2016, G9 female numbers and proportions increased (Table 4.1(a)), now reflect national benchmark (Fig.4.1). At Reader, %F increased alongside a decrease in the overall number of female/male Readers.

Data show 22% increase in number of female Professors since 2012/13 (first year baseline in Bronze2016) from n=85-104 for 2018/19 data. %F Professors increased from 24%-27% between 2014/15- 2018/19, slightly higher than 26%F sector average (Table 4.1(a)).

A significant increase in the number and proportion of women applying for Professorial promotion in 2018/19 round (detailed s.5.1(iii)) increased the number and proportion of female Professors even further. This will further improve the pipeline in 2019/20 data (July 2020 census). However, data as at August 2019 (when promotions from 2018/19 round first took effect) show substantial improvement in %F to c.30%F Professors, representing a 45% increase in number since first engagement with AS in 2012/13 (n=85-155) and now above overall (Fig.4.1), AHSSBL (Fig.4.2) and STEMM (Fig.4.3) benchmarks:

Improving female progression to senior levels underpinned Bronze2016 AP via substantial leadership training (s.5.3(ii)); enhanced promotion criteria and support, particularly for LTS track (s.5.1(iii)), as well as mainstreaming support for development and promotion through School/RI AS initiatives.

EARLY-MID CAREER TRANSITIONS:
Table 4.1/Fig. 4.1: %F/M at G6-7 fluctuated since Bronze2016, towards c.50:50 balance in 2018/19, in line with HESA Benchmark.
Female representation at G7-8 transition improved, with gap between %F at each of those Grades at its narrowest in 2018/19 (G7:50%; G8:46%; widest in 2016/17, G7:51%; G8:43%). Early Career Development Programme (ECDP), launched 2014/15, supported equitable progression across these Grades. Newly appointed academic staff at G7-8 receive structured development towards G9 through ECDP for up to 8 and 5 years, respectively.

ECDP, rolled out to academic all tracks since Bronze2016, shows growth with similar gender pattern at G7 and improving female representation at G8. Overall participation in 2018/19 was gender balanced 50:50.

Figure 4.2 Female Percentage of AHSSBL Academic Staff 2014/15 – 2018/19

Women are overrepresented at G6-8; especially at G6, typically, Research Assistant posts, where small numbers mean slight changes in staffing prompt large percentage fluctuations.

%F drops at Reader, with decline between G9→Professor. However, at Professor, %F increased from 31%-35% between 2014/15-2018/19; coinciding with a more pronounced increase in female numbers (n=60 to n=75) compared to males (n=135 to n=139). This reflects concerted workforce planning in AHSSBL to encourage women towards senior promotion, evidenced by promotions data, discussed in depth at s.5.1(iii); and is higher than 32% benchmark (HESA) for ‘Non-SET’ female Professors.

Figure 4.3 Female Percentage of STEMM Academic Staff 2014/15 – 2018/19

G6 shows reasonable, average, gender balance. Female underrepresentation begins at G8, reflecting Postdoctoral Researcher→Lecturer/Independent Researcher transition, worsening at G9/Reader→Professor.

Number and proportion of female Professors grew; improving on Bronze2016 which showed static proportions (19%F between 2012/13-2014/15). This impact, like AHSSBL, reflects notable growth in female promotions (see s.5.1(iii)) and now reflects (HESA) benchmarks of 21% female ‘SET; Professors.

We must review ongoing appointments to ensure drop in female representation at G7 is not a declining trend. Recruitment data demonstrate lower female application rates but higher success rates when applying. Steps to streamline job descriptions and essential criteria along with targeted marketing should grow %F amongst applicants over next 5 years (see SAPs 2.1(i-iii); 2.2 (i-ii); 2.3 at s.5.1(iii))
UofG compares favourably to benchmarks (Fig. 4.4) but data show variation in %F at Res/Academic Fellow- and Lecturer-levels, with women predominating in 3/5 years. These posts are changeable due to movement between academia (following Research/Academic Fellowship) and NHS (returning to complete clinical training). We saw an increase from 0 to 2 female Clinical Readers through promotion (n=1) and appointment via UofG’s Kelvin Adam Smith Fellowship scheme (n=1).

New joint contract arrangements between UofG and Beatson Cancer Centre created an increase of 5 male Senior Lecturers/Res Fellows in 2017/18 reducing women’s proportionate representation. Despite this, %F at this level remains c.10% above benchmark.

Figure 4.5 Distribution of Contract Types amongst Female and Male AHSSBL Staff 2014/15 – 2018/19

AHSSBL: females comprise 56-57% of staff employed on contracts of fixed-duration in 2018/19, compared to 48%F on Open-Ended. This reflects %F in Research-Only roles (58%F in 2018/19, see Table 4.13) which are fixed duration and %F in R&T, which tend to be permanent (48%F open-ended v. 45% F R&T in 2018/19).

Figure 4.6 Distribution of Contract Types amongst Female and Male STEMMA Staff 2014/15 – 2018/19

STEMM: females underrepresented on open-ended contracts. Fixed-term and open-ended-funding-end-date contracts are more evenly split, reflecting Research staffing (Table 4.16): 61% of women employed on fixed-duration contracts in 2018/19, mirrors female Research-Only population (n=465/763, Research-Only/Total female STEMMA =61%, Tables 4.15-17).

Figure 4.7 Distribution of Contract Types amongst Female and Male CLINICAL Staff 2014/15 – 2018/19

Data are consistent showing Clinical appointments mostly split between Open-Ended and Fixed-Term contracts, with gender balance across each reflecting distribution across Clinical Res/Academic Fellows and Lecturers and other Clinical Academic posts (s.4.1(i)).

Redeployment: To maximise continuity of employment for staff on fixed-term contracts, we provide comprehensive training and support. We strive to redeploy staff through the Redeployment Register. Principal Investigators (PIs) and managers must first consult the RR when recruiting; existing staff on the RR meeting criteria for a post will, ordinarily, be invited to interview.

[COVID-19: VP for Research and Research and Innovation, along with College Research Management Teams are exploring potential redeployment for researchers whose contracts are due to end imminently during the pandemic and are actively engaging with research funders to determine potential impacts on research funding and project end dates possible extensions to current grants. 52/500 words]
(iii) Academic staff by contract function and gender: research-only, research and teaching, and teaching-only. Comment on the proportions of men and women on these contracts and by job grade.

**Figure 4.8 UofG Academic Staff by Contract Function and Gender w/National B/Mark 2014/15 – 2018/19**

Since 2014/15, both males/females more likely to be on LTS-track, %R&T-track dropped (c.37%-34% of women; c.52%-48% of men).

Men are proportionately more likely to be employed on R&T-track, with women most likely to be on Research-track; higher male/female proportions on Research-track across both populations compared to benchmarks (c.45%Fv.24%F and 40%Mv.23%M in 2018/19) reflects UofG’s research-intensive activity.

Female Research staff are overrepresented at G6-7 over last two years, linked to newly-funded research projects. Beyond G7 numbers are small and changeable, with %F dropping between 2014/14-2017/18 but increasing again in 2018/19 at G8. G9 shows drop in females but very small numbers across two Colleges make it difficult to draw firm conclusions. Professor roles tend to be very fractional appointees based elsewhere but contributing to research at UofG via visiting roles and/or in supervision.

UG and PGT course expansion created sharp growth in LTS population since 2014/15.
Women form majority on LTS. Noticeably, there are now 2 female LTS Professors (via internal promotion) and 50:50 gender balance at this level.

⁶ Generally, Grade 6 is not used on the LTS track for substantive posts. These positions relate to Native Language Teachers who provide language teaching on Modern Language degree programmes, often they are exchange students.
UofG has worked extensively over >5 years and since Bronze2016, to raise profile of Teaching and Scholarship and ensure it achieves parity of esteem in our research-intensive environment. These steps, for benefit of all staff, have always disproportionately impacted women in AHSSBL and STEMM due their predominance on this track. They include: developing new promotion criteria and support (s.5.1(iii)); roll-out of ECDP to all tracks (s.5.3(iii), BAP 3.2.2).

Table 4.16 shows women become most underrepresented at G8, reflecting the difficult transition from Postdoctoral Researcher → Senior Postdoctoral/Independent Researcher/tenured Lecturer. To support this, Research and Innovation (R&I) and Employee and Organisational Development (EOD) provide high quality opportunities for personal, professional and career development of researchers, discussed extensively at s.5.2(i)-(iii).

Bronze2016 [BAP 2.2.3] sought to encourage more women to Clinical pipeline via enhanced role modelling and profiling. This was successfully embedded by Schools/RIs with Clinical academic staff, into their AS work (see s.5.6(x)); all Schools/RIs with substantial Clinical Academic representation secured Silver AS status since Bronze2016.

To nurture female leadership in the medical field UofG joined forces with Royal College of Physicians and Surgeons of Glasgow in June 2019, to launch the new Developing Female Medical and Academic Leaders Scholarship Programme. In addition to transferrable leadership skills development, the programme includes personal mentoring from, and networking opportunities with, a range of senior female medical and/or academic leaders. The flagship programme runs until June 2020 and evaluation will inform School/RI AS actions linked to the clinical specialisms of participants.
(iv) Academic leavers by grade and gender

Comment on the reasons academic staff leave the institution. Comment on and explain any differences between men and women, and any differences in schools or departments.

Overall, turnover is low, with female turnover proportionately higher than male turnover in 3/4 years analysed (between 13-14%F v. 9-10%M). Although leaving reason data show women more likely to leave due to contract end period than men, who are more likely to resign. This reflects high proportions of women in research roles and high turnover at early career levels G6-7, associated with postdoctoral research positions.

Turnover is highest at early career levels G6-7, where fixed-duration contracts linked to research funding are common. At more senior levels, numbers are low but turnover slightly higher for Professorial women than men in 2015/16 and in 2017/18. Amongst the most substantive reasons staff left, females were most likely to leave due to contracts ending (e.g. PDRAs) compared to men who were equally likely to resign as leave due to contracts ending:

**Figure 4.12** Leaving Reasons for CLINICAL Staff by Gender for period 2014/15-2017/18

Turnover beyond Clinical Research/Academic Fellow levels is quite low for women, who are most underrepresented at senior levels. Regular turnover at Res/Ac Fellow level is expected as these clinicians come to the end of their period of research and return to the NHS to complete their clinical training. Resignation rates were equitable by gender (Fig.4.12: 30.5%F v. 30.1%M). Amongst the female Clinical Professor ‘leavers’, 1, sadly, died and 2 retired.
(v) Equal pay audits/reviews

Comment on the findings from the most recent equal pay audit and identify the institution’s top three priorities to address any disparities and enable equality in pay.

Our most recent pay review shows a slight drop in overall average gender pay gap from -18.3% to -17.9% (-16.2% median, slightly lower than Scottish HE median of 18.9%); and in academic pay gap from -13.31% in 2016 to -12% in 2019, slightly above national benchmark of c.11%.

UofG’s substantive pay scale across G1-10 (excl. Professoriate) does not demonstrate any statistically significant differences within grades defined by the Equality and Human Rights Commission (EHRC) (±5%) for average salary. However Median pay gap highlights differences in favour of females and males.

Equalised pay analysis shows average gaps largely caused by occupational segregation, with women underrepresented in senior roles, and across Grades 3-4 in PSS (see s.4.2) and overrepresented in Grade 5 PSS.

Table 4.25 Pay Gap by Grade — (-) here denotes a pay gap in favour of males

Figure 4.13 Gender Pay Gap within Professorial Zones

- Gender Pay Gap in favour of Males 2019
- Gender Pay Gap in favour of Females 2015
- Gender Pay Gap in favour of Males 2015
Professorial Zoning places Professors into one of four zones (4 being highest) influenced by academic portfolio and performance (over 4-6 year period) against several criteria. Data show Professorial pay within statistically permitted parameters of 3-5% defined by EHRG for Zones 1, 2 and 3 (Fig. 4.13). The pronounced gap at Zone 1 is attributable to large proportion of women newly promoted to Zone 1 Professor in 2018/19 (s.5.1(iii)), supported by median gap data (Table 4.25). Zone 4 gap is compounded by vertical segregation and low numbers.

Bronze 2016 sought to tackle Zone 2 gap [via BAP 3.2.7: convene working group to explore issues and particularly address Professorial Zone 1: Impact: Reduced pay gap in Zone 2 from -6.2% to -2.9%].

UoF G convened a working group throughout 2016/17 and launched Gender Pay Gap Strategy and Action Plan 2017-2030, including key demographic milestones for academic grades which influence overall pay gap (shown below to have been met/exceeded (Table 4.26)).

The approach, framed around three pillars of Leading Transformation; Attracting Talent; and Supporting Development shows good progress:

![Figure 4.14 Gender Pay Gap Strategy Update, 2019](image)

<table>

</tr>
<tr>
<td>ZONE 2</td>
</tr>
<tr>
<td>ZONE 3</td>
</tr>
<tr>
<td>ZONE 4</td>
</tr>
<tr>
<td>Overall</td>
</tr>
</tbody>
</table>

Future priorities are to continue to implement the Gender Pay Action Plan towards key targets (1) and 2 new actions:

<table>
<thead>
<tr>
<th>SAP 3.1</th>
<th>Revise Gender Pay Gap Action Plan (GPGAP) to address new gaps at Professorial Zone 4, via strategic recruitment and Zone profiling.</th>
</tr>
</thead>
<tbody>
<tr>
<td>SAP 3.2</td>
<td>Address horizontal occupational segregation – particularly amongst PSS across OPS G2-4 through revised job design and recruitment strategy particularly for new James McCune Smith Learning and Teaching Hub.</td>
</tr>
</tbody>
</table>

\* N.B. These data may differ from pipeline data above which have a census date of July 2019.

40
4.2 PROFESSIONAL AND SUPPORT STAFF DATA (882 WORDS)

(i) Professional and support staff by grade and gender

Look at the career pipeline across the whole institution and between STEMM and AHSSBL subjects. Comment on and explain any difference between women and men, and any differences between STEMM and AHSSBL subjects. Identify any issues at particular grades/levels.

Table 4.27 PSS Job Family Profiles at University of Glasgow

<table>
<thead>
<tr>
<th>Function/Job Family</th>
<th>Nature of Roles</th>
<th>Associated Grade Structure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operational (OPS)</td>
<td>= Roles involve direct or indirect service provision for students/staff, through maintenance, grounds, security, portering, residences, hospitality, cleaning and other site services or sporting activity and related services.</td>
<td>Grades 1 – 7</td>
</tr>
<tr>
<td>Technical &amp; Specialist (TECH)</td>
<td>= Roles may offer research support to academic staff/students, e.g. setting up and operating equipment, running analyses and tests, providing technical design services and technical advice.</td>
<td>Grades 2 - 9</td>
</tr>
<tr>
<td>Management, Professional &amp; Administrative (MPA)</td>
<td>= Roles may involve administrative support, developing and implementing policy and processing, providing specialist/expert advice and support, or carrying out project management and support. = Higher Grade levels = substantial role in management of functions.</td>
<td>Grades 2 – 10</td>
</tr>
</tbody>
</table>

PSS are employed across Schools/RIs within Colleges; central teams across College (e.g. College Research Support Teams); and central University Directorates:‘University Services’ (UNIS). PSS fall under three overarching ‘Job Families’: OPS, TECH and MPA.

Table 4.28(a) shows:

- Women predominate across all PSS functions (65%F; in line with benchmark of 63%F total PSS) and areas of UofG-except amongst AHSSBL/UNIS TECH staff;
- Men most underrepresented in MPA and especially in STEMM/AHSSBL areas;
- No AHSSBL OPS roles due to the nature of research; STEMM OPS are engaged in laboratory work and/or animal maintenance/care.

Table 4.28(b) shows:

- UofG diverges from benchmarks re:activities UofG PSS women are predominantly involved in (SOC3-4) compared to men, predominantly involved in (SOC2-3). Despite the overrepresentation of women (65%F) amongst total PSS, they are less likely to be in Manager/Director/Snr Official roles (SOC1: 2.7% of Female PSS v. 4.3% of male PSS), out of line with benchmark. Our activities to support female leadership and progression (discussed below, 2.4.2(ii); s.5.4) continue to be important.

Data by job family distributed across overall PSS show (Fig. 4.15):

- MPA comprise majority PSS across University and vast majority across AHSSBL;
- TECH constitute 17-18% of overall PSS between 2014/15–2018/19 but comprise c.45% of STEMM PSS during same period;
- OPS decreased slightly over the period but formed ave.41% of UNIS; and ave.25% overall PS workforce.

Disaggregating data by gender (Figs. 4.16-17) shows horizontal occupational segregation across PSS:

- Majority Female PSS undertake MPA roles (c.64-66%F v. 41-45%M) across all UofG;
- Male PSS more variably distributed across functions being proportionately more likely than female PSS to hold TECH roles in STEMM (63%M v. 36%F in 2018/19) and OPS roles in UNIS (30%M v. 19%F in 2018/19).

Women are vastly overrepresented at G1 (Table 4.29); most G1 OPS roles are based in Cleaning Services. Whereas male OPS are most notably overrepresented at G5 in each of the 5 years.

We seek to tackle occupational segregation as part of our work on gender pay. Linked to recent Facilities review was the plan to create new teams and roles to run and service the new buildings. These roles would incorporating different facets of roles across OPS G2-4 e.g. cleaning, AV support, security, janitorial; offering chance to move away from traditionally gendered segregation e.g. male security and female cleaning assistants (see SAP 3.2, at s.4.1(iv)).

Women comprise small majority in TECH; they are overrepresented at G3-5, but data show improved representation at G6-7 (increase from 44-48%F at G6; 38-47%F at G7).

UofG expanded TECH family in 2017 to include G8-9. Previously, TECH transitioned onto MPA family beyond G7, where promoted positions reflected substantial growth in management responsibility.

Women are well represented at G9, however, a sharp drop in %F at G8 from 50% to 20% between 2017/18-2018/19 suggests a need to ensure this is not a trend towards women’s underrepresentation. This will be pursued via (SAP 3.7):

**SAP 3.7**

GESG to work with Technician Commitment Steering Group on key action under the Sustainability strand of UofG Tech Commitment AP: *Embed succession planning within technical teams* embedding gender analysis and consideration into the implementation of the plan. Chief Technician who sits across both Steering Groups will facilitate collaborative working.

Women comprise vast majority of MPA between 2014/15-2018/19 (5-year ave. 73% F, Table 4.31) and are overrepresented in G3-6, averaged over the 5 years. Women become proportionately underrepresented at G8-10. However, both number and %F at G8-9 increased between 2014/15-2018/19.

To ensure PSS women’s continued leadership development and progression, since 2014/15, UoF supported 55 PSS women on Advance HE’s Aurora Leadership programme. Of those who completed Aurora, at time of writing, 29% moved into new and/or promoted positions or been regraded (see s.5.3(i)).
(ii) Professional and support staff on fixed-term, open-ended/permanent and zero-hour contracts by gender

Comment on the proportions of men and women on these contracts. Comment on what is being done to ensure continuity of employment and to address any other issues, including redeployment schemes.

PSS contract types = Academic contract types (see s.4.1(ii), for details).

Figure 4.19 Distribution of Contract Types Across TECH Female/Male Staff 2014/15 – 2018/19

TECH staff are more likely to be based on fixed-duration contracts, increasingly tied to grant-funded research projects. The percentage of women on Fixed-Term contracts as a proportion of overall female TECH was higher than equivalent for male TECH (11%F v. c.8%M in 2018/19, Fig. 4.19). Although Table 4.35 shows %F fell across Fixed-Term (72-60%F) and Open-Ended w/FED (66-59%F) and %F increased on Open-Ended (45-48%F) between 2014/15-2018/19,

</table>

Overall turnover by gender does not suggest significant differences, with the greatest difference overall in 2018/19 at 11%F v. 7%M. Turnover is highest across G2-3 for females/males and within those amongst Catering Assistants and Residential Assistants; at higher grades, low numbers make it difficult to draw meaningful conclusions. OPS leavers are more likely to resign than leave due to their contract ending:

Turnover by grade is variable and inconsistent by gender—however, there is higher female turnover, particularly across G2-5. Small numbers at G2-4 inflate percentages; numbers are higher at G5. Most G5 female leavers were Technicians (n=40) and Veterinary Nurses (n=18); most Technicians left because of contracts ending (linked to projects) but most Veterinary Nurses resigned (n=15). This is not uncommon; overlap between University and commercial veterinary practice creates competitive employment opportunities across Glasgow.

Figure 4.22 Tech Staff Leaving Reasons by Gender over 2014/15-2017/18

Figure 4.22 Tech Staff Leaving Reasons by Gender over 2014/15-2017/18
Like all other job families, there is higher turnover at earlier grade levels—here at G3-4. Female leavers are slightly more likely to resign than male leavers; although, male turnover is proportionately higher for the period overall.

UofG’s total BAME staff population is 8%⁹; BAME staff comprise 13% of Academic staff (Table 4.40):

Figure 4.24 Total Academic Staff by Gender and Race Group 2014/15-2018/19

BAME Academic representation increased 11%-13% since Bronze2016; there is greater underrepresentation of BAME Academic women (11%female v.14%male), impacted by gender imbalance in STEMM:

---

⁹ Data drawn from University Equality Monitoring Report, correct as at mid-August each year
Majority of BAME Academics (c.72-78%) are STEMM-based (Table 4.41). BAME staff comprise only 10%AHSSBL v. 14%STEMM; though BAME representation improved since 2014/15 (Fig. 4.25).

Data by Grade show:
- %F BAME staff increases across all Grades except G9 and Professor (Figure 4.26);
- %M BAME staff increase across all Grades except G7 and Reader (Fig. 4.27).
- Rise in female BAME staff numbers across G6-8;9 (Table 4.42) and male BAME staff numbers at all Grades, except Reader (Table 4.43).

Figs. 4.26-7 provide stark visual representation of female/male BAME underrepresentation, worse for women, and sharp declines beyond G7. We discuss previous actions and future priorities to address race equality, below.

Figure 4.28 Clinical Staff by Race and Gender 2014/15 – 2018/19

Table 4.44/Fig.4.28 show improved female Clinical BAME proportions since Bronze2016. However, small numbers mean only slight growth (n=3) more than doubled female BAME Clinical Academics representation as a proportion of female population.

</table>

Data disaggregated by race/ethnicity and gender are consistent and mirror PSS gendered patterns (e.g. female PSS represent 65% White and 63% of BAME PSS; and 65% of total PSS in 2018/19).

Female BAME MPA are slightly underrepresented compared to overall MPA, but still comprise majority of BAME MPA cohort. As per Figs. 4.29-30., BAME staff comprised between only c.4-5% of female/male PSS over reporting period.
Although numbers are small (Table 4.45), Figs 4.29-30 show:

=Proportionately fewer BAME male OPS (ave. 3%) v. BAME female OPS (ave. 5%);

= Better male than female BAME representation within MPA and TECH, although differences are minor.

= Although higher when compared to other PSS groups, the proportion of OPS, whose race/ethnicity identity is ‘unknown’ decreased since Bronze2016.
INTERSECTIONALITY: EMPLOYEE EXPERIENCE (ALL STAFF)

7% of respondents to UofG’s 2018 staff survey, identified as BAME, slightly lower than University benchmark (8%). Benchmarking questions showed BAME respondents more positive than their White contemporaries:

In 2017, UofG revised it PSED Equality Outcomes (EOs), prioritising investigation of BAME staff experience. To support this EO5 implemented [BAP 5.1.2: to adopt Race Equality Charter as a framework to explore student/staff experience].

During self-assessment, we held a focus group with BAME colleagues (May 2019/20). Participation was low (n=5 participants 40%) but included both male/female and Academic/PSS. Key issues highlighted (i) lack of role models, and (ii) lack of sense of any race equality work at UofG:

(i) We have updated REG Chairing to include a senior BAME academic alongside other profiling and role modelling (s.5.6(x)); UofG also named new Learning and Teaching Hub (flagship building in ambitious Campus Transformation Project) after James McCune Smith, the first African American to achieve a medical degree, graduating from UofG in 1837. This celebrates his legacy alongside esteemed James McCune Smith Lecturer series and scholarship.

(ii) Discussions around race and racism is, admittedly, an underdeveloped equality strand at UofG. The Race Equality Champion and REG are actively pursuing steps to address this, including:

- Revised remit and membership of Race Equality Group (REG), establishing a co-chair role to enable representation from a BAME Professor (Equality Champions, who chair Equality Groups, are normally Vice-Principal), and invigorated membership;
➢ Investment in Ambitious Futures Graduate post for six-month project (March-September 2020), on BAME staff data analysis, experience at UofG, and implementation of EHRC Inquiry recommendations; project scope includes intersectional analysis.

➢ Supported female ECR on Advance HE’s Diversifying Leadership programme.

➢ Been the first UK University to investigate historical link to the transatlantic slave trade, publishing Slavery, Abolition and UofG of Glasgow, acknowledging UofG’s financial made through slave trade. UofG’s accompanying programme of reparative justice included development of 30 scholarships for students from British African/Caribbean descent; installation of a plaque on main UofG building acknowledging the land was gifted by a known slave owner; and establishing a research centre with University of West Indies.

➢ To improve opportunities for discussion and focus attention on issues of race and racism, UofG established a full Black History Month (BHM) programme each October since 2017, with c.20 events during BHM.

UofG established a short-life working group to implement EHRC Report: Tackling Racial Harassment: Universities Challenged, (October 2019) recommendations. An intersectional approach to analysis and action planning will be achieved via (SAP 6.8):

| SAP: 6.8 | Improve cross-Equality Group working between GESG and REG to inform understanding and action on intersectionality by:
|          | i. Ambitious Futures Graduate project findings reported to both GESG and REG to ensure intersectional feedback and contribution to outcomes and actions/recommendations.
|          | ii. Findings and recommendations from the project will be distilled and presented at an Athena SWAN (AS) Best Practice session to help School/RI SATs to formulate ‘Departmental’ actions on emerging issues to support their own AS work.

[COVID-19: We were due to host our Decolonising the Curriculum Conference in March 2020, with over 150 delegates and invited speakers. This had to be postponed and will now run as part of BHM 2020; it happened on the cusp of social distancing measures being introduced, providing insufficient time to move online 51/500 words.]
5.1 KEY CAREER TRANSITION POINTS: ACADEMIC STAFF (1650 WORDS)

Recruitment

Break down data by gender and grade for applications, long- and shortlisted candidates, offer and acceptance rates. Comment on how recruitment processes ensure that women (and men in underrepresented disciplines) are encouraged to apply.

**Progress: Implementing [BAP 2.1.1; 2.1.3; 2.2.1(i-iii)]:**

Equality and Diversity Statements in job adverts strengthened; details of AS work included signalling commitment to gender equality;

Mandatory R&S training (1/2 day) for all members of appointing panels, essential precursor for which is successful completion of online Equality and Diversity and now Unconscious Bias Training;

1009 staff completed Half-day R&S training since 2014/15: 524 Academic (50%F: 50%M); 485 PSS (62%F: 38%M) and a further 2445 updated their training via e-refresher 1329 Academic (49.8%F: 50.1%M); 1116 PSS (65%F: 35%M)

Improved data entry and consistent approach improved data reporting- evidenced through new, more detailed, data on e.g. posts advertised across grades (G7/8/9, analysed below);

HR support recruitment panel chairs to apply best practice around panel composition, shortlisting and interview arrangements. Applicants are assessed against standardised Essential/Desirable criteria.

Bronze2016 actions (detailed above) show some improvement in average %F amongst applicants at AHSSB Professor; STEMM G8-9, however, other levels show static proportions (AHSSB/STEMM G7) or even slight decreases (Fig. 5.1):

![Figure 5.1 %F Recruitment Applicants averaged over Bronze2016 baseline and Silver review period](image-url)
Since Bronze2016, UofG transformed recruitment processes and enhanced support via Resourcing and Onboarding Teams, Immigration Compliance and Local Resource Coordinators (LRCs). LRCs based in Colleges/UNIS offer subject-specific recruitment expertise and support. A new e-recruitment system, implemented December 2019, will facilitate [BAP 2.1.2: Audit recruitment panel composition through e-recruitment system, delayed; continued as (SAP 2.4)]. The new Resourcing teams/LRCs generate opportunities to embed gender inclusive practices:

➢ rolling-out best practice of covering caring costs for interviewees across Science & Engineering;
➢ embedded WISE Guidance on gendered language in job adverts into ‘LRC Checklist’ that supports hiring mangers through each stage of the recruitment process.
➢ EDI Champions identified amongst central Recruitment Teams and aim to develop and share best practice across the team and includes a gender/AS Champion.
➢ Transformation included revision and streamlining of standard job descriptions, reducing number of criteria; this approach was championed by colleagues in Chemistry and responds to issues highlighted in the sector about the gendered approach to criteria, with women less likely to apply if they do not satisfy all criteria.

(SAP) will strengthen EDI capacity amongst LRCs and Champions:

| SAP 2.2 | Build capacity in Equality, Diversity and Inclusion (EDI), with a focus on gender equality, amongst Recruitment teams. |

And evaluate any impact on %F applicants following steps to streamline job descriptions:

| SAP 2.3 | Evaluate any gendered impact on female attraction (particularly amongst early-career Grades (G7-8) in STEMM) of revisions to job description criteria. |

Disaggregated data (below) show no inherent bias against females at recruitment but they continue to apply at inequitable rates to men. UofG benefits from award-winning branding and marketing for student recruitment, community building and experience – in combination with SAP actions above we will:

| SAP 2.1 | Harness this and apply the same approaches to staff, with a gendered focus, to advance our aims to increase proportion of women applying. |

</tbody>
</table>

STEMM data show greater female underrepresentation amongst applicants at G7/8/9 (ave. 14%F, (Table 5.5)) than posts advertised at G7 (ave. 35%F, (Table 5.2)); G8 (ave. 31%F, (Table 5.9)) and G9 (ave. 36%, (Table 5.15)). However, G7/8/9 used less than individual Grades (G7/8/9: n=100, Table 5.5; G7;8;9, n=789, (Tables 5.2; 5.9; 5.15)). Despite this, female applicants are proportionately more likely to be shortlisted and appointed.

Female AHSSBL applicants are slightly underrepresented (ave. 39%F, (Table 5.4)) but more likely to be shortlisted and appointed than males. Data (Table 5.7) do not suggest any significant gender bias in appointment levels:

Female AHSSBL/STEMM applicants are underrepresented at G8 (ave. 38%F, AHSSBL (Table 5.8)); ave. 31%F STEMM, (Table 5.9)). In each year analysed female AHSSBL/STEMM candidates are either equally likely, or more likely, to be shortlisted than men and, on average, more likely to be appointed (Table 5.10).

Numbers are small; most G9/Professors are appointed through internal promotion, especially at G9 (G9 promotions: n=92 (Table 5.21) v. G9 recruitment: n=40, (Table 5.11)). Recruitment shows consistently female underrepresentation in applications (Tables 5.11;5.13) and, on average, more likely than male applicants to be shortlisted (G9: ave.29%F v. 25%M, (Table 5.12); Prof: ave. 27%F v. 21%M, (Table 5.14)) and appointed (G9: ave.46%F v. 27%M, (Table 5.12); Prof: ave. 52%F v. 38%M, (Table 5.14)).

Like AHSSBL, G9/Prof appointments are small in number at recruitment and pipeline is fed more by internal promotion (G9/Prof recruitments: n=48 (Tables 5.15; 5.17) v. G9/Prof promotions: n=201 (Tables 5.26; 5.28)).
Small numbers create fluctuations, with %F G9 recruitment applicants ranging from 12-56% (Table 5.15) and at Professor from 7-27% (Table 5.17) between 2014/15-2018/19. Average female application/appointment success rates are higher at G9 and more variable at Professor (Table 5.18).

As above, (SAP) will:

| SAP 2.1 | Harness this and apply the same approaches to staff, with a gendered focus, to advance our aims to increase proportion of women applying. |
| SAP 2.2 | Build capacity in Equality, Diversity and Inclusion (EDI), with a focus on gender equality, amongst Recruitment teams. |
| SAP 2.3 | Evaluate any gendered impact on female attraction (particularly amongst early-career Grades (G7-8) in STEMM) of revisions to job description criteria. |
| SAP 2.4 | Audit Appointment Committees to ensure at least one person of each sex represented. Continues [BAP 2.1.2]. |
Early career Clinical recruitment is based on extremely small numbers but shows women are less likely to apply for Res/Ac Fellow and Lecturer posts in 3/5 years (Tables 5.19; 21) and, particularly at Lecturer, less likely to be shortlisted but more likely to be hired (Table 5.22)).

71
Senior Clinical appointments are rare but mirror the pattern of low female application rates and higher SRs at ‘Hire’ stage (Table 5.23;24). Professorial appointments represent extremely low numbers and reflect the picture in Clinical pipeline with women’s underrepresentation.

Clinical pipelines are best targeted via the clinical specialisms, and so GEO works with School/RIs with Clinical staff to identify best practice- usually through support and development of Clinical Res/Ac Fellows to enable their return to Clinical Academia via Lecturer/SL posts. All Schools/RIs with a strong Clinical component have achieved Post-May Silver AS awards, recognising, in part, their ongoing efforts to address this pipeline.
(ii) Induction

Describe the induction and support provided to new all staff at all levels. Comment on the uptake of this and how its effectiveness is reviewed.

UofG-wide Induction includes an Induction Checklist for new staff/managers:

- The checklist is accessible via an Induction Portal, and includes assignation of Induction Buddy and mandatory training, including Equality & Diversity; Fire Safety, GDPR, Researcher Integrity (Academics) and Recruitment & Selection.

- UofG’s Induction Networking Events for new staff (c.3/year) include a presentation from Employee and Organisational Development and stalls hosted by different services, such as, Equality and Diversity Unit, staff networks (e.g. LGBTQ+; MPA Network), and University Sport. Between 2014/15-2018/19, 325 attended (113 Academic (49%F: 51%M); 212 PSS (66%F: 34%M)). Feedback is positive but staff often miss out depending on their start-date (i.e. it may fall in between sessions).

Prompted by this, and following a wave of recruitment, UNIS HR developed a bespoke digital induction process on key processes, services and organisational culture. This best practice model will be adapted and rolled-out University-wide (SAP 4.1):

| SAP 4.1      | Develop and implement a University-wide digital induction process, based on a successful model developed within University Services. |

[COVID-19: Although we anticipate that recruitment for non-essential activity will reduce (as can already be seen across HE sector), this digital induction will become vital for any new staff and is therefore prioritised in our SAP.35/500 words]
(iii) Promotion

Provide data on staff applying for promotion and comment on applications and success rates by gender, grade and full- and part-time status. Comment on any evidence of a gender pay gap in promotions at any grade.

Promotion is an annual, standardised, University-wide process. Applicants can self-nominate and are identified during Performance and Development Review (PDR). Applications are assessed against 5 overarching criteria:

- Research & Scholarship;
- Impact;
- Learning & Teaching Practice;
- Leadership, Management & Engagement (incl. Outreach and Athena SWAN); and
- Esteem

Upon promotion, salaries are matched to first point on a grade’s salary-scale. Reference to most recent round points to low numbers being appointed above first point with main difference at G9/Reader. These form part of the Gender Pay Gap Working Group’s reviews; any emerging ‘trends’ are highlighted to GESG (Table 5.26):

<table>
<thead>
<tr>
<th>GRADE</th>
<th>FEMALE</th>
<th>MALE</th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
</tr>
<tr>
<td>PROF</td>
<td></td>
<td></td>
</tr>
<tr>
<td>OVERALL</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Post-Bronze 2016 criteria changes, include:

- Revision and clarification of LTS criteria incorporating wider range of skills and experience; LTS Reader-level and criteria (new for 2019/20);
- New Collegiality assessment - recognising individuals who work collaboratively and support colleagues’ careers (especially ECRs) to be evidenced across criteria on all academic tracks.
- Parity of impact with outputs for R&T.

---

10 For GDPR considerations, data on individual promotions by FTE Status cannot be provided.
Support for these changes, and promotion, generally, via:

- Toolkit including promotions whiteboard animation application forms, criteria, success case studies and CV template;
- Online LTS resources including webinars outlining criteria, clarifying ‘scholarship’ and demonstrating how to evidence it in applications, created and delivered by VP Learning and Teaching;
- College/School/RI-level promotion workshops embedded as part of organisational development and/or AS APs [BAP 3.2.3];
- Criteria and Guidance updated with examples of how to evidence Collegiality.

New criteria are positive (outlined above) but must be assessed for gendered impact:

| SAP 3.3 | Evaluate any gendered impact of new Collegiality and Impact Criteria (RT) and introduction of new Reader grade (LTS) through promotion data over next four years. |

ECDP substantially improved women’s progression rates to G8-9; participants ‘complete’ ECDP on promotion to G9. We must begin to track ECDP-completers’ progress to Professor, to identify differences by gender:

| SAP 3.4 | Apply gender-based analysis to assess progression rates from G9-Prof of female and male Academic staff on completion of ECDP. |

---

11 Eligible proportion drawn from totals of G8/9 as both can apply to Reader as next step at promotion.
12 Eligible population drawn from G9/Reader totals as both can apply to Prof as next step at promotion.
Data show:
**G7:** Small female/male numbers apply for G6-7 promotion; they, generally, enjoy high Success Rates (SRs) (Table 5.27).

**G8:** female applicants slightly underrepresented in 2015/16;2018/19 with equitable and consistently high female/male SRs, with 2016/17 an outlier year for male SRs at 57%M (Table 5.28).

**G9:** key point %F drops in AHSSBL pipeline (Table 4.3) Promotions show overall positive representation of women amongst applicants compared to eligible pool and higher average SRs compared to male applicants (75%F v. 56%M (Table 5.29)).

**Reader:** Although changeable over period reviewed, application rates evened out in last two years (50%F:50%M equal to eligible population, 2017/18-2018/19 (Table 5.30). Female SRs improved substantially between 2014/15 and 2017/18-2018/19 (Table 5.30), coinciding with clarified Reader criteria [see BAP 3.2.8].

**Professor:** since Bronze2016, number of women applying for promotion to Professor doubled (n=9 to n=18 between 2014/15-2018/19 (Table 5.31)). High application rates compared to eligible pool for women (Table 5.31), coupled with strong SRs contributed to an increase in %F AHSSBL Professors from 31-35% over the same period (Table 4.3).

---

13 Supra, n.10
14 Supra, n.11
Data show:

**G7:** higher applicant numbers in STEMM (n=132, 2014/15-2018/19, (Table 5.32)) compared to AHSSBL (n=12, 2014/15-2018/19, (Table 5.26)), due to higher numbers at G6 (STEMM: (Table 4.4); AHSSBL: (Table 4.3)). Women are well represented compared to eligible pool over the period taken as a whole and SRs do not suggest any bias by gender (Table 5.32).

**G8:** female applicant numbers and proportions rose across the period since 2014/15, showing variable application rates but slight female underrepresentation in all years except 2016/17; SRs considered overall do not suggest any gendered bias (higher for women in 2014/15; 2016/17; 2018/19, (Table 5.33)).

**G9:** data fluctuate but number and proportion of female applicants increased over the period with higher female SRs in 2015/16; 2016/17; and 2018/19 (Table 5.34).

**Reader:** number of female applicants remained steady at c.4-5/year, with poor SRs in 2016/17 (20%F, (Table 5.35)) an outlier year when compared to other years under review (Table 5.35).

**Professor:** number of women applying for promotion to Professor quadrupled since Bronze2016 (n=4 in 2014/15 to n=16 in 2018/19 (Table 5.36)), with %F applicants increasing from 22-48%, representing substantial representation when compared to the eligible pool (33% in 2018/19). Higher female than male SRs in 2/5 years (75%Fv.50%M, 2014/15; 100%Fv.44%M, 2015/16) and no significant difference in 2017/18 (86%F v. 88%M).
FTE STATUS AND PROMOTION:

Gender distribution amongst applicants working <1FTE shows slight AHSSBL female underrepresentation; and consistently high STEMM female representation compared to eligible pool for 2015/16-2018/19 (Figs.5.4a-b). SRs do not suggest gender bias against women: AHSSBL: 80%F;75%M, STEMM: 89%F;57%M.

Promotion application includes a section taking personal or exceptional circumstances into account and can be used to incorporate periods of part-time working, parental or other forms of leave. [BAP 3.2.1 sought to profile success stories including those with periods of less than full-time working]; this is ongoing and requires prioritised action via (SAP):

| SAP 3.8 | Curate case studies highlighting those who work part-time that have successfully applied for promotion as part of Celebrating Excellence Profiles |

Figure 5.4(a) Promotion Apps (<1 FTE) compared to gender distribution of AHSSBL staff working <1FTE

Figure 5.4(b) Promotion Apps (<1 FTE) compared to gender distribution of STEMM staff working <1FTE
Staff submitted to the Research Excellence Framework (REF) by gender

Provide data on staff, by gender, submitted to REF versus those that were eligible. Compare this to the data for the Research Assessment Exercise 2008. Comment on any gender imbalances identified.

</tbody>
</table>

%* compare vertically within gender
% compare horizontally across total population
Data show:

- Across all marker’s female proportions of eligible staff pool < proportions of submitted staff that were female in REF2014 and RAE2008. However, differences extremely low in REF2014 and an improvement on RAE2008.
- Proportion (within gender) of all eligible male/female staff submitted in REF2014 was ≥RAE2008.
- Statistically significant difference between selection rates for male and female staff; female staff less likely to be selected for REF.
REF2021 requires everyone on R&T contracts to be submitted. UofG will conduct EIA’s of the process to determine any gendered variations between:

- Research-only staff selected as independent researchers;
- Selection of outputs for submission (based the principles used, scores given and any variance between eligible pool, potential outputs and selected outputs by protected characteristic);
- Staff w/zero outputs (data permitting);
- Analyses of staff generating Impact Case Studies selected for submission.

The outcome of these EIA stages will impact our next researchers support strategy, to ensure fair and equal access.

| SAP 6.1 | Complete REF 20201 EIA as outlined in UofG Code of Practice by sex with any differential informing future actions/support for research active staff. |
5.2. KEY CAREER TRANSITION POINTS: PROFESSIONAL AND SUPPORT STAFF (179 WORDS)

(i) Induction (n/a)

Describe the induction and support provided to new all staff at all levels. Comment on the uptake of this and how its effectiveness is reviewed.

[As per section 5.1 (iii)]

(ii) Promotion

Provide data on staff applying for promotion and comment on applications and success rates by gender, grade and full- and part-time status. Comment on any evidence of a gender pay gap in promotions at any grade.

As is common across HE, PSS progression is via application to promoted post/new role, when advertised. Under the Regrading Policy, PSS whose role has substantially ‘grown’ or changed can apply to have it regraded, usually to grade above. Regrading data show:

- women comprise majority of applicants across all job families and years, except amongst TECH staff in 2018/19;
- year-on-year variations in success rates within job families, but higher male success rates overall.

</tbody>
</table>

Data disaggregated by grade and gender within each PSS job family repeat the pattern outlined above.

Men are underrepresented amongst PSS and less likely to apply but more successful when they do apply. Numbers are comparatively very small to overall cohorts, making clear trends difficult. This is due to Regrading not serving the same purpose as academic promotion and is not the norm for advancement of PSS.

As a matter of good practice, however, we will ensure:

SAP 3.6 All Regrading panels are trained in Unconscious Bias.

*In 2018/19 3F were unsuccessful in application to regrade to Grade 6; 18 women in Cleaning Services were successfully regraded from Grade 3 – 4 following a restructure of the operating model in that service.

The main route to advancement for PSS remains transitioning to promoted/new roles; our actions are therefore to ensure all PSS are supported in their personal and professional development, as outlined in s.5.4.
5.3 CAREER DEVELOPMENT: ACADEMIC STAFF (968 WORDS)

(i) Training

Describe the training available to staff at all levels. Provide details of uptake by gender and how existing staff are kept up to date with training. How is its effectiveness monitored and developed in response to levels of uptake and evaluation?

EMPLOYEE AND ORGANISATIONAL DEVELOPMENT\(^{15}\) (EOD) -

EOD provides a wide-range of training opportunities for staff at all levels. EOD meets quarterly to review evaluation from the previous three months and agree any required changes to courses or programmes.

Clinical Academic participation in EOD programmes dropped in 2017/18-2018/19, with no male clinical engagement. Most clinical academic training is delivered via Scottish Clinical Research Excellence Development Scheme (SCREDS) overseen by Clinical Academic Training and Advisory Committee (CATAC).

**LEADERSHIP TRAINING:**

Bronze2016, aimed for ≥45%F participation in leadership programmes, with starting point across AHSSBL and STEMM of 26%F in 2014/15. **We achieved between 43-52%F participation 2015/16-2018/19.**

This indicates strong female representation compared to ave.%F amongst pool of AHSSBL/STEMM academic staff eligible to participate (G8-Prof) (5-year ave.: 43%F AHSSBL; 32%F STEMM).

(ii) Appraisal/development review

Describe current appraisal/development review for academic staff at all levels across the whole institution. Provide details of any appraisal/development review training offered and the uptake of this, as well as staff feedback about the process.

Annual Performance and Development Review (PDR) is compulsory for all staff, including Postdoctoral Researchers and those on fixed-term contracts; Clinical Academics participate in NHS appraisal - Annual Review of Competence Progression (ARCP). These reviews track progression in both academic and clinical competencies.

PDR provides opportunity to discuss progress, achievements, training needs and longer-term objectives. Criteria reflect promotion criteria and include requirement to record promotion discussions.

Staff Survey 2014/15-2018/19 results (Table 5.48) show improvement in PDR engagement but similar, or greater, issues with academic staff’s (both male/female) experience of the usefulness of PDR:

Table 5.49 2014/15 Staff Engagement Survey-Staff in Agreement with the Question:

Did your P&DR leave you feeling your work is valued by UofG?

Table 5.50 2018/19 Staff Engagement Survey-Staff in Agreement with the Statement:

I feel valued by UofG

SMG reviewed the PDR process this academic year 2019/20. In recognition of the need to improve, amongst other factors, its usefulness and resonance with staff it supported the revision and roll-out of the PDR process and an in-house system for administering PDR. The latter was to be linked to other HR systems thus reducing the burdensome nature of the process and enhancing workforce planning capabilities and piloted in the upcoming round (July-September 2020).

<sup>16</sup> N.B. 2014/15 Staff Engagement Survey provider did not supply Academic Staff Data disaggregated by Function (LT/RT/R-Only)

<sup>17</sup> There was insufficient response from staff identifying as ‘Clinical Academics’ to the survey to enable the survey provider to disaggregate responses by gender and retain anonymity provisions.
As part of this, we devised SAP to improve PDR based on School/RI SATs’ experience (in particular, learning from experience of IHW Gold Award holder who pushed this approach at PDR, clear guidance and strong understanding of promotion criteria, to great success) and GESG feedback:

| SAP 3.5 | Improve Academic staff experience of PDR, specifically enhancing career development and planning discussions. Involving, revised PDR Guidance for academic reviewers, enhancing advice on supporting reviewee understanding of promotion criteria and requirements in working towards them. |

[...]  

COVID-19: Given current circumstances, in recognition of the changing demands upon colleagues, UofG has cancelled PDR process for 2019/20. Staff and line managers have been encouraged to engage in development discussions on a more informal basis. We recognise the exceptional work that many have undertaken under difficult circumstances and we will ensure that their work is acknowledged and rewarded on resumption of normal working. [65/500 words]
(iii) Support given to academic staff for career progression

Comment and reflect on support given to academic staff including postdoctoral researchers to assist in their career progression.

Early Career Development Programme (ECDP) provides structured development to newly appointed academic staff at G7 and G8 towards G9 for a period of up to 8 and 5 years, respectively. ECDP includes allocation of a mentor; creation of a Personal Development Plan (PDP); and annual objective setting towards meeting promotion criteria. Exemplar PDP and objective templates are provided online and learning modules aligned to promotion criteria around: (1) Research, Knowledge Exchange and Impact; (2) Learning, Teaching and Scholarship; (3) Management, Leadership and Personal Effectiveness.

At Bronze2016, ECDP had 65F;67M participants and aimed to support female/male career progression at equitable rates towards G8-9.

At 2018/19: ECDP rolled out across all academic tracks; 254F and 257M on ECDP. Analysis demonstrates high SRs for progression on career track with 100% SR for female ECDP promotion applicants. Women progress at same rate or, in some cases, quicker than male counterparts on ECDP; 27F and 32M successfully completed ECDP.

SAP 3.4, will review post-ECDP trajectories to ensure equitable advancement to Professor:

| SAP 3.4 | Apply gender-based analysis to assess progression rates from G9-Prof of female and male Academic staff on completion of ECDP. |

Mentoring: UofG revised its approach to mentoring- diverting from one generic University-wide scheme for academic staff [envisaged BAP 3.1.1], opting instead for tailored and specific mentoring support across development programmes. School/RI schemes are planned or underway across AS APs and included in Technician Commitment AP. A new digital support for mentoring launched by EOD (March 2020) provides information, development resources, and good practice videos featuring UofG mentors and mentees.

Networking: We supplement Aurora with internal programme of networking and learning events covering: Training in Action Learning Sets; Demystifying Finance; and Women on Boards. This offers Aurora participants, mentors and role models networking opportunities; attendance is usually c.40% of each cohort. We want to improve and expand on this offering (SAP 4.3):

| SAP 4.3 | We will expand these networking activities and provide opportunities to engage with aspects of them to academic and PSS (not solely those registered on Aurora) |
Research Culture and Career Development of (Postdoctoral) Researchers, support includes:

- MOOCs and shared across HE:
  - Career Management for Early-Career Academics (collaboration with Edinburgh; Sheffield)
  - Research Impact- Making a Difference
- Glasgow Crucible: for staff with research as a substantive component of their role;
- Postdoctoral Researcher Forum: providing PDRAs a voice in consultation and decision-making;
- Postdoc Skills Lunches: Open sessions run monthly to share skills and cover topics relevant to PDRA careers;
- Annual Research Staff Conference.

UofG’s Research Culture Statement, coordinated by R&IS, advances Concordat to Support Researchers, signed by UofG in April 2020 alongside new Concordat AP 2020-23. Researcher Development Manager sits on GESG to align AS with these developments.

Figure 5.7 UofG’s Research Culture Homepage listing initiatives, training and links to Research Culture Statement and Action Plan
R&IS embed EDI through:

- Good practice Guide on embedding EDI principles into workshop procurement, design and delivery;

- New training on fieldwork in complex or hostile environments includes gendered considerations relating to lone-working/travel and considerations for maintaining good mental health;

- Ingenious Women Scotland- empowering women in STEMM to take control of their professional development and careers, focusing on industrial research. 17 women at UofG participated when it ran for the first time, nationally, in 2018, delivered by Universities of Glasgow and Edinburgh;

- New (mandatory) online PGR supervisor training has EDI considerations embedded throughout.
5.4. CAREER DEVELOPMENT: PROFESSIONAL AND SUPPORT STAFF (WORDS 567)

(i) Training

Describe the training available to staff at all levels. Provide details of uptake and how existing staff are kept up to date with training. How is its effectiveness monitored and developed in response to levels of uptake and evaluation?

Standard courses and approach to evaluation outlined above are same. PSS-relevant training includes a range of online toolkits (including, Change Management; Lean Management; Mentoring; Project Management; Meetings Toolkit) and self-directed resources alongside face-to-face programmes. Course details are shared online, via e-news updates and are linked CoreHR supporting identification and planning during PDR.

Table 5.52 Instances of Training, Number Attending Amongst Female/Male PSS 2014/15-2018/19

</tr>
</tbody>
</table>

Female PSS female predominate on training (ave.77%F on courses (Table 5.52) v. c.65%F PSS (Table 4.28(a)) and attended more courses than males. The high women in MPA roles (ave.73%F, (Table 4.28(a)) and the management/administrative nature of many courses may contribute to this pattern.

LEADERSHIP PROGRAMMES

Table 5.53(i) PSS on UofG Leadership Programmes 2014/15 – 2018/19

<table>
<thead>

(ii) Appraisal/development review

Describe current professional development review for professional and support staff at all levels across the whole institution. Provide details of any appraisal/development review training offered and the uptake of this, as well as staff feedback about the process.

PSS all have an annual PDR in line with process for Academic staff outlined above (s.5.3(ii)). It focuses on progress in relation to previous year's objectives, personal and career development planning over the next year and identification of training or development needs.

Staff can access online resources for PDR support via EOD and intranet (Moodle), without a completion marker (i.e. quiz or test), ‘uptake’ cannot be ‘recorded’:

![PDR Support Online Support Resources](image)

Figure 5.8 PDR Support Online Support Resources

Staff engagement survey shows strong PSS participation in PDR but low perceived usefulness, particularly amongst female/male OPS and male TECH:

Table 5.54 2018/19 Staff Engagement PSS Survey Responses to PDR-Related Questions

<table>
<thead>
<tr>
<th>Staff Engagement Survey - Staff in Agreement with Questions:</th>
<th>MPA 2018/19</th>

<td>50%</td>
<td>39%</td>
<td>34%</td>
</tr>
</tbody>
</table>

Majority OPS staff are based in Estates and Commercial Services (E&CS) (407/455Female; 347/382Male in 2018/19). E&CS introduced new Supervisory-level programme for first-stage line managers in August 2019, including training for developing staff and managing performance. This should improve OPS PDR experience over time.

New initiatives (s.5.4(iii)) should facilitate more useful PDR for MPA and TECH through enhanced development planning.
Comment and reflect on support given to professional and support staff to assist in their career progression.

Two initiatives additional to training and development outlined above, enhance support for PSS:

**GLASGOW PROFESSIONAL BEHAVIOURAL FRAMEWORK (GPBF):**

UofG’s GPBF, launched January 2020, details skills, knowledge and behaviours for successful organisational and individual performance, including details of what is expected of managers and senior leaders. GPBF was developed in consultation with PSS, through 150 interviews with a stratified sample of PSS:

![GPBF's Eight Behaviour Clusters](image)

Figure 5.9 GPBF’s Eight Behaviour Clusters

GPBF was launched at inaugural PS Conference (10 January, 2020) on *Collaborating to Deliver Excellence in Professional Services* (350 attendees, c.60%).

![Glasgow Professional Framework Overview and Opening Plenary at Inaugural Professional Services Conference, 10 January 2020](image)

Figure 5.10 Glasgow Professional Framework Overview and Opening Plenary at Inaugural Professional Services Conference, 10 January 2020
The conference featured internal and external speakers and an exhibition area showcasing UofG PSS Teams. Post-conference webpages provide access to presentations, handouts and all Q&A from the conference.

Feedback was excellent, 81% of attendees rated the event good/very good and it was fully subscribed. We will build on this via SAP:

**SAP 4.5** Deliver a second Professional Services Staff Conference.

UofG will embed GPBF into all aspects of PSS employment journey – supporting development and career progression:

**SAP 4.4** Embed Glasgow Professional Behavioural Framework (GPBF) into HR processes for PSS roles.

[COVID-19]...To support this, UofG hosted a senior HR Professional on secondment from Glasgow School of Art with expertise and experience of implementing similar approaches. The placement commenced in February, but unfortunately, has had to be postponed due to COVID-19 and the secondee returning to provide leadership support to her team in early March. PDR 2020 is also cancelled due to COVID-19, however action to embed GPBF across our processes will continue when business returns to normal and the secondment can resume or alternative arrangements be made 86/500.

**TECHNICIAN COMMITMENT:**

UofG joined Technician Commitment (TC) in 2018, recognising Technicians’ vital contribution to academic and educational excellence. UofG’s TC Steering Group is chaired by a VP and includes technical staff from across UofG (including Technical Apprentices), HR, academic staff and trade union representation. The Group launched their Action Plan 2018-20 (AP) on TC themes: Visibility; Recognition; Career Development and Sustainability at TC Launch event (20 May, 2019), featuring keynote from Kelly Vere, UofNottingham and HE & Technician Commitment Lead, Science Council:

Figure 5.11 Technician Commitment Launch Event, featuring Kelly Vere (middle) and UofG TC Champions (far left)
First Technical Conference scheduled 27 May, 2020 (postponed:COVID-19), was to include keynotes, workshops and updates on AP progress and future plans. TC follows UofG changes to TECH-track, discussed above s.4.2(ii), expanding it to G9 and is enacted at UofG through, amongst other actions:

Tale 5.47 Actions Implemented under TC AP 2018-20 Relevant to TECH Career Development and Progression

</tr>
</tbody>
</table>

Figure 5.12 Example communications and features improving TECH visibility and recognition of achievements on UofG website
Female inclusion and profiling runs throughout TC; 10/22 TC Champions are women. A Chief Technician who leads on aspects of TC (and sits on GESG and his RI SAT) has presented to AS SAT Leads (n=9) to help embed TC in School/RI AS. This is important for equitable TECH pipeline. As discussed above s.4.2(ii), Table 4.30) we must ensure gender equality across TC:

| SAP 3.7 | GESG to work with Technician Commitment Steering Group on key action under the Sustainability strand of UofG Tech Commitment AP: *Embed succession planning within technical teams* embedding gender analysis and consideration into the implementation of the plan. Chief Technician who sits across both Steering Groups will facilitate collaborative working. |
5.5 FLEXIBLE WORKING AND MANAGING CAREER BREAKS (1129 WORDS)

Note: Present professional and support staff and academic staff data separately

(i) Cover and support for maternity and adoption leave: before leave

Maternity/Adoption Policies are available online, with accompanying FAQs. Following Bronze2016, we developed Maternity Checklist into a Maternity Toolkit, highlighting information before/during/returning from leave. The toolkit makes pregnant staff aware of their rights and managers of their responsibilities.

The section before maternity leave links to:

- Notification procedure;
- Risk Assessment;
- Eligibility (leave and pay);
- Checklist for planning leave (including discussion on cover/handover [BAP 4.1.2]);
- Academic Returners Research Support Scheme;
- Starting maternity leave;
- Accrual of annual leave.

The Toolkit model, rolled out for Adoption Leave [BAP 4.1.3] is ‘localised’ by School/RIs through AS to implement School/RI branding and support/contacts, thus, improving engagement.
(ii) Cover and support for maternity and adoption leave: during leave

Pay and Entitlements:
Following Bronze2016, UofG enhanced Maternity/Adoption Pay from 16–18 weeks’ full pay and removed length-of-service eligibility requirements for enhanced pay. Maternity leave cover/backfill is paid by College budgets for staff paid through general funds. College Research Management teams support grant-funded leavers by liaising with funders and determining pay arrangements and project extensions etc. This is a more focused approach to [BAP 4.1.7- which aimed to collate general information for all funders.]

Keeping in Touch:
Following Bronze2016, the Maternity Leave policy was updated to clarify when using KIT days would attract full pay; some staff reported having not realised that a KIT day during a period of fully paid maternity leave would not result in double-pay. Having this additional detail in the policy empowers those on maternity leave to better plan usage of their 10 paid KIT days.

Wellbeing Support:
UofG Sport offers several Parent and Baby classes, incredibly popular with staff during maternity or shared parental leave:

Figure 5.14 UofG Sport Classes for New Parents and Babies
Cover and support for maternity and adoption leave: returning to work

Explain what support the institution offers to staff on return from maternity or adoption leave. Comment on any funding provided to support returning staff.

Parent Buddy Network, aimed to provide peer support to parents, and especially upon returning to work. [BAP 4.1.4: to evaluate uptake] showed low uptake and support moved to online Yammer UofG Parents and Carers Forum (168 members).

Since Bronze2016, UofG improved Emergency Time Off to Care for Dependents Policy from three days unpaid leave to three paid leave. Under UofG’s Academic Returners Research Support Scheme (ARRSS) (established 2015/16), anyone taking maternity, adoption or SPL of ≥four months can apply to their College for up to £10K to support resumption of their research during first year of return. Funding can support teaching buyout, research assistance, laboratory equipment, conference attendance etc.

ARRSS made awards (of £381k) to 47 staff between 2015/16-2018/19. A survey of recipients (August 2019; 26 responded (55% response rate)) showed positive experiences on research and return to work, with 50% of respondents having been promoted since returning:

![Figure 5.15 Responses to ARRSS Survy (August 2019) Questions 15-17](image)

Qualitative comments, summarised/paraphrased below highlight impact of ARRSS on research:

<table>
<thead>
<tr>
<th>What impact, if any, do you feel the funding has had on your research?</th>
<th>Enabled recipient to resume research with a Central Bank leading to publication in 4* journal.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Completion of publications - potentially considered 3* in REF</td>
<td></td>
</tr>
<tr>
<td>Production of manuscript in first year back from leave</td>
<td></td>
</tr>
<tr>
<td>Supported research that served as springboard for two NERC innovation grants and one NERC Public Engagement Grant</td>
<td></td>
</tr>
<tr>
<td>Enabled start of new collaborations and to host researchers from abroad with whom collaboration continues to this date.</td>
<td></td>
</tr>
</tbody>
</table>
Feedback suggested scope to improve awareness and clarification on the scheme:

| SAP 5.1 | Collate information; increase prominence of the scheme with materials included in one place (currently sit across 4 College sites) and clarify usage and provide reports from previous funding recipients. |

UofG expanded the number of Expressing Rooms (n=c.8), with many Schools/RI’s locating one as part of AS APs. Facilities in main University building and designated space in UofG Library Family Study Lounge ensure universal access and are published online [BAP 4.1.8].

Figure 5.16 Family Study Lounge in UofG Library and positive feedback from user on social media
(iv) Maternity return rate

Provide data and comment on the maternity return rate in the institution. Data and commentary on staff whose contracts are not renewed while on maternity leave should be included in this section.

</table>

Shared Parental Pay is offered at statutory provision, and uptake amongst PSS and RT males gradually increased (Table 5.62).

Data disaggregated by grade show Paternity leave is more frequently taken by staff at G6 and above (Table 5.63); this may, historically, be attributable to affordability, caused by lack of enhanced pay. Since Bronze2016, UofG increased Paternity Pay from one-week full pay/one-week statutory pay to two weeks full pay.
Table. 5.63 Adoption, Paternity and Shared Parental Leave by Grade 2014/15 – 2018/19

Parental Leave is overwhelmingly taken by PSS, potentially, due to lack of built-in flexibility into many frontline PSS roles compared to RT roles more amenable to home-working. Enhanced paid support for both parenting and caring responsibilities and new Flexible Working Policy (5.5(vi)), should reduce any over-reliance unpaid parental leave (s.5.5(iii)).
(vi) **Flexible working**

Provide information on the flexible working arrangements available.

Staff benefit from formal and informal flexible working. Formal arrangements generally involve changes to contracted working hours (reducing or compressing these), locations, and term-time working or job-share etc.

More women across all functions apply; SRs are high and by gender over whole period do not suggest any significant difference. PSS most likely to apply; potentially due to greater informal flexibility built into Academic (RT) roles compared to PSS.

In response to the 2018 Staff Survey finding that only 49% of staff felt supported to have a good work life balance (45%M: 54%F) and in enhancing Carer support, HR undertook a full-scale review of the Flexible Working Policy. The policy, approved March 2020, has a principle-led approach and focuses on:

- Valuing output over presence and devising solutions utilising technology;
- Distinguishing between flexible arrangements which change terms and conditions, to those which don’t and only requiring formal requests for the former.
- Applying the policy from first day of employment and encouraging hiring managers to consider roles to be flexible by default **(SAP 2.1(iii) (s.5.1(i)))**.
Given the gendered aspect of flexible working, we will review the equality impact on the progress and implementation of this policy.

| SAP 2.1(iii) | Harness #TeamUofG branding in ‘talent attraction’ strategies and other marketing activity to improve female applications: (iii) Default offering of Flexible working at attraction stage, using ‘Happy to Talk Flexible Working’ branding. |
| SAP 5.2    | Review implementation of Flexible Working Policy for any gendered impact. |

**COVID-19:** Recent circumstances have resulted in immediate changes to the way we work, teach and research. These have expedited steps towards flexible and home working arrangements envisaged under the new policy approach to Flexible Working. We will learn from this experience once we return to more ‘normal’ working patterns and when there are less pressures on staff in their home and personal lives via action outlined above. *(66/500 words)*
(vii) Transition from part-time back to full-time work after career breaks
Outline what policy and practice exists to support and enable staff who work part-time to transition back to full-time roles when childcare/dependent or caring responsibilities reduce.

All academic and PSS who work reduced hours can request to increase their hours back to 1FTE, generally, budget permitting this will be supported. [BAP 4.2.2 aimed to produce support materials around phased return] and prioritised in (SAP 5.5):

| SAP 5.5 | Develop guidance on returning to (full-time) work following a career break or period of part-time working. |

(viii) Childcare
Describe the institution’s childcare provision and how the support available is communicated to staff. Comment on uptake and how any shortfalls in provision will be addressed.

There are >70 nurseries within 2 miles of UofG. We offer childcare vouchers on a salary-sacrifice scheme and promote the government’s new tax-free childcare scheme via Maternity Toolkit. Our on-site nursery, run by an external provider, offers 74 places for under 5’s, and opens weekdays (8am-6pm). Priority is given to students and subsidies are available.

As we develop our campus, we hope to resource a new fit-for-purpose nursery. This was included in planning permission granted for the UofG Campus Transformation project and is under discussion with E&CS. UofG Sport is coordinating the first Easter 2020 school holiday club; if successful, it will be rollout out for future holiday provision.

**COVID-19:** The potential impact of covid-19 on our future Campus Transformation plans is unknown. We therefore are unable to commit to building works, in this case on a new nursery, over the life of the 5-year life of the AS Action Plan. The commitment to address this remains ongoing as we seek to enhance on site provision.

Lockdown measures led to cancellation of the first holiday Sports club, however, we hope to re-run this offering at the same time in the next school year and will assess this in due course and update the SAP. (96/500 words)
Caring responsibilities

Describe the policies and practice in place to support staff with caring responsibilities and how the support available is proactively communicated to all staff.

2018 Staff Survey distinguished between staff ‘carers’ and ‘parents’; with the former reporting a more negative experience. UofG took action to address this through consultation and subsequent policy change. A specific Carers Survey run August 2019, returned 260 responses (54%F; 19%M; 27%PNTS).

Mechanisms identified to be most supportive were:

➢ Ability to work more flexibly (e.g. flexible hours, homeworking etc) – 76%
➢ Paid Carers Leave (e.g. to deal with short-term emergencies) – 74%
➢ Short Term Carers Leave - 33%
➢ Carers Guidance (for Managers) to build awareness and understanding – 31%
➢ Ability to ‘keep in contact’ with dependants throughout the working day – 30%

In response, UofG’s new policy includes:

➢ A change to Emergency Time off for Dependents policy of three days paid (previously unpaid) leave;
➢ New Short-Term Carers Leave – five days paid
➢ New Extended Carers Leave – four weeks unpaid.

The New Support for Staff with Caring Responsibilities Policy, accompanied by a Toolkit and Manager Guidance, launched January 2020.

It was communicated via weekly e-news bulletin, all-staff email, and on UofG’s social media. It is available online at a Carers Support Portal that includes information and internal/external sources of support for Carers.

UofG secured ‘Level 1: Engaged’ Carer Positive status in 2019/20 in recognition of these measures.

We will assess impact via (SAP):

| SAP 5.3 | Review uptake of Carers Leave |
| SAP 5.4 | Re-survey all staff to assess the impact on staff carers’ experience, and any differential impact by gender and/or job family |

Figure 5.16 UofG Carer Support Portal
5.6 ORGANISATION AND CULTURE (1814 WORDS)

(i) Culture

Demonstrate how the institution actively considers gender equality and inclusivity. Provide details of how the charter principles have been, and will continue to be, embedded into the culture and workings of the institution and how good practice is identified and shared across the institution.

We embed our commitment to equality and inclusivity through our comprehensive Equality Governance structure and approach, which also facilitates identification and dissemination of good practice between equality groups, staff/students networks and AS SATs (discussed s.2(i)).

➢ We believe we must create a safe and inclusive environment for our staff and students to thrive. Notable developments in our efforts to do this since Bronze2016, include:

➢ New Refugee Champion progressing actions to secure University of Sanctuary status;
➢ New Mental Health Champion and development of Mental Health Working Group and Action Plan; roll-out of mental health first aid training;
➢ Development of popular EDI Calendar (digital and print), which highlights PSS Teams, projects and staff/student networks, alongside identification of key dates of cultural and faith celebrations;
➢ EDI Book Group run by UofG Library organically took on an intersectional theme and creating space for discourse about gender, racism and sexuality;
➢ Research Culture Awards recognising positive contributions to research culture (UofG shortlisted by THE for work on Research Culture in 2020);
➢ A range of measures and steps related to Gender-Based Violence (GBV) (s.5.6(ii)).

Future plans relate to:

➢ Menopause workshops (1 UofG-wide and held by 4 Schools/RIs) and policy development work- with internal funding secured (c.£6k) from MVLS Wellcome Trust ISSF towards evidence-based guidelines for different settings (e.g. lab-based) in support of (SAP 6.4);
➢ Developing Fertility/IVF policy; issues often overlooked in AS processes that focus on impacts of maternity leave but SAT feedback highlights the significant impact of fertility treatment (SAP 6.5).

| SAP 6.4 | Develop Menopause Policy and Guidelines |
| SAP 6.5 | Develop Fertility/IVF Policy and Guidelines and Establish Network of Support |
(ii) HR policies

Describe how the institution monitors the consistency in application of its HR policies for equality, dignity at work, bullying, harassment, grievance and disciplinary processes. Describe actions taken to address any identified differences between policy and practice. Include a description of the steps taken to ensure staff with management responsibilities are up to date with their HR knowledge.

UofG makes staff aware of policy changes, updates and developments through multiple channels including e-newsletters and HR Bitesize cascades. We monitor operation of HR policies via our biennial staff survey and annual staff diversity reports. SMG, HR, Heads of School/DRI, US Executive Directors, EDSC and Equality Champions act upon identified disparities.

UofG’s Respect Advisers Network (RAN) – volunteer members of staff- support staff and students experiencing harassment and/or bullying, dealt with in Dignity at Work and Study Policy (D@W&SP). EDSC receives annual reports from RAN, and two dedicated questions in 2018 staff survey related to bullying/harassment- no gendered differential was highlighted, and responses seem to be static between surveys (Table 5.68)).

EDU and RAN deliver specific training on harassment and bullying by Schools/RIs, including Where Do You Draw the Line Training (supported by University College London (UCL) with bespoke sessions and Train the Trainer from UCL HoEDI); 4 Schools/RIs have completed the training. EDU has additionally just purchased online Bystander Interventions training, supporting staff to tackle poor behaviours.

UofG’s Personal Relationships Policy (PRP), developed to specifically support GBV, outlines the parameters of student/staff relationships and how/when these should be declared.

Alongside our anonymous reporting tool and First Responders (trained by Rape Crisis Scotland) we will run investigators training with Rape Crisis Scotland to ensure lead managers in sexual harassment cases/misconduct are appropriately trained in questioning techniques and impact on survivors (SAP 6.2):

| SAP 6.2 | Provide Investigator Training to those involved in sexual harassment cases co-delivered with Rape Crisis Scotland (RCS). |
(iii) Proportion of heads of school/faculty/department by gender

Comment on the main concerns and achievements across the whole institution and any differences between STEMM and AHSSBL departments.

We maintained strong female representation amongst Heads of College (Table 5.69). Heads of School (HoS) and Directors of Research Institute (DRIs) are appointed by Court on recommendation of the Principal and Head of College. Roles are advertised with defined job descriptions/person specifications.

Due to lack of turnover, women’s underrepresentation in STEMM remained static at 12%. Greater turnover in AHSSBL improved female representation at 67%F in 2018/19. This follows long-term commitment to enact change via workforce planning and leadership development which was underway and reflected in [BAP:3.1.2].

Greater underrepresentation of senior women (G9/Professor) in STEMM means action will take longer to yield impact. We continue this commitment in (SAP):

**SAP 4.2** Ensure at least 40%F (STEMM) across UofG Leadership Programmes between 2020 – 2025, leading to ≥4 HoS/DRIs in STEMM by 2025.
(iv) Representation of men and women on senior management committees

*Provide data by gender, staff type and grade and comment on what the institution is doing to address any gender imbalance.*

The SMG, comprising a small group of senior academic and PS staff, shows positive increase over the last 5 years (Table 5.71) in number and %women towards >50% as at start of current academic session (Table 5.72):

CMGs and UoG Services Leadership Team (USLT), now the ‘Professional Services Group’ (PSG), provide strategic direction for each area. Female representation ranges from 24% to 73% reflecting gender ratios at higher grades. In S&E CMG, although percentages are low, there has been an increase from 17%F to 24%F.

</tbody>
</table>

* USLT became Professional Services Group (PSG) in 2017-18 following restructuring throughout the previous 2 sessions.

CMG and PSG membership is role-specific – particular changes to Social Sciences CMG, for example, are due to rotations of Head of School positions and the appointment of a Female Deputy Head of College.

(v) Representation of men and women on influential institution committees

Provide data by committee, gender, staff type and grade and comment on how committee members are identified, whether any consideration is given to gender equality in the selection of representatives and what the institution is doing to address any gender imbalances.

Tables 5.78-9 demonstrate increasing female representation on Court (Governing Body) and Council of Senate (Senior Academic Body) meeting [BAP 5.3.1 of 40:40:20]. We benefit from strong female leadership via a female Convenor of Court. Council of Senate shows increases in n/%F members across all categories and overall membership from 33%F-45%F (Table 5.79).

Membership of Senate sub-committees is predominantly ex-officio. All Senate sub-committees show improved female representation over the reporting period. L&T Committee female membership (Table 5.82) reflects successful appointment of a woman VP Learning and Teaching and increases in LTS female promotions.

Court sub-committees are comprised Court members, SMG, Senate Assessors (SAs) and Heads of Services. SAs are senior academics, appointed via nomination (In 2018/19 there were 4 male/2female).

When Court appoints new members, and where they have control, posts are advertised and appointed through standard recruitment processes, with underrepresented groups encouraged to apply. Analysis highlights impact on the ambition of 40:40:20 across substantive membership of all Court sub-committees; noting HR Committee and EDSC with high %F from outset.

121
(vi) Committee workload

Comment on how the issue of ‘committee overload’ is addressed where there are small numbers of men or women and how role rotation is considered.

All committees are asked to aim for the 40:40:20 (F:M:Either) membership split. We ask all committees to track and audit their gender balance on the Terms of References, reviewed annually.

We are mindful not to overburden women in parallel with recognition of committee participation as significant for career progression. University-level committees outlined above contribute towards cases for academic promotion. Individual committee duties are, therefore, reviewed annually with staff at PDR.
(vii) Institutional policies, practices and procedures
Describe how gender equality is considered in development, implementation and review. How is positive and/or negative impact of existing and future policies determined and acted upon?

University committee cover sheets require reflection on, and a statement about, equality implications and Equality Impact Assessment. HoEDI delivers training to staff who support the completion of these sections/EIAs, sits on strategic committees and reviews their policies, practices and procedures. Gender equality is considered within UofG’s EIA process.

EDU supports staff to use EIAs to anticipate negative impact of future policies, suggesting appropriate amendments, and establishes mechanisms for monitoring/review.

(viii) Workload model
Describe any workload allocation model in place and what it includes. Comment on whether the model is monitored for gender bias and whether it is taken into account at appraisal/development review and in promotion criteria. Comment on the rotation of responsibilities and if staff consider the model to be transparent and fair.

UofG WLM system, introduced 2016/17, covers the full range of teaching, clinical, administration, and research responsibilities, including outreach, mentoring and AS activity. UofG allowed each College to create their own multipliers/drivers within their own framework reflecting specialised areas and associated roles.

[BAP 5.3.2 sought to assess whether women are disproportionately tasked with heavy administrative roles]. However, local variation and lack of uniform engagement in WLM’s first two years of roll-out prevented meaningful data for comparison. School/RI AS activity reveals mixed views on WLM’s suitability and shows local models are in development or use. Adapting our approach to this issue we will:

| SAP 6.7 | Map work allocation practices and assess the distribution of administrative roles and duties by gender. By (i) Work with School/RI SATs (on College-basis) to map work allocation models and distribution of administrative functions and duties across the model by gender. |
(ix) Timing of institution meetings and social gatherings
Describe the consideration given to those with caring responsibilities and part-time staff around the timing of meetings and social gatherings.

Social gatherings are often arranged out of core hours so those with teaching commitments can attend. The majority of University-led social events are family-friendly and children are welcome to attend.

Through School/RI SAT activity, >17 Schools/RIs introduced core hours for core business: 10:00-16:00. Guidance for each area is provided by GEO during AS planning including core hours, rotation of days and avoidance of main primary school holidays. Start times for core UofG Committees- Court and Council of Senate were moved to 14:00, enabling 16:00 finish [Implemented: BAP 5.3.3].
(x) Visibility of role models

Describe how the institution builds gender equality into organisation of events. Comment on the gender balance of speakers and chairpersons in seminars, workshops and other relevant activities. Comment on publicity materials, including the institution’s website and images used.

UofG role models women through our website and publications. Female staff and students feature throughout Inspiring People strategy (17/30 case studies); in outreach and marketing campaigns, and in (Future) World Changers series. The latter supports students to achieve their world changing ideas through support and mentorship:

![Image](image-url)

Figure 5.17. World Changers Profiles UofG Website (Left) w/associated Press and Social Media Postings

(Right) We are growing our buildings/venues named after prominent females, including:

- (Marion) Gilchrist Postgraduate Club;
- Isabella Elder Building;
- Mary Stewart Building;
- Lady Cosgrove Seminar Room, (Law);
- New Claris Pears Building to house AS Gold RI of Health and Well-Being.

Schools/RIs audit seminars/events via AS APs. In 2018/19, R&IS launched Guidance on *Embedding EDI into Conferences and Events*, and included that events receiving specific UofG funding must demonstrate evidence of panel diversification. To support this, an approved supplier for temporary/pop-up childcare at conferences and events on campus was identified with Procurement. We will promote and review uptake via **SAP 6.6**:

| SAP 6.6 | Review take up of the childcare supplier as part of embedding EDI in Conference and Events. All conference organisers to be prompted to consider providing childcare service. |

125
[BAP 2.2.3: sought to improve female Clinical Academic visibility], achieved through School/RI AS APs to create case studies:

Figure 5.18 Examples of profiling /case studies of Women in Science STEMM careers
Marking International Women’s Day 2020, UofG updated a famous ‘Lion and Unicorn’ image depicting the (all male) Professoriate upon UofG’s relocation from City Centre to West of Glasgow in 1871. Recreated photograph and accompanying video were launched on IWD, featuring a cross section of UofG’s more than 200-woman professors and senior PSS, all of whom were invited to participate.

We will install the new image in one of UofG’s most prominent and frequently used committee rooms alongside existing portraits of former (male) VCs (SAP 6.9).

| SAP 6.9 | Frame and display 2020 IWD Senior Women photograph in prominent area of UofG. |
| Figure 5.19 The Exodus from the Old College or Lion and Unicorn image, 1871 alongside updated 21st Century Lion and Unicorn Staircase image featuring senior academic and PSS women. |
(xi) Outreach activities

Provide data on the staff involved in outreach and engagement activities by gender and grade. How is staff contribution to outreach and engagement activities formally recognised? Comment on the participant uptake of these activities by school type and gender.

Outreach is formally recognised in PDR and Promotion. SATs gather this data through AS surveys and all UofG AS award holders have actions to ensure balanced representation at Open Days, without overburdening underrepresented groups (e.g. women in life sciences or men in nursing).

UofG’s extensive Widening Participation (WP) Programme works with 113 West of Scotland schools and partners with colleges, local authorities and other organisations. Our WP initiatives were shortlisted in THE awards and won Herald Diversity Award for Outreach/Widening Participation in 2019.

UofG’s iGAP, launched 2017, sets out our plans to meet Scottish Government’s target of no course >75:25 imbalance in favour of either gender by 2030.

iGAP WG, chaired by Gender Equality Champion, considers activity connected to AS, Widening Participation and Tackling GBV. Membership includes STEMM/AHSSBL representation, WP, and Student and Academic Services.
(xii) Leadership
Describe the steps that will be taken by the institution to encourage departments to apply for the Athena SWAN awards.

Internal Capacity Building and Support:
UofG encourages Schools/RIs to apply for AS Awards. 17/18 STEMM and 6/9 AHSSBL hold awards\(^{18}\)- an improvement from Bronze2016, when 9/18 STEMM; 1/9 AHSSBL held awards. GESG supports AS activity through critical readership of applications, identification and sharing of best practice with SATs. Our goal is for all STEMM/AHSSBL areas to hold awards (60% Silver in STEMM and 50% Silver in AHSSBL) by 2025 (SAP 1.4).

UofG’s Gender Equality Officer (GEO) supports SATs and provides advice on Charter principles, submission process, and best practice. All AS student data is available on central data dashboards, ‘Qlikview’. The largest STEMM College, MVLS, employs dedicated AS Data Officer who prepares staff and student data for self-assessment. All other Colleges are provided staff data from central services collated, cleaned and prepared by GEO [BAP 1.5].

Responding to [BAP 1.4], AS Best Practice events were launched June 2019 on UofG gender equality work and initiatives linked to AS. MVLS convenes CEIDC to support gender equality across the College; it is chaired by a senior Professor and includes SAT Chairs and others who discuss common challenges, share best practice and review draft applications. Other Colleges will be encouraged and supported to implement similar models (SAP 1.5).

Recognising Achievement and Celebrating Success:
UofG publicly celebrates the achievements of SATs to encourage culture change. AS is recognised in PDR, and Promotion criteria. We were proud to host AS Awards Ceremony (December 2017).

External Networking- AS Outreach and Best Practice Sharing:
UofG strives to be truly collegiate via AS-related outreach. The GEO, HoEDI, HoHRs and other GESG members serve on AS Assessment Panels and provide critical readership for submissions has hosted ERASMUS MUNDUS visit from GEO, University College Cork and enthusiastically chairs AS Scotland Regional Network.

\(^{18}\) 1 AHSSBL Award Appeal pending at time of writing.
6. **SUPPORTING TRANS PEOPLE**  

**Recommended word count:** Bronze: 500 words  |  **ACTUAL 486 words**  |  Silver: 500 words

(iii) Current policy and practice

*Provide details of the policies and practices in place to ensure that staff are not discriminated against on the basis of being trans, including tackling inappropriate and/or negative attitudes.*

The Equality and Diversity Policy Appendix E provides a comprehensive framework covering: confidentiality, name and gender changes, time-off for medical reasons, provision of gender-neutral facilities, accommodation and managing transition (including optional action plan templates). D@W&SP sets out our values and expectations for appropriate behaviour.

Our policies were developed in consultation with trans people. The LGBT+ Equality Group (LGBT+ EG), chaired by our LGBT+ Equality Champion (a Vice-Principal), and responsible for gender reassignment and all issues relating to transgender, includes representation from LGBT+ staff network, SRC and their elected Trans Officer and Glasgow University Lesbian Gay Bisexual Transgender and Queer + Students’ Association (GULGBTQ+). Potential negative/positive impact for trans people are identified via EIAs. A range of policies (e.g. absence and workload model) include provisions for trans people, such as adjustments for leave for reasons relating to gender reassignment.

UofG has supported several staff through transition and updates manager guidance to ensure we are aware of any issues identified. Staff and Students can select Mx as a prefix and choose between male/female/other for sex/gender.

UofG E&CS’ design manual requires a mix of toilet facilities across campus including accessible, female, male and gender-neutral. A list of these (across 14 buildings) is published online with embedded links to campus map.

UofG makes the Gender Identity Research and Education Society e-learning course available to all staff and students. We work with Scottish Transgender Alliance (STA), who’ve run several trans awareness workshops with c.6 Schools/RIs/Services over last fours years [**BAP 5.2.2**]. Stonewall Scotland has also delivered LGBT Allies training for staff (3 sessions), which includes specific focus on Trans Awareness.

UofG funded a research project entitled *Embedding LGBT Equality in the Curriculum and Classroom* this reviewed how LGBT+ identities were reflected in the curriculum design and the experience of LGBT+ students in the classroom. An academic CPD session was developed as part of the programme and is currently being rolled out across UofG.
(ii) Monitoring

Provide details of how the institution monitors the positive and/or negative impact of these policies and procedures, and acts on any findings.

Positive and/or negative impact is evaluated via liaison with staff and student networks and representatives who feed back through LGBT+ EG and EDU. Over the last five years we have worked hard to address several issues relating, largely, to name changes on systems.

In 2020, we entered the Stonewall Workplace Equality Index for the first time since 2011, allowing UofG to benchmark against other organisations and plan for future developments. We ranked 148th/503. Stonewall ranked our Trans inclusion score at 73%, this compared with the top 100 organisations average score of 60%.

(iii) Further work

Provide details of further initiatives that have been identified as necessary to ensure trans people do not experience unfair treatment at the institution.

A report in UofG’s Glasgow Guardian highlighted the Catholic Chaplain’s membership of Courage International. Considering this, LGBTQ+ students felt the challenges of sexuality and faith required specific consideration. LGBTQ+ Equality Champion and EDU, thus, proposed to EDSC that UofG appoint a LGBTQ+ Chaplain – an individual sympathetic to LGBTQ+ community who could support students and staff with issues relating to sexuality and faith. This University appointed the first HEI LGBTQ+ Chaplain in the UK in January 2020.
# SILVER ACTION PLAN (SAP): 2020-25

SAP APs are noted in Red Font where they signal immediate priorities

## 1. INSTITUTIONAL SUPPORT AND ENGAGEMENT WITH ATHENA SWAN CHARTER

<td>60% STEMM and 50% AHSSBL to achieve Silver Awards between Nov. 2020-Nov. 2025 Athena SWAN Assessment Rounds</td>
<td>Gender Champion, GESG, EDU, HoC, SAT Chairs.</td>
<td>STEMM (60%) and AHSSBL (50%) to achieve Athena SWAN Silver by 2025.</td>
</tr>
</tbody>
</table>
1.5 Colleges S&E, Social Sciences, Arts to consider a similar model to MVLS CEIDC.

Arts and CoSS have started to meet using a joint model, facilitated by College HR Teams.

CoSE has an informal model comprised of Departmental SAT leads and facilitated by College HR.

Agree format for the three Colleges via GESG discussions with College representatives to replicate the MVLS model, increasing capacity and support for Departmental SATs through participation in AS panels; reviewing action plans to identify areas of commonality and pool resources etc.

Discussions to take place and approach agreed during first GESG meeting of 2020/21
Format and approach agreed and implemented by end of academic session 2020/21.

HoC: CoSE, CoSS, Arts

Established Gender Equality Committees to fit College requirements, this will reflect the 40:40:20 model of committee membership.

Increased support will also yield success in AS Awards, as per Success Measure in AP 1.4 above.

---

### 2 IMPROVING STRATEGIES TO ATTRACT DIVERSE TALENT - ACCELERATING PROGRESS TO ACHIEVE IMPACT
