Creature Curiosities!
This collection is full of weird and wonderful creatures. Here is a tick list for you to make sure you do not miss them.

1. Scotland’s largest trilobite was found in almost perfect condition near Girvan. How long is he?
   a) 20cm  
   b) 24cm  
   c) 18cm

2. The world’s smallest dinosaur footprint was discovered quite by chance, but where was it found?
   a) In a tree trunk.  
   b) In the shop.  
   c) Hiding between the toes of a larger dinosaur footprint.

3. Can you find the huge Diplodocus Leg? How tall was the Diplodocus?

4. Can you find the Thylacine (Tasmanian Wolf)? When did it become extinct?
   c) Hiding between the toes of a larger dinosaur footprint.

Answers:
1. c. 20cm
2. b. In the shop.
3. The Diplodocus was 30m tall.
4. The Thylacine became extinct in the 1930s in Tasmania.

Well there you have it. My quick guide to some of the things you must see. Did you also find the things listed in the word search below? Pop back and check them out. We have provided a box to tick when you have seen them!
Cleopatra’s Coin
Don’t miss Cleopatra’s coin. This is the best example in the world. She was a very powerful woman and defeated her brother. She chose to end her life with a snake bite and that brought the Egyptian Pharaohs to an end.

Use the space opposite to create a coin especially minted for you or for a special occasion. Remember to put the date on it and a money value.

STOP! Don’t forget to take a peep at Lady Shep-en-hor, our 2500 year old mummy. The drawings on her coffin are spells and charms to keep her safe in the afterlife.

Coin Collector
Coin collecting was one of my passions and my collection has always been amongst the best in the world!

A Bit About Me!
I was born in 1718. I was very lucky to attend the University of Glasgow. I collected lots of different things when I moved to London. I became a doctor and a teacher too. My students worked from medical drawings I had made of the inside of the human body. Some of them are still used today.

Birds Nesting
Birds are brilliant. They can build amazing nests which can be cleverly camouflaged. Some even use spiders’ webs to hold their nests together!

Brilliant Bugs!
Insects are all around us. Look at the insects on display and create an insect of your own in the space below.

Spotlight on the Chinese Map of the World
Take a look at my very rare Chinese map of the world. It was made for a Chinese Emperor in 1674. Can you find countries you have visited on the map?
Draw some of the animals you can see.
