NEW DATE FOR MAIN GATE CLOSURE CONFIRMED

Issued: Mon, 01 Apr 2019 10:10:00 BST

The new date for the temporary closure of the Main Gate has been confirmed as Monday 8 April.

The work is to allow for a wider, safer pedestrian crossing to be constructed at the top of the hill on University Avenue. To ease congestion, a one-way system will be in operation on campus until this is completed in October.

During this period, vehicle access to the Gilmorehill campus will be via the Dumbarton Road gate (two-way) and Pearce Lodge gate (entrance only).

From today (1 April) the Dumbarton Road gate will re-open to vehicles and pedestrians. Please note that Multiplex are still working in this area to create improved access, a wider pavement, a passing place for cars and a new path between Dumbarton Way and Kelvingrove Park.

During the works, the Main Gate will remain open to pedestrians and cyclists. Access via the Main Gate, Botany Gate and Chemistry Way will be maintained for high-sided vehicles and emergency services.

There is also a one way system map available, outlining the temporary routes.
