

1. Programme Title(s) and Code(s):

<i>Programme Title</i>	<i>UCAS Code</i>	<i>GU Code</i>
BSc Honours in Pharmacology	B210	B210-2105

2. Academic Session:

2018-19

3. SCQF Level (see [Scottish Credit and Qualifications Framework Levels](#)):

10

4. Credits:

480

5. Entrance Requirements:

Please refer to the current undergraduate prospectus at: <http://www.gla.ac.uk/undergraduate/>

6. ATAS Certificate Requirement (see [Academic Technology Approval Scheme](#)):

ATAS Certificate not required

7. Attendance Type:

Full Time

8. Programme Aims:

Pharmacology is a dynamic and rapidly-evolving science of what drugs do and how they do it and is based closely on the related disciplines of anatomy and physiology. The Honours Programme provides a broadly based treatment of the principles and problems of Pharmacology and an advanced treatment of particular aspects from the molecular and cellular to the whole body level of investigation.

¹ This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if full advantage is taken of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each course can be found in course handbooks and other programme documentation and online at www.gla.ac.uk/

The accuracy of the information in this document is reviewed periodically by the University and may be checked by the Quality Assurance Agency for Higher Education.

Particular strengths of the Programme are: a) wide experience of laboratory work; b) the opportunity to undertake a research project under the supervision of an active pharmacological researcher and c) detailed and advanced treatments prepared by active Pharmacology scholars and researchers of 1) the peripheral nervous system 2) the central nervous system 3) drug metabolism and pharmacokinetics 4) in vivo methods.

The Principal Aims are:

- To equip students with a fundamental understanding of Pharmacology, and a competence in relevant scientific methods
- To stimulate and foster a sense of excitement in Pharmacology as an approach to understanding living organisms
- To provide advanced knowledge, understanding, scholarship and critical judgement appropriate for professional employment or further study in Pharmacology or a related discipline
- To develop those advanced transferable, intellectual, interpersonal and practical skills which may be of advantage in a wide range of employment and further study
- To develop in students the flexibility to adapt to change throughout their working lives

9. Intended Learning Outcomes of Programme:

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills, qualities and other attributes in the following areas:

Knowledge and Understanding

By the end of this programme students will be able to:

- demonstrate advanced knowledge and understanding of the central facts and concepts of Pharmacology
- demonstrate knowledge and understanding of four advanced specialist topics in Pharmacology
- demonstrate an understanding of professional ethics in science and of the principles that can guide ethical decision-making in biological controversies
- demonstrate an advanced understanding of the relevance of pharmacological knowledge to problems in areas such as human health and disease
- demonstrate advanced knowledge and understanding of the main investigative methods used in Pharmacology, both in the laboratory and in the field
- demonstrate their ability to learn advanced topics in Pharmacology independently

Skills and Other Attributes

By the end of this programme students will be able to:

Subject-specific/practical skills

- carry out, under supervision, a major Pharmacological research project and report its findings
- demonstrate practical skills in fundamental Pharmacological techniques

Intellectual skills

- solve advanced problems of a numerical or logical nature in Pharmacology
- choose and use an appropriate statistical test to analyse and interpret Pharmacological data
- critically analyse research papers in Pharmacology
- selectively extract information from published sources and use this to present critical reviews of the current state of knowledge in Pharmacological topics

Transferable/key skills

- use computers to search databases, compose reports for written and oral presentation and analyse data
- give a clear, well-constructed oral presentation on an advanced pharmacological topic
- work co-operatively in a team to carry out and present the results of pharmacological research
- demonstrate their ability to manage their time appropriately in order to prioritise tasks and meet deadlines

10. Typical Learning and Teaching Approaches:

A range of teaching methods are used during the programme, including:

- Lectures
- Laboratories
- Workshops
- Group projects
- Poster presentations
- Tutorials
- Seminars
- Honours research project

11. Typical Assessment Methods:

A number of different methods are used to assess the courses which make up the programme, including:

Written degree examinations (essays, objective testing, short answers and problem-solving)

Class examinations

Laboratory reports

Essays

Honours project report

Poster presentations

Oral presentations

Peer review of group work

12. Programme Structure and Features:

The BSc Honours programme normally lasts 4 years, comprises both compulsory and optional courses, and comprises 480 credits (120 credits each year).

Structure

Course Title	Course Code	Credits	Core	Optional	Semester(s) taught
Year 1:					
Biology-1A	BIOL1001	20	✓		Sem 1
Biology-1B	BIOL1002	20	✓		Sem 2
EITHER Chemistry-1	CHEM1001	40	✓		Sem 1–2
OR Science Fundamentals-1X & -1Y	CHEM1002 CHEM1003	2 x 20			Sem 1–2
<i>other Level-1 course(s)</i>		40		✓	
Year 2:					
Fundamental Topics in Biology 2	BIOL2039	30	✓		Sem 1
Human Biological Sciences 2	BIOL2043	30	✓		Sem 2
Key Skills in Biology 2	BIOL2040	30		✓	Sem 1
<i>other Level-1 or -2 course(s)</i>		30		✓	
Year 3 (Honours):					
Pharmacology 3A	BIOL4236	60	✓		Sem 1
Pharmacology 3B	BIOL4237	60	✓		Sem 2
Year 4 (Honours final year):					
Pharmacology Advanced Studies	BIOL4095	20	✓		Sem 1–2
<i>One of these project courses:</i>					
Life Sciences Investigative Honours Project	BIOL4246P	20	✓		Sem 1–2
Life Sciences Dissertation Honours Project	BIOL4247P				

Life Sciences Outreach Honours Project	BIOL4248P				
Life Sciences Internship Honours Project	BIOL4249P				
4 x Life Sciences Honours options		4 x 20		✓	

Life Sciences Honours Options:

The programme will prescribe a mixture of compulsory, recommended and/or suitable Honours options courses. In addition, the list of available Honours option courses is liable to change each session. The options available in the current session can be found via the University's Course Catalogue (www.gla.ac.uk/coursecatalogue/).

Features:

Students may apply to study abroad during either Year 2 or Year 3; this is subject to approval by the School of Life Sciences.

Years 1 and 2 may be available for part-time study. Years 3 and 4 are normally only available on a full-time basis.

Regulations:

This programme will be governed by the relevant regulations published in the University Calendar. These regulations include the requirements in relation to:

- (a) Award of the degree
- (b) Progress
- (c) Early exit awards
- (d) (For undergraduate programmes, where appropriate) Entry to Honours

www.gla.ac.uk/services/senateoffice/policies/calendar/

13. Programme Accredited By:

Not applicable

14. Location(s):

Glasgow

15. College:

College of Medical Veterinary and Life Sciences

16. Lead School/Institute:

Life Sciences [REG20100000]

17. Is this programme collaborative with another institution:

No

18. Awarding Institution(s):

University of Glasgow

19. Teaching Institution(s):

University of Glasgow

20. Language of Instruction:

English

21. Language of Assessment:

English

22. Relevant QAA Subject Benchmark Statements (see [Quality Assurance Agency for Higher Education](http://www.qaa.ac.uk/academicinfrastructure/benchmark/honours/biosciences.asp)) and Other External or Internal Reference Points:

See QAA Benchmark Statement for Biosciences:
