[1] This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if full advantage is taken of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each course can be found in course handbooks and other programme documentation and online at www.gla.ac.uk/

The accuracy of the information in this document is reviewed periodically by the University and may be checked by the Quality Assurance Agency for Higher Education.

- an overall understanding of the cultures and societies of ancient Rome
- to provide opportunities to specialise in particular aspects of ancient Rome through taught courses and dissertation work
- to provide an understanding of the wide range of approaches which can be applied to the study of ancient Rome
- to provide an understanding of Classics as a discipline which is itself dynamic and evolving

9. Intended Learning Outcomes of Programme:

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills, qualities and other attributes in the following areas.

Knowledge and Understanding

By the end of this programme students should be able to demonstrate:
- thorough and accurate knowledge of Latin through seen and unseen translation
- detailed knowledge and understanding of selected Latin texts
- broad general knowledge of the history of ancient Rome and of its major cultural achievements
- detailed knowledge and understanding of a range of historical and literary topics within the field of Classics, including the topic chosen by the student for his or her dissertation
- understanding of the breadth of possible methods of studying and interpreting ancient Rome

Skills and Other Attributes

Subject-specific/practical skills

By the end of this programme students should be able to demonstrate:
- ability to translate Latin, unseen, accurately into English
- ability to translate prepared set texts in Latin accurately into English
- ability to provide relevant and detailed comment on passages of prepared set texts in Latin
- ability to provide detailed analysis of primary sources relating to ancient Rome
- ability to relate their knowledge and understanding of the genres of Latin literature to the interpretation of specific passages of Latin literature

Intellectual skills

By the end of this programme students should be able to demonstrate:
- ability to articulate and sustain extended and comprehensive academic argument in written form
- ability to assess oral and written material rapidly and then respond to the ideas so presented
- ability to assess and evaluate the importance of primary sources in constructing academic argument
- ability to assess and evaluate secondary literature in constructing academic argument
- ability to formulate a research question and to construct an answer based on independent and supervised reading and research

Transferable/key skills
- ability to communicate lucidly and effectively in written and oral form
- ability to use IT resources appropriate to the material which is being studied
ability to work to clear deadlines and plan work accordingly

10. Typical Learning and Teaching Approaches:

The learning and teaching methods for this programme are
- the lecture. Lectures support student learning through the presentation of knowledge in coherent and lucid manner and facilitate structured and guided interpretation and methodological discussion. In the subject area's research-led environment, lectures can also, where appropriate, give students access to research in progress prior to publication.

- the seminar. Seminars support the development of knowledge through the detailed study of specific issues and the development of skills by demanding critical engagement with primary and secondary material and clarity in oral presentation.

the supervision. Supervision (of dissertation work) support students' development of the skills of formulating and answering a research question and of presenting their findings in coherent and lucid written form.

11. Typical Assessment Methods:

The assessment methods used by the subject area are
- essays. Essay-writing assesses students' knowledge and understanding; it also enables them to demonstrate their subject-specific and transferable skills. In terms of intellectual skills, this method of assessment tests the ability to articulate and sustain academic argument and to assess and evaluate primary and secondary material in so doing
- commentary exercises. Commentary exercises assess students' knowledge and understanding; they also enable them to demonstrate their subject specific skills
- grammar and translation exercises. These assess knowledge and understanding of Latin language
- exams. Exams assess students' knowledge and understanding; they also provide an opportunity to test the ability to assess written material rapidly and respond to it.
- seminar presentations. Seminar presentations assess knowledge and understanding and subject-specific skills and the transferable skills of oral presentation and working to deadlines and may include use of IT resources. Seminars assess the ability to sustain academic argument and to assess and evaluate primary and secondary material in so doing
- dissertation. The dissertation assesses students' knowledge and understanding, their subject-specific skills as relevant to the topic they are working on and their transferable skills. The dissertation provides an opportunity to assess the intellectual skills of formulating a research question, articulating and sustaining an extended and comprehensive academic argument and of assessing primary and secondary source material in constructing academic argument.
